REBEL & REFORMER OF AIRWAYS Ronald Edward George Davies, 1987-06-17 Twenty five profiles of airline pioneers
Rebels and Reformers of the Airways Ronald Edward George Davies, 1987-01-01 Beretter om 25 kendte personligheder og foregangsmand inden for den civile luftfart i USA Canada Storbritannien Europa Latinamerika Asien og Australien

Airline Executives and Federal Regulation Walter David Lewis, 2000 This book is a collection of eight case studies of relationships between airline executives and federal regulatory agencies from the passage of the Air Commerce Act in 1926 to the Airline Deregulation Act of 1978 By focusing on the lives and personalities of individual entrepreneurs W David Lewis and his contributors hope to explore the interaction between technology government regulation and entrepreneurship Each essay in the book focuses on a particular airline executive such as Eddie Rickenbacker Robert Six and Donald Nyrop Lewis has been careful to give a variety of perspective Airlines of various types are represented large and small scheduled and unscheduled Some of the executives profiled were known for having adversative relationships with federal regulators whereas others wholeheartedly accepted regulation and thrived under it There have been public calls for a return to airline regulation and Lewis thinks it is not inconceivable that regulation may ultimately return if problems continue and conditions deteriorate further But he says it is well to remember that deregulation occurred because there were flaws in the regulatory system it replaced This collection of essays scholarly and well documented but written in a lively style suitable for specialists and nonspecialists alike provides a long range perspective on the issue of airline deregulation **Over Empires and**

Oceans Robert Bluffield, 2014-11-19 This a story of pioneers intrepid aviators adventurers tycoons and innovators It is also a story of dedication and determination for despite fixed wing aircraft proving their value over the battlefields of the Western Front during the First World War convincing governments and public alike that they had a role in peacetime proved far more challenging The Americans as inventors of heavier than air powered flight had briefly courted with a passenger airline across Tampa Bay in 1914 yet it took a further nine years for mail to be flown coast to coast In 1919 a British company made the first international scheduled flight between London and Paris but the continuation of regular services was thwarted by a less than enthusiastic government that allowed its generously subsidised French competition for a short time at least to fly cross Channel passenger schedules unimpeded The British eventually realized that fast links with their Empire were vital followed the example of the French and Dutch who had forged air links with their cousins in North Africa and the Far East Meanwhile in South America the Germans forbidden under the Versailles Treaty from any major aircraft building were establishing cunning supremacy by forming airlines throughout South America and in China While America awaited a transcontinental passenger service Juan Trippe's Pan American Airways was crossing swords with Ralph O'Neill of New York Rio Buenos Aires Line NYRBA for air supremacy between the US Brazil Argentina and elsewhere in Latin America that led to the formation of arguably the world's greatest airline In Russia Igor Sikorsky had built a vast passenger carrying aircraft the Il ya Muromets

and politicians debated whether giant airships or fixed wing aircraft should rule the skies an issue that was put firmly to bed when the mighty German airship Hindenburg exploded while mooring at Lakehurst in 1937 Robert Bluffield's highly researched and detailed account tells the dramatic stories of explorers such as Kingsford Smith Lindbergh and Cobham and flamboyant entrepreneurs some well known others forgotten who risked fortunes and reputations to follow their dreams of reaching and ruling the skies over empires continents and oceans Against bewildering adversity corruption underhanded deals and dwindling resources these tenacious individuals braved the elements using primitive entirely unsuitable equipment to establish earth shrinking aerial services that criss crossed the great oceans and the globe's most inhospitable territories These are the stories of those pioneers of A ropostale CNAC Air Orient Imperial Airways KLM Deutsche Luft Hansa Pan Am SCADTA The Condor Syndicat Qantas and others that had a far reaching impact on the way the modern world would travel

Rust, 2012-11-20 Americans who now endure the inconveniences of crowded airports packed airplanes and missed connections might not realize that flying was once an elegant exhilarating adventure In this colorful history Daniel L Rust traces the evolution of commercial air travel from the first transcontinental expeditions of the 1920s through the luxurious

airline environments of the 1960s to the more hectic fatiguing experiences of flying in the post 9 11 era In the beginning flying coast to coast was an exciting yet uncomfortable journey of nearly forty eight hours that required numerous stops and overnight travel by train With time and technical innovation passengers became increasingly removed both physically and psychologically from the raw experience of flying Faster planes pressurized cabins onboard amenities and stronger safety precautions made flying more convenient and predictable but also less evocative and sensational Prior to the 1980s Americans dressed for air travel in their formal best and enjoyed such luxurious onboard amenities as delicious meals and ample cabin space What made air travel glamorous however also made it more expensive With deregulation in 1978 cost reductions reduced flying to a more tedious and after 9 11 more regimented experience Rust s narrative brims with firsthand accounts from such celebrities as Will Rogers and from ordinary Americans Enlivened by more than 100 illustrations including vintage brochures posters and photographs Flying Across America reminds today s airline passengers of what they have gained and what they have lost in the transcontinental flying experience The Flight of the Starling Iain

Hutchison,1992 Eric Starling shot to fame landing a two seater bi plane on a Calais street in darkness From this inauspicious start he became one of that select breed who pioneered commercial flying in Scotland This is his story **Department of the Interior and Related Agencies Appropriations for 1989: Justification of the budget estimates, Department of Energy** United States.
