Saunders Nursing Survival Guide: Critical Care & Emergency Nursing Lori Schumacher, Cynthia C. Chernecky, 2009-06-30 Part of the popular Saunders Nursing Survival Guide series this book

prepares you to manage the most common health care problems you'll see in critical care trauma or emergency settings. Each chapter is organized from the most immediate and life-threatening conditions to less emergent critical care conditions. Its lighthearted cartoon-filled approach simplifies difficult concepts, covering each body system in terms of current practice standards. Consistent headings break content into four succinct areas of review: What subject IS, What You NEED TO KNOW, What You DO, and Do You UNDERSTAND. Clinical terms and shorthand expressions are highlighted, exposing you to terminology used in the hospital setting. A color insert illustrates concepts and principles of critical care and emergency nursing, including various complications. Mnemonic devices aid your memory, and interactive activities help you learn with exercises including fill-in-the-blank, matching, word jumbles, true/false, and crossword puzzles. Special icons help you focus on vital information. Take Home Points help you prepare for clinical rotations. Caution notes alert you to dangerous conditions and how to avoid them. Lifespan notes point out age-related variations in signs and symptoms, nursing interventions, and patient teaching. Culture notes cite possible variations related to a patient's cultural background. Web links direct you to Internet resources for additional research and study. What You WILL LEARN learning objectives help you identify quickly the content covered and goals for each chapter. NCLEX examination style review questions at the end of each chapter allow you to test your understanding of content and practice for the Boards. Cartoon characters with brief captions help to better explain difficult concepts. Margin notes are streamlined for ease of use and effectiveness. Content updates reflect current practice and emergent situations, including increased focus on disaster preparedness, code management, updated ACLS guidelines, and hypertension.
