Reason And Relativism:

Reason Relativism And God Joseph Runzo, 1986-05-19 **Controversy in Marketing Theory: For Reason, Realism, Truth and Objectivity** Shelby D. Hunt, 2016-09-16 In this book distinguished theorist and author Shelby D Hunt analyzes the major controversies in the philosophy debates raging throughout the field of marketing Using an historical approach Hunt argues against relativism and for scientific realism as a philosophy for guiding marketing research and theory He also shows how the pursuit of truth and objectivity in marketing research are both possible and desirable Specific controversies analyzed in the book include Does positivism dominate marketing research Does positivism imply quantitative methods Is relativism an appropriate foundation for marketing research Does relativism imply pluralism tolerance and openness Should marketing pursue the goal of objective research An ideal companion to Hunt's classic text *Foundations of Marketing Theory* this volume will be equally useful on its own in any graduate level course on marketing theory Moral Reason Julia Markovits, 2014-03-07 What is it to have a reason to do something is one sort of question what is it we have reason to do is another These questions are often explored separately But our answers to them may not be independent what reasons are may have implications for what reasons there are So the door is opened to a troubling tension the account of what reasons are that is most plausible in its own right could entail a view of what we have reason to do that is independently implausible In fact it looks like this is the case In the first half of *Moral Reason* Julia Markovits develops and defends a version of a desire based internalist account of what normative reasons are But does that account entail that there are no moral reasons that apply to all of us regardless of what we happen to desire It may look obvious that it does that a bullet must be bitten somewhere If what we have reason to do depends on what we antecedently desire corrected only for misinformation and procedural irrationalities and if desires differ from person to person there seems to be no basis for assuming that everyone has reason to be moral But the bullet may yet be avoided In the second half of the book Markovits shows how we may do so building on Kant's argument for his formula of humanity to provide an internalist defense of universal moral reasons In doing so she provides a more satisfying answer to the age old question why be moral **The New Aesthetics of Deculturation** Thorsten Botz-Bornstein, 2019-08-22 What are the predominant aesthetics of the twenty first century Thorsten Botz Bornstein argues that deculturation embodied by the conspicuous vulgarity of kitsch is the overriding visual language of our times Drawing on the work of Islam scholar Olivier Roy who argued that religious fundamentalism arises when religion is separated from the indigenous cultural values Botz Bornstein shows that the production of absolute truths through deculturation also exists in contemporary education The neoliberal environment has separated learning from culture by emphasizing standardization and quantified learning outcomes In a globalized environment the idea of culture is no longer available as a referent instead we are taught to rely on the culturally neutral term excellence For Botz Bornstein this is an absolute value similar to the truth of religious fundamentalists Similarly kitsch

is what happens when aesthetic values are separated from cultural contexts Kitsch is aesthetic fundamentalism Kitsch aesthetics are an aesthetics of excellence The consumption of kitsch can be understood as an intrinsically narcissistic impulse reinforced by social media individuals recycling their own selves without being confronted with the culture of the other The existence of self centred alternative truths fake news and conspiracy theories and selfies are linked together in the fundamentalism neoliberalism kitsch pattern Including analysis of the intersections of cute excellent sublime and interesting in contemporary aesthetic culture this is a journey through philosophy psychology and cultural theory redefining a new aesthetics of deculturation

Without Good Reason Edward Stein,1996-01-11 Are humans rational Various experiments performed over the last several decades have been interpreted as showing that humans are irrational we make significant and consistent errors in logical reasoning probabilistic reasoning similarity judgements and risk assessment to name a few areas But can these experiments establish human irrationality or is it a conceptual truth that humans must be rational as various philosophers have argued In this book Edward Stein offers a clear critical account of this debate about rationality in philosophy and cognitive science He discusses concepts of rationality the pictures of rationality that the debate centres on and assesses the empirical evidence used to argue that humans are irrational He concludes that the question of human rationality must be answered not conceptually but empirically using the full resources of an advanced cognitive science Furthermore he extends this conclusion to argue that empirical considerations are also relevant to the theory of knowledge in other words that epistemology should be naturalized

Reason and Relativism Steve Hendley,1991-09-10 Sartre s Critique of Dialectical Reason deals with a problem that continues to dominate both continental and Anglo American thought the historical character of reason and the question of relativism This work deals with the issue of relativism in the context of Sartre s later philosophy and contemporary debates on the social historical character of reason as they emerge principally in the works of Foucault Lyotard Habermas Rorty and Feyerabend

Ethical Issues in Modern Medicine: Contemporary Readings in Bioethics Bonnie Steinbock,Alex John London,John Arras,2012-03-29 **Tillich - Abingdon Notes** Donald W. Musser,Joseph L. Price,2010 Explores Tillich s influence as a groundbreaking thinker who illuminated the boundaries between philosophy and theology

Justificatory Liberalism Gerald F. Gaus,1996-03-14 This book advances a theory of personal public and political justification Drawing on current work in epistemology and cognitive psychology the work develops a theory of personally justified belief Building on this account it advances an account of public justification that is more normative and less populist than that of political liberals Following the social contract theories of Hobbes Locke and Kant the work then argues that citizens have conclusive reason to appoint an umpire to resolve disputes arising from inconclusive public justifications The rule of law liberal democracy and limited judicial review are defended as elements of a publicly justified umpiring procedure

Moral Relativism and Reasons for Action Robert Streiffer,2020-07-20 Originally published in 2003 this book examines moral relativism and the author discusses the main arguments for Appraiser Relativism

and Agent Relativism The final chapter of the book discusses the implication of some recent developments in metaethics and develops a theory of reasons for action based on the way in which an action can be good as an alternative to the desire based agent centred account critiqued in the earlier chapters

Political Reason A. Fives, 2012-11-06 In modern democracies existing moral pluralism conflicts with a commitment to resolve political disputes by way of moral reasoning Given this fact how can there be moral resolutions to political disputes and what type of reasoning is appropriate in the public sphere Fives explores this by closely analysing the work of MacIntyre and Rawls

Philosophical Problems and Arguments James W. Cornman, Keith Lehrer, George Sotiropoulos, 1992-01-01 Widely used by instructors who emphasize the logical structure of philosophical theories and the dialectical play of argument this popular work provides clear reliable and up to date discussions of central philosophical debates The fourth edition incorporates major revisions the first since 1982 and features an extensive change in content Every chapter has been reworked to improve its organization to make it more accessible and engaging to the student and to reflect recent discussions

Reason & the Contours of Faith Richard Rice, 2013-05-17 Can reason and religion get together Should believers think Can thinking people believe Does religion have to make sense Does careful thinking help or hinder religious experience People have wrestled with such questions for hundreds of years and they are just as perplexing today as ever Reason the Contours of Faith explores the wide ranging issues these questions raise from biblical interpretation and proofs for God's existence to the nature of religious conversion Its central purpose is to find an alternative to both fideism the idea that reason has nothing to do with faith and rationalism the conviction that reason has everything to do with it Part One Reason and the Contents of Faith argues that reason contributes in important but limited ways to our understanding of religion Part Two Reason and the Experience of Faith shows that reason can support religious commitment but never produces it

New Essays on Normative Realism, 2025-08-07 It's difficult to explain the point of normative judgments judgments like You ought to donate to charity or You ought to believe that smoking is bad for you given the evidence without assuming that such judgments express objective

truths And yet philosophers have always been puzzled by such a realism about the normative for an array of conceptual epistemological and metaphysical reasons This book gathers together a collection of essays on this classic philosophical problem authored by a mix of senior and junior contributors Taken together they illustrate the great progress that has been made on these fundamental but thorny issues They also introduce some new puzzles about normative realism which had not been previously appreciated The topics covered include the objectivity epistemology and metaphysics of normative judgments the possibility of alternative normative conceptual schemes and the way in which normative issues arise in such disparate areas as arithmetic and aesthetics The volume opens with a substantial Introduction by the editors which provides a contemporary overview of the landscape of issues facing a realism about the normative and situates the authors contributions within it

Kolb, 2018-03-27 Spans the relationships among business ethics and society by including numerous entries that feature broad coverage of corporate social responsibility the obligation of companies to various stakeholder groups the contribution of business to society and culture and the relationship between organizations and the quality of the environment

Business Ethics Wim Dubbink, Willem van der Deijl, 2023-08-28 This textbook not only provides the student with a solid foundation in ethics but introduces students to the most important themes relevant to business today Issues such as human rights violation down in the supply chain the effect business has on nature and the environment and inclusiveness are each discussed in separate chapters which discuss their importance but also their challenges While there are numerous business ethics textbooks few take a philosophical approach to business ethics However without introducing philosophical ethics discussions about business ethics are bound to get stuck in fallacies and paradoxes This textbook therefore fills an important societal gap by providing an introduction to profound philosophical issues in clear language at a philosophically high but accessible level

Educating Reason Harvey Siegel, 2013-09-27 First Published in 1988 The critical thinking movement is increasingly important in the philosophy of education Beginning from the generally accepted view that children should be taught to reason not simply to repeat what they have been told it tries to establish whether it is in fact possible to teach children a set of skills which add up to thinking Siegel here examines three major conceptions of critical thinking and then puts forward his own definition of the critical thinker as one who is appropriately moved by reasons He argues that critical thinking is a fundamental educational ideal and defends the ideal against charges of indoctrination Chapters on science education and minimum competency testing highlight its practical implications for education policy and curriculum This book should be of interest to lecturers and students of education and philosophy
