Boys and Their Schooling John Whelen,2011-04-28 This book presents an ethnographic study of the experiences of teenage boys in an Australian high school It follows a group of thirteen to fifteen year olds over a period of more than two years and seeks to understand why so many boys say they hate school yet enjoy being with one another in their daily confrontations with the formal school The study acknowledges the ongoing significance of the boys debate to policy makers and the media and therefore to teachers and parents but moves it on from issues of gender construction and the panic about achievement to the broader question of what it is to experience being schooled as a boy in the new liberal educational environment

Gender in Learning and

Teaching Carol Taylor, Chantal Amade-Escot, Andrea Abbas, 2019-04-30 Gender in Learning and Teaching brings together leading gender and feminist scholars to provide a unique collection of international research into learning and teaching. Through dialogues across national traditions and boundaries the authors provide new insights into the relations between feminist scholarship of pedagogy, gender and didactics and offer in depth accounts that critically investigate how gender relations are enacted, contested and analysed at the level of the classroom, the curriculum and the institution. Drawing on original research, the chapters explore gender dynamics in relation to student-teacher interactions, gendered classroom practices, curriculum content and knowledge formation in different subjects. The book includes accounts of innovative approaches to curriculum development to address gender inequality. It includes new theoretical frameworks and methodological approaches which provide fresh insights into gendered practices including intersectionality, new material feminism, epistemic gender positioning and cultural anthropology. The chapters span all education phases from early years to higher education. This book makes a compelling case for the continuing relevance of feminist pedagogy and the urgent need for strategies to address gender inequalities in the classroom and beyond. It will be of great interest to academics and postgraduate students in the fields of theory, philosophy and feminist politics of learning and teaching, education and didactics, feminism and pedagogy, sociology and the arts. *International Studies in Educational Inequality, Theory and Policy* Richard Teese, Stephen Lamb, Marie Duru-Bellat, 2007-06-03 Inequality is a marked and persistent feature of education systems both in the developed and the developing worlds. Major gaps in opportunity and in outcomes have become more critical than in the past thanks to the knowledge economy and globalization. More and more populations, both rich and poor, depend on successful use of school and on gaining post-school qualifications. But access to high quality schooling, success at school and chances of higher education all remain socially divided with implications for economic opportunities, personal growth and civic and community development. What causes these divisions in how education systems work? Have decades of public investment brought about at least some improvements even if major gaps remain? If not, what are the barriers, the social processes which have frustrated the efforts of government? The pursuit of equity as a goal of public policy is examined in this book through a series of national case studies covering many different global contexts, from the wealthiest to some of the poorest nations on earth. What have we learnt from the policy experience globally? Do we know more today than yesterday about the origins of social inequality? Are our policies better framed, better designed to tackle inequality? And which way forward? What does the evidence suggest in terms of future approaches and emphasis? This work is published in three volumes which together form a 3 volume set. Equality in the Primary School Dave Hill, Leena Helavaara, Robertson, 2011-11-24 Drawing on a wealth of knowledge from a diverse group of contributors, this volume addresses the importance of going beyond equal opportunities. The contributors provide a compelling argument for promoting equality in primary schools.
