## **Renewal Of Generosity Illness Medicine And How To Live:**

The Renewal of Generosity Arthur W. Frank, 2004-05-01 Contemporary health care often lacks generosity of spirit even when treatment is most efficient Too many patients are left unhappy with how they are treated and too many medical professionals feel estranged from the calling that drew them to medicine Arthur W Frank tells the stories of ill people doctors and nurses who are restoring generosity to medicine generosity toward others and to themselves The Renewal of Generosity evokes medicine as the face to face encounter that comes before and after diagnostics pharmaceuticals and surgeries Frank calls upon the Roman emperor Marcus Aurelius philosopher Emmanuel Levinas and literary critic Mikhail Bakhtin to reflect on stories of ill people doctors and nurses who transform demoralized medicine into caring relationships He presents their stories as a source of consolation for both ill and professional alike and as an impetus to changing medical systems Frank shows how generosity is being renewed through dialogue that is more than the exchange of information Dialogue is an ethic and an ideal for people on both sides of the medical encounter who want to offer more to those they meet and who want their own lives enriched in the process The Renewal of Generosity views illness and medical work with grace and compassion making an invaluable contribution to expanding our vision of suffering and healing *Partners in Palliative Care* Mary Beth Morrissey, Bruce Jennings, 2013-10-31 The Collaborative for Palliative Care Collaborative is a grassroots consortium of public and private organizations that came together in 2005 for the purposes of studying the increasing need for palliative care and the methods for such care It has grown from a small fledgling group to a membership of over 50 community based organizations and volunteers dedicated to improving care of the seriously ill through education research and advocacy The Collaborative bridges policy research and practice in its initiatives and vision for the future Partners in Palliative Care examines specific areas of concern that the Collaborative has addressed in its education programs and advocacy as well as the collaborative processes that have been so successful in building community assets Areas of concentration have been diverse and include advance care planning relational communication paradigms community capacity building the role of culture and spirituality in palliative care the meaning of pain and suffering for seriously ill individuals and the ethics of health care costs in palliative and end of life systems of care This book was originally published as a special issue of the Journal of Social Work in End of Life and Palliative Care *Medical Humanities, Sociology and the Suffering Self* Wendy Lowe, 2020-12-22 Following criticisms of the traditionally polarized view of understanding suffering through either medicine or social justice Lowe makes a compelling argument for how the medical humanities can help to go beyond the traditional biographical and epistemic breaks to see into the nature and properties of suffering and what is at stake Lowe demonstrates through analysis of major healthcare workforce issues and incidence of burnout how key policies and practices influence healthcare education and experiences of both patients and health professionals By including first person narratives from health professionals as a tool and resource she illustrates how dominant ideas about the self enter practice as a refusal of

suffering Demonstrating the relationship between personal experience theory and research Lowe argues for a pedagogy of suffering that shows how the moral anguish implicit in suffering is an ethical response of the emergent self This is an important read for all those interested in medical humanities health professional education person centred care and the sociology of health and illness

**Inside Chronic Pain** Lous Heshusius, 2013-09-15 Chronic pain which affects 70 million people in the United States alone more than diabetes cancer and heart disease combined is a major public health issue that remains poorly understood both within the health care system and by those closest to the people it afflicts This book examines the experience of pain in ways that could significantly improve how patients and practitioners deal with pain It is the first volume of a new collection of titles within the acclaimed Culture and Politics of Health Care Work series called How Patients Think intended to give voice to the concerns of patients about their own medical care and the formulation of health policy Since surviving a near fatal car accident Lous Heshusius has suffered from chronic pain for more than a decade forcing her to give up her career as a professor of education Inside Chronic Pain based in part on the pain journal Heshusius keeps is a stunning memoir of a life lived in constant pain as well as an insightful and often critical account of the inadequacies of the health care system from physicians to hospitals and health insurance companies to understand chronic pain and treat those who suffer from it Through her own frequently frustrating experiences she shows how health care providers often ignore deny or incorrectly treat chronic pain at immense cost to both the patient and the health care system She also offers cogent suggestions on improving the quality and outcome of chronic pain care and management using her encounters with exceptional medical professionals as models Inside Chronic Pain deals with pain s dramatic and destructive effects on one s sense of self and identity It chronicles the chaos that takes place the paralyzing effect of severe pain the changes in personality that ensue and the corrosive effects of severe pain on the ability to attend to day to day tasks It describes how one s social life falls apart and isolation takes over It also relates moments of happiness and beauty and describes how rooting the self in the present is crucial in managing pain A unique feature of Inside Chronic Pain is the clinical commentary by Dr Scott M Fishman president of the American Pain Foundation Fishman has long tried to improve the lives of patients like Heshusius His medical perspective on her very human narrative will help physicians and other clinicians better understand and treat patients with chronic pain

*Immortality and the Philosophy of Death* Michael Cholbi, 2015-12-02 Death comes for us all eventually Philosophers have long been perplexed by how we ought to feel about death Many people fear death and believe that death is bad for the person who dies But is death bad for us and if so how is its badness best explained If we do not survive death if death is simply a state of nothingness how can death be bad for us If death is bad for us do we have good reason to live as long as possible Would an immortal life really be a good human life or would even an immortal life eventually become tedious and make us long for mortality This volume presents fourteen philosophical essays that examine our attitudes toward mortality and immortality The topics addressed have become more

urgent as scientists attempt to extend the human lifespan perhaps even indefinitely This book invites the reader to critically appraise his or her own attitudes toward death and immortality by exploring the ethical metaphysical and psychological complexities associated with these issues     *Laboring On* Wendy Simonds, Barbara Katz Rothman, Bari Meltzer

Norman, 2013-10-23 Facing the polar forces of an epidemic of Cesarean sections and epidurals and home like labor rooms American birth is in transition Caught between the most extreme medicalization best seen in a Cesarean section rate of nearly 30 percent and a rhetoric of women's choices and the natural women and their midwives doulas obstetricians and nurses labor on *Laboring On* offers the voices of all of these practitioners all women trying to help women as they struggle with this increasingly split vision of birth Updating Barbara Katz Rothman's now classic *In Labor* the first feminist sociological analysis of birth in the United States *Laboring On* gives a comprehensive picture of the ever changing American birth practices and often conflicting visions of birth practitioners The authors deftly weave compelling accounts of birth work by midwives doulas obstetricians and nurses into the larger sociohistorical context of health care practices and activism and offer provocative arguments about the current state of affairs and the future of birth in America     **Emerging Perspectives**

**Compassion in Healthcare** Joshua Hordern, 2020-10-30 Compassion in Healthcare gives an account of the nature and content of compassion and its role in healthcare While compassion appears to be a straightforward aspect of life and practice Hordern s analysis shows that it is plagued by both conceptual and practical ills and stands in need of some quite specific

kinds of therapy Starting from a diagnosis of what precisely is wrong with compassion its debilitating political entanglements the vagueness of its meaning and the risk of burnout it threatens three therapies are prescribed for these ills an understanding of patients and healthcare workers as those who pass through the life course encountering each other as wayfarers and pilgrims a grasp of the nature of compassion in healthcare and an embedding of healthcare within the realities of civic life Applying these therapeutic strategies uncovers how compassionate relationships acquire their content in healthcare practice The form that compassion takes is shown to depend on how doctrines of time tragedy salvation responsibility fault and theodicy make a difference to the quality of people s lives and relationships Drawing on the author s real world collaborations the way in which compassion matters to practice and policy is worked out in the detail of healthcare professionalism marketization and technology Covering everything from conception to old age and from machine learning to religious diversity Compassion in Healthcare draws on philosophy theology and everyday experience to expand our understanding of what compassion means for healthcare practice      The Future of Bioethics Howard Brody, 2009-02-25 Bioethics born in the 1960s and 1970s has achieved great success but also has experienced recent growing pains as illustrated by the case of Terri Schiavo In The Future of Bioethics Howard Brody a physician and scholar who dates his entry into the field in 1972 sifts through the various issues that bioethics is now addressing and some that it is largely ignoring to chart a course for the future Traditional bioethical concerns such as medical care at the end of life and research on human subjects will continue to demand attention Brody chooses to focus instead on less obvious issues that will promise to stimulate new ways of thinking He argues for a bioethics grounded in interdisciplinary medical humanities including literature history religion and the social sciences Drawing on his previous work Brody argues that most of the issues concerned involve power disparities Bioethics response ought to combine new concepts that take power relationships seriously with new practical activities that give those now lacking power a greater voice A chapter on community dialogue outlines a role for the general public in bioethics deliberations Lessons about power initially learned from feminist bioethics need to be expanded into new areas cross cultural racial and ethnic and global and environmental issues as well as the concerns of persons with disabilities Bioethics has neglected important ethical controversies that are most often discussed in primary care such as patient centered care evidence based medicine and pay for performance Brody concludes by considering the tension between bioethics as contemplative scholarship and bioethics as activism He urges a more activist approach insisting that activism need not cause a premature end to ongoing conversations among bioethicists defending widely divergent views and theories      The Inner World of Medical Students Johanna Shapiro, 2009 A passerby may marvel And admire my molded form My every branch and twig and leaf Has learned how to conform Why are some medical students drawn to creative writing What issues does this writing address and what needs fears and experiences does it give expression to What can we learn about the future generation of physicians from examining their writing Until now no systematic

examination of the links between medical education the students their poetry and the meanings that can be gleaned from these writings has been published In this comprehensive clearly argued book Shapiro explores contemporary academic thought on the topic and offers new insights on the medical education system It is a critical appraisal which independently explores the positive and negative aspects of medical culture student life socialisation and learning through the unique expressive medium of medical student poetry It sheds light on issues such as patient relationships that have become obscured over time and offers fresh insight on fundamental universal concerns such as mortality suffering acceptance and identity This book provides a practical comprehensive analysis of medical student poetry and is an invaluable resource for medical educators those with an interest in the medical humanities and medical students themselves
