Reasoning Ability Of Mildly Retarded Learners:

Reasoning Ability of Mildly Retarded Learners Herbert Goldstein, Marjorie T. Goldstein, 1980-01-01 **Resources in Education** ,1993 **Education and Training of the Mentally Retarded** ,1980 *If this is Social Studies, why Isn't it Boring?* Stephanie Steffey, Wendy J. Hood, 1994 The provocative title of this book plays on a too familiar response from teachers and students alike But now many teachers have begun to seek an approach to social studies that takes account of the ways children learn and that builds on their own knowledge and strengths The authors in this book have found ways to do this Wendy Hood writes in the Introduction that they have not only rediscovered social studies education in general they have also found themselves exploring the many disciplines of the social sciences that combine to make social studies The issues of the disciplines are visible the content of the disciplines is visible and the questions central to each discipline are central in these classrooms While the studies described began in one discipline they branched out or melted into one or more of the others In this contributed collection twenty three teachers explain their successful strategies for teaching the social studies disciplines in a whole language context *If This Is Social Studies* covers contemporary subjects the Gulf War traditional topics students as historians well known projects Scottish Storyline social studies in the community and multicultural matters Teachers at elementary through middle and high school levels will find this book s holistic approach to social studies a refreshing departure and a source of new practical ideas Indeed the diversity of ideas and styles is as broad as the book s subject Dictionary of Mental Handicap Mary P. Lindsey, 2002-03-11 Over recent years the policy of isolating and institutionalizing mentally handicapped people has gradually been dismantled and a major shift to community care has taken place But integration within the general community and access to special services has greatly increased the number of people with a need to know about mental handicap Each profession or discipline has its own terminology nowadays one must be conversant with all of them In this comprehensive dictionary Mary Lindsey has brought together terms and concepts from a wide variety of fields Approximately 2 400 entries are included ranging in length from concise explanations to encyclopaedic essays but always expressed in clear simple language Where appropriate suggestions for further reading are made and possible sources of further information given An extensive system of cross references leads the interested reader further and makes valuable connections between entries The medical aspects of mental handicap its causes prognoses and treatments are of course covered in detail But although the cause of mental handicap may be medical subsequent interventions may be sociological psychological educational medical paramedical or psychiatric This is reflected in the choice of entries making the Dictionary an invaluable source of reference for all those involved with mentally handicapped people in any capacity whatsoever Characteristics of and Strategies for Teaching Students with Mild Disabilities Martin Henley, Roberta S. Ramsey, Robert Algozzine, 1999 This book describes characteristics of mild disabilities in an easy to read and understand format It includes the best teaching practices for inclusion behavior management and classroom instruction

A chapter on parents highlights strategies for enhancing this school family partnership The book merges practical teaching strategies and solutions with the challenges posed by mildly disabled students Includes appendices on the history of special education the side effects of medications and frequently used tests Applicable to teachers and administrators who have students with mild disabilities who are at risk or who are mainstreamed or included in the classroom Learning Disabilities: Issues and Recommendations for Research, 1974 National Institute of Education (U.S.),1974 *Handbook of Research on Science Education* Sandra K. Infants at Risk Richard B. Kearsley, Irving E. Sigel, 2021-09-30 What methodologies within the behavioral sciences have clinical application for the diagnosis and management of high risk and handicapped infants Originally published in 1979 this volume not only deals with this issue but

illustrates the contributions that behavioral science may have offered those called upon to evaluate the cognitive consequences of perinatal high risk factors at the time The inadequacies of some measures used to assess intellectual competence in retardates are juxtaposed with the sophisticated methodologies that may be employed to document early mental abilities Also included are assessment procedures that bypass reliance on neuromotor performance imitation or language production The authors draw attention to the discontinuous nature of cognitive development to the possibility that mental and motor development may proceed independently and to the plasticity of the developing CNS which may overcome early deficits if underlying competences are recognized and exposed to appropriate stimulation Here is a volume that does not simply catalog the nature of the child s accomplishments and deficits but emphasizes the need to examine his potential for learning and offers various methodologies that may be of value in documenting the child s continuing cognitive development This book is a re issue originally published in 1979 The language used is a reflection of its era and no offence is meant by the Publishers to any reader by this re publication *Associations' Publications in Print* ,1984 1981 in 2 v v 1 Subject index v 2 Title index Publisher title index Association name index Acronym index Key to publishers and distributors abbreviations **Teaching Special Students in the Mainstream** Rena B.
