McDonough,Miriam Reinhard,Thomas Verner Moore,1928 [Logical Abilities in Children: Volume 4](#) Daniel N.

Osherson,2017-08-14 Originally published in 1976 this fourth and final volume in a series that met with critical acclaim is

concerned with a certain kind of answer to the question What distinguishes the concepts that are a natural part of human languages from those that are merely expressible in language The kind of answers contemplated rely on formal properties of the logics that overlay the two sorts of concepts The author presents a substantive theory of natural concepts which helps to make concrete the methodological proposals In order to make the theory more manageable it is restricted to sentential modifiers expressed in English Although these proposals are substantive the methodology they exemplify may be of even more significance Some of the ideas in the author's approach derive from the work of Chomsky and several issues relevant to the growth of logical thinking are also treated with data that speak to questions raised in Volume 3 concerning qualitative change through development This final volume in the series will be essential reading for all concerned with both logical abilities in children their development and novel methodological approaches to research bearing on this and related issues
