Realist Criminology Crime Control And Policing In The 1990s:

Realist Criminology John Lowman, Brian MacLean, 1992-01-01 In the 1980s in Britain a new school of critical criminology arose to challenge the political and philosophical idealism that characterized its critical predecessors and to offer an alternative to the crime control policies of the New Right Arguing that by overemphasizing the crimes of the powerful much of critical criminology had virtually ignored the impact of street crime on its victims a left realism emerged to reassert the centrality of the victim in the development of a progressive criminology Critical realism recognizes the seriousness of street crime for those people victimized by it particularly women acknowledges that a consensus as to the desirability of a core group of laws does exist and advocates various kinds of criminal justice reform and crime prevention strategies In this respect there are important parallels with debates in feminism concerning the role of the state in the problem of violence against women One of the most important contributions critical realism has made to criminological research is the development of local crime surveys which attempt to measure patterns of victimization and policing and how these are perceived by the general public Such research remains largely undeveloped in North America and it is the purpose of this book to begin to take stock of these developments and examine their relevance for North America This is the first text to include a critical examination of left realism examine its relationship to feminism and comment on its relevance outside Britain *Routledge Handbook of Critical Criminology* Walter S. DeKeseredy, Molly Dragiewicz, 2018-04-09 The main objective of the second edition of the Routledge Handbook of Critical Criminology is twofold 1 to provide original chapters that cover contemporary critical criminological theoretical offerings generated over the past five years and 2 to provide chapters on important new substantive topics that are currently being studied and theorized by progressive criminologists Special attention is devoted to new theoretical directions in the field such as southern criminology queer criminology and green criminology The diverse chapters cover not only cutting edge theories but also the variety of research methods used by leading scholars in the field and the rich data generated by their rigorous empirical work In addition some of the chapters suggest innovative and realistic short and long term policy proposals that are typically ignored by mainstream criminology These progressive strategies address some of the most pressing social problems facing contemporary society today which generate much pain and suffering for socially and economically disenfranchised people The new edition of the Handbook is a major work in redefining areas within the context of international multidisciplinary critical research and in highlighting emerging areas such as human trafficking Internet pornography and image based sexual abuse It is specifically designed to be a comprehensive resource for undergraduate and postgraduate students researchers and policymakers **An Introduction to Criminological Theory** Roger Hopkins Burke, 2017-11-27 This book provides a comprehensive and up to date introduction to criminological theory for students taking courses in criminology at both undergraduate and postgraduate level Building on previous editions which broadened the debate on criminological theory this book presents the latest

research and theoretical developments The text is divided into five parts the first three of which address ideal type models of criminal behaviour the rational actor predestined actor and victimized actor models Within these the various criminological theories are located chronologically in the context of one of these different traditions and the strengths and weaknesses of each theory and model are clearly identified The fourth part of the book looks closely at more recent attempts to integrate theoretical elements from both within and across models of criminal behaviour while the fifth part addresses a number of key recent concerns of criminology postmodernism cultural criminology globalization and communitarianism All major theoretical perspectives are considered including classical criminology biological and psychological positivism labelling theories feminist criminology critical criminology and left realism social control theories the risk society The new edition also features comprehensive coverage of recent developments in criminology including situation action theory desistance theory peacemaking criminology Lo c Wacquant s thesis of the penal society critical race theory and Southern theory This revised and expanded fourth edition of *An Introduction to Criminological Theory* includes chapter summaries critical thinking questions a full glossary of terms and theories and a timeline of criminological theory making it essential reading for those studying criminology

the impetus behind the RCMP's transformation was ensuring its own survival and continued relevance. *Riding to the Rescue* is a provocative and incisive look behind one of Canada's most enduring icons at the cusp of the modern era. *European Journal of Policing Studies*, 2018-07-31 Contents Introduction Antoinette Verhage Lieselot Bisschop and Wim Hardyns
Articles How to Police a Porous Fortress Monica den Boer 1 Abstract The purpose of this article is to provide an overview of the way in which the European Union has gradually but steadily built a security architecture based on the control of mobility and borders. Different logics of policing are interwoven in several projects which are strongly interdependent with technological innovation. Furthermore, the European policing of mobility is primarily performed by mounting surveillance both inside and beyond European borders by means of which all forms of movement transactions travelling etc are subjected to intensive monitoring by multiple actors who are interlinked through strategies and systems. The main finding is that border policing is shifting in a fundamental way from fixed to fluid from territorial to virtual and from physical to technological. Hence paradoxically though mobility is strongly promoted as one of the main virtues of the European Union, Europe's precautionary protection may be at ill ease with the free movement of people. The article seeks to stimulate the knowledge and debate about deeper shifts in Europe's security apparatus and develops this from a law enforcement perspective.
Keywords Europe borders security mobility technology 1 Academic Dean at the Police Academy of The Netherlands Member of the Committee on European Integration of the Advisory Council on International Affairs and Visiting Professor at the College of Europe in Bruges Police Science in Germany History and New Perspectives Joachim Kersten 1 and Ansgar Burchard 2 Abstract In the German speaking academic world Police Science Polizeiwissenschaft is a fairly new and little known area of social science. Accordingly the academic status of police science is anything but firmly established but rather at a hybrid stage of development. The very combination of policing and academic study research seems to remain largely incompatible not only to police managers but also to main stream sociology. German police science differs substantially from the Anglo American Australian approach. One main difference pertains to legal traditions others are due to historical and cultural developments that will be taken up in this descriptive essay. However Anglo American Australian police theories have a lot to offer to German and European police scientists and this will be demonstrated. For a future common approach to an evolving European police science similar descriptions will be required from other European countries to establish a comparative foundation of joint EU police studies. Some of the principal dimensions of such a comparison will be sketched in this essay. It concludes with a presentation of empirically based police studies carried out by instructors and Master students at the newly founded German Police University in Münster. Topics are media coverage of clashes between police and demonstrators a typology of third party intervention in cases of assault in public places and COREPOL EU FP7 a comparative security research project aiming at an improvement of police minority relations through means of restorative justice programs. Perry, 2006-06-29 Advancing Critical Criminology constitutes a timely addition to the growing body of knowledge on critical
criminology scholarship DeKeseredy and Perry have assembled a volume that provides scholars with an in depth review of
the extant literature on several major branches of criminology as well as examples of how critical criminologists apply their
theoretical perspectives to substantive topics such as drugs interpersonal violence and rural crime Accordingly this work is
divided into two main sections overviews of theories and applications Each chapter provides a summary of work in a specific
area along with suggestions for moving the field forward This reader is unique in its choice of topics which have often been
overlooked in the past An expert collection of international scholars Advancing Critical Criminology is certain to stimulate
lively debates and generate further critical social scientific work in this field **The Canadian Criminal Justice System**

Nick Larsen, 1995 The administration of justice is an area of social policy that defies attempts to achieve a balance between
order and the protection of the public and respect for individual rights The media contain daily accounts of the failure of the
criminal justice system to repress crime It is within this social and legal context that this work is situated In addition to
including a range of articles in the standard areas of policing courts and corrections recent articles deal with such
controversial issues as aboriginal justice the recruitment of visible minorities by Canadian police forces and the role of
women in the Canadian criminal justice system The collection concludes with a critical assessment of the retributive model
that currently serves as the philosophical underpinnings of the Canadian criminal justice system *Gender, Violence and
the Social Order* J. Mooney, 2000-09-05 This is an exciting and innovative book which provides a thorough introduction to
contemporary social theory by examining the way in which the widespread existence of violence against women is explored A
wide range of theories from liberalism to evolutionary psychology are considered culminating in the development of a
distinctive feminist realist position The theories discussed are tested against a large scale survey the findings of which
challenge many conventional wisdoms as to the patterning of violence in contemporary society **Crime and Justice in**

the Trump Era Francis Cullen, Amanda Graham, 2020-05-21 Crime and Justice in the Trump Era documents the impact of
Trump administration policies on 1 violence against women 2 the treatment of persons of color 3 corporate and
environmental crime both domestic and international and 4 federal crime control policy First the book examines how the
policies of Donald Trump's administration have affected the rights and safety of female Americans in particular violence
against women including sexual assault The book then goes on to explore President Trump's very public stances devaluing
people of color whether they reside within the nation's borders or are seeking entry into the United States Next the
collection evaluates the collateral costs attached to the ongoing campaign to reduce regulations that protect consumers

workers and the environment Likewise the valuing America's narrow self interests may also have effects internationally where crime and violence may be tied to Trump's promotion of White nationalism toleration of human rights violations and denial of climate change Lastly criminal justice policies are examined both in the early stages of Trump's presidency which were marked by his get tough rhetoric along with the more recent support for the First Step Act The authors represent different perspectives in the discipline critical feminist and mainstream criminologists quantitative and qualitative scholars and students of both street and white collar crime Taken together this book reflects a variety of criminological voices and advances immeasurably our understanding of the Trump administration's influence on crime and justice in America The chapters in this book were originally published as a special issue of *Victims Offenders An International Journal of Evidence based Research Policy and Practice*

Nightclub George Rigakos, 2008 In the last thirty years bouncers have emerged as iconic gatekeepers of contemporary cool exclusivity and social capital in urban centres around the world In this groundbreaking empirical study Rigakos critiques the supposed liberating and expressive potential of nightclubs by theorizing them within the linked themes of risk consumption and security in late capitalism People attend nightclubs to be seen and see others to consume others as aesthetic objects of desire and to elicit desire in others the desire to be desired This synoptic frenzy according to Rigakos fuses surveillance and aesthetic consumption It fetishizes bodies and amplifies social capitals producing optic violence and crises of respect fuelled by alcohol At closing time populations flow out of the haze of the nightclub and onto city streets from private spectacle to public nuisance Mirroring the general late capitalist compulsion to binge and purge the nightclub's spectacle of consumption produces a litany of unfulfilled courtiers of the night staggering out of one spectacle and immediately into another In this sense bouncers are not only prime policing agents in the nighttime economy but are producers of an urban risk market a site of circumscribed transgression and consumption that begins at the door

The Making of Singapore Sociology Tong Chee-Kiong, Lian Kwen-Fee, 2021-11-08 This book presents a collection of essays of how the city state of Singapore's societal dynamics have evolved from the time of its birth as a nation in 1965 to the present Key areas of Singapore society are explored contributing to the understanding of the social organisation of the city This study reveals a shift from the modernisation studies in the 1970s to a more political economic turn as a consequence of the influence of dependency and world systems theories Topics covered include urban studies family education medical care class and social stratification work language ethnic groups religion and crime and deviance

Radical and Marxist Theories of Crime Paul B. Stretesky, 2017-03-02 The essays selected for this volume show how radical and Marxist criminology has established itself as an influential critique since it emerged in the late 1960s Unlike orthodox criminology which emphasizes individual level

explanations of criminal behavior radical and Marxist criminology emphasizes power inequality and structures especially those related to class as key factors in crime law and justice This collection of essays draws attention to the way in which structural forces shape and influence both individual and institutional for example governmental behavior highlights neglected crime corporate governmental state corporate and environmental which causes more extensive damage than the street crimes examined by orthodox criminology and discusses the ways in which law and criminal justice processes reinforce power structures and contribute to class control
