Recent English Architecture 1920 194:

English Homes: Period IV, v. 1: Late Stuart, 1649- 1714. 1920 Henry Avray Tipping, 1926 **The Subject Index to Periodicals** ,1920 *Subject Index of the Modern Books Acquired by the British Museum in the Years ...* ,1927 A Chronology of Western Architecture Doreen Yarwood, 2010-01-01 Accessible to casual and serious readers alike this comprehensive survey ranges from 2000 BC to the 1980s and features more than 1 000 chronologically arranged photographs and drawings Each of the 105 two page spreads represents a specific era and includes comments on architectural details and historical events of the period *Subject Index of the Modern Works Added to the British Museum Library* British Museum. Department of Printed Books, 1927 **194X** Andrew Michael Shanken, 2009 During the Second World War American architecture was in a state of crisis The rationing of building materials and restrictions on nonmilitary construction continued the privations that the profession had endured during the Great Depression At the same time the dramatic events of the 1930s and 1940s led many architects to believe that their profession and society itself would undergo a profound shift once the war ended with private commissions giving way to centrally planned projects The magazine Architectural Forum coined the term 194X to encapsulate this wartime vision of postwar architecture and urbanism In a major study of American architecture during World War II Andrew M Shanken focuses on the culture of anticipation that arose in this period as out of work architects turned their energies from the built to the unbuilt redefining themselves as planners and creating original designs to excite the public about postwar architecture Shanken recasts the wartime era as a crucible for the intermingling of modernist architecture and consumer culture Challenging the pervasive idea that corporate capitalism corrupted the idealism of modernist architecture in the postwar era 194X shows instead that architecture s wartime partnership with corporate American was founded on shared anxieties and ideals Business and architecture were brought together in innovative ways as shown by Shanken s persuasive reading of magazine advertisements for Revere Copper and Brass U S Gypsum General Electric and other companies that prominently featured the work of leading progressive architects including Louis I Kahn Eero Saarinen and Walter Gropius Although the unexpected prosperity of the postwar era made the architecture of 194X obsolete before it could be built and led to its exclusion from the story of twentieth century American architecture Shanken makes clear that its anticipatory rhetoric and designs played a crucial role in the widespread acceptance **Catalog of the Avery Memorial Architectural Library of Columbia University** Avery Library, 1968 Italian Imprints on Twentieth-Century Architecture Denise Costanzo, Andrew Leach, 2022-05-19 Italian architecture has long exerted a special influence on the evolution of architectural ideas elsewhere from the Beaux Arts academy s veneration of Rome to modernist and postmodern interest in Renaissance proportion Baroque space and Mannerist ambiguity This book critically examines this enduring phenomenon exploring the privileged position of Italian architects architecture and cities in the architectural culture of the past century Questioning the deep rooted myth of Italy

within architectural history the book presents case studies of Italy's powerful yet problematic position in 20th century architectural ideologies at a time when established Eurocentric narratives are rightly being challenged. It reconciles the privileged position of Italian architecture and design with the imperative to write history across a more global, diverse, heterogeneous cultural geography. Twenty chapters from distinguished international scholars cover subjects and architects ranging from Alberti to Gio Ponti, Aldo Rossi, Manfredo Tafuri, Vittorio Gregotti, cities from Rome and Venice to Milan, and an array of international architects' movements and architectural ideas influenced by Italy. The chapters each question where, how, and why the disciplinary edifice of 20th century architecture, its canon of built, visual, textual, and conceptual works, relied on Italian foundations, examining where and how those foundations have become insecure. Indispensable for students and scholars of both Italian and global architectural history, *Italian Imprints on Twentieth Century Architecture* provides an opportunity to consider the architectural and urban landscape of Italy from substantially new points of view. **Directory of British Architects, 1834-1914** Antonia Brodie, British Architectural Library, Royal Institute of British Architects, 2001-12-20. A comprehensive biographical directory of some 11 000 British architects who worked between 1834 and 1914. **Subject Index of Modern Books Acquired 1881/1900-** British Museum. Department of Printed Books, 1927. Albany Architecture Diana S. Waite, 1993. **A History of All Nations: General index**, 1902. Architects and Engineers Roland May, 2022-10-24. In the first decades of the 20th century civil engineers were widely seen as a role model for future architects. Their role within the contemporary architecture movements, however, was hardly discussed. To this day even fundamental questions about collaborations, rivalries, or conflicts between the two sister disciplines still await answers. This volume brings together contributions by international scholars on the cooperation between architects and civil engineers in various countries in the interwar period. By offering both insights into national peculiarities and new reflections on the general nature, character, and significance of such joint efforts, it opens exciting new perspectives on the modern building culture of Europe and beyond. Dictionary Of British And Irish Botanists And Horticulturalists Including plant collectors, flower painters and garden designers Ray Desmond, 2020-12-23. Over the past four centuries botanists and gardeners in the British Isles have gathered, maintained, and propagated many varying species of plants. Their work has been documented in innumerable books and articles which are often difficult to trace. The Dictionary of British and Irish Botanists and Horticulturalists represents a time-saving reference source for those who wish to discover more about the lives and achievements of the horticulturalists listed. The dictionary's utility comes not only from indicating the major publications of the named authors but also the location of their herbaria and manuscripts. The previous 1977 edition of the Dictionary has for many years been a much-used source of information for botanists, botanic artists, and archivists. In this revised edition the scope has been expanded to include among its 13 000 entries flower painters in addition to botanical artists, over 1400 entries, and for the first time garden designers. Finally, the Dictionary should have international appeal since so many

botanists and gardeners worked on collective plants overseas in particular in North America and the British Commonwealth Each entry gives wherever possible details of dates and places of birth and death educational qualifications professional posts honours and awards publications location of plant collections manuscripts drawings and portraits Its main function however is to provide further biographical references to books and periodicals Comprehensive classified indices facilitate access by professions and activities countries and plant interests *Paradise Planned* Robert A.M. Stern,David

Fishman,Jacob Tilove,2013-12-03 *Paradise Planned* is the definitive history of the development of the garden suburb a phenomenon that originated in England in the late eighteenth century was quickly adopted in the United State and northern Europe and gradually proliferated throughout the world These bucolic settings offered an ideal lifestyle typically outside the city but accessible by streetcar train and automobile Today the principles of the garden city movement are once again in play as retrofitting the suburbs has become a central issue in planning Strategies are emerging that reflect the goals of garden suburbs in creating metropolitan communities that embrace both the intensity of the city and the tranquility of nature *Paradise Planned* is the comprehensive encyclopedic record of this movement a vital contribution to architectural and planning history and an essential recourse for guiding the repair of the American townscape **Municipal Reference**

Library Notes ,1922 Notes ,1922 *Bibliography of Art and Architecture in the Islamic World (2 vols.)* Susan Sinclair,2012-04-03 Following the tradition and style of the acclaimed Index Islamicus the editors have created this new Bibliography of Art and Architecture in the Islamic World The editors have surveyed and annotated a wide range of books and articles from collected volumes and journals published in all European languages except Turkish between 1906 and 2011 This comprehensive bibliography is an indispensable tool for everyone involved in the study of material culture in Muslim societies **Architectural Publications Index** ,2001 **Experiencing Architecture in the Nineteenth Century**

Edward Gillin,H. Horatio Joyce,2018-10-18 Bringing together fourteen original essays this collection opens up new perspectives on the architectural history of the nineteenth century by examining the buildings of the period through the lens of experience With a focus on the experience of the ordinary building user rather than simply on the intentions of the designer the book shows that new and important insights can be brought to our understanding of Victorian architecture The chapters present a range of ideas and new research some examining individual building case studies from grand hotels and clubhouses in New York to the parliament buildings of Westminster and others exploring conceptual questions about the nature of architectural experience whether sensory or otherwise Yet they share the premise that the idea of the experience of architecture took on a new and particular significance with the rise of industrial modernity and they examine what contemporary people both architects and non architects understood by this idea The insights in this volume extend beyond the study of Victorian architecture Together they suggest how experience might be used as a framework to produce a more convincingly historical account of the artefacts of architectural history
