Renormalization and 3-Manifolds Which Fiber over the Circle Curtis T. McMullen,2014-09-08 Many parallels between complex dynamics and hyperbolic geometry have emerged in the past decade Building on work of Sullivan and Thurston this book gives a unified treatment of the construction of fixed points for renormalization and the construction of hyperbolic 3 manifolds fibering over the circle Both subjects are studied via geometric limits and rigidity This approach shows open hyperbolic manifolds are inflexible and yields quantitative counterparts to Mostow rigidity In complex dynamics it motivates the construction of towers of quadratic like maps and leads to a quantitative proof of convergence of renormalization

Topology and Geometry of Manifolds Gordana Matic,Clint McCrory,2003 Since 1961 the Georgia Topology Conference has been held every eight years to discuss the newest developments in topology The goals of the conference are to disseminate new and important results and to encourage interaction among topologists who are in different stages of their careers Invited speakers are encouraged to aim their talks to a broad audience and several talks are organized to introduce graduate students to topics of current interest Each conference results in high quality surveys new research and lists of unsolved problems some of which are then formally published Continuing in this 40 year tradition the AMS presents this volume of articles and problem lists from the 2001 conference Topics covered include symplectic and contact topology foliations and laminations and invariants of manifolds and knots Articles of particular interest include John Etnyre s Introductory Lectures on Contact Geometry which is a beautiful expository paper that explains the background and setting for many of the other papers This is an excellent introduction to the subject for graduate students in neighboring fields Etnyre and Lenhard Ng s Problems in Low Dimensional Contact Topology and Danny Calegari s extensive paper Problems in Foliations and Laminations of 3 Manifolds are carefully selected problems in keeping with the tradition of the conference They were compiled by Etnyre and Ng and by Calegari with the input of many who were present This book provides material of current interest to graduate students and research mathematicians interested in the geometry and topology of manifolds

Kleinian Groups and Hyperbolic 3-Manifolds Y. Komori,V. Markovic,C. Series,2003-11-10 The subject of Kleinian groups and hyperbolic 3 manifolds is currently undergoing explosively fast development with many old problems and conjectures close to resolution This volume proceedings of the Warwick workshop in September 2001 contains expositions of many of these breakthroughs including Minsky s lectures on the first half of the proof of the Ending Lamination Conjecture the Bers Density Conjecture by Brock and Bromberg the Tameness Conjecture by Kleineidam and Souto the state of the art in cone manifolds by Hodgson and Kerckhoff and the counter example to Thurston s K 2 conjecture by Epstein Marden and Markovic It also contains J rgensen s famous paper On pairs of once punctured tori in print for the first time The excellent collection of papers here will appeal to graduate students who will find much here to inspire them and established researchers who will find this valuable as a snapshot of current research **New Research on Three-manifolds and**

Mathematics Samuel F. Neilson,2006 Mathematics has been behind many of humanity s most significant advances in fields as varied as genome sequencing medical science space exploration and computer technology But those breakthroughs were yesterday Where will mathematicians lead us tomorrow and can we help shape that destiny This book assembles carefully selected articles highlighting and explaining cutting edge research and scholarship in mathematics with an emphasis on three manifolds   The Hyperbolization Theorem for Fibered 3-Manifolds Jean-Pierre Otal,2001 For graduate students familiar with low dimensional topology and researchers in geometry and topology Otal CNRS UMR 128 Lyon offers a complete proof of Thurston s hyperbolization theorem for 3 manifolds that fiber as surface bundles The original Le Theoreme d Hyperbolisation pour les Varietes de Dimension 3 published by the French Mathematical Society in 1996 has been translated by Leslie D Kay c Book News Inc   *Collected Works of William P. Hyperbolic Manifolds Albert Marden,2016-02 This study of hyperbolic geometry has both pedagogy and research in mind and includes exercises and further reading for each chapter   *In the Tradition of Thurston* Ken'ichi Ohshika,Athanase Papadopoulos,2020-12-07 This book consists of 16 surveys on Thurston s work and its later development The authors are mathematicians who were strongly influenced by Thurston s publications and ideas The subjects discussed include among others knot theory the topology of 3 manifolds circle packings complex projective structures hyperbolic geometry Kleinian groups foliations mapping class groups Teichm ller theory anti de Sitter geometry and co Minkowski geometry The book is addressed to researchers and students who want to learn about Thurston s wide ranging mathematical ideas and their impact At the same time it is a tribute to Thurston one of the greatest geometers of all time whose work extended over many fields in mathematics and who had a unique way of perceiving forms and patterns and of communicating and writing mathematics

Lipa's Legacy Józef Dodziuk,Linda Keen,1997 The mathematical works of Lars Ahlfors and Lipman Bers are fundamental and lasting They have influenced and altered the development of twentieth century mathematics The personalities of these two scientists helped create a mathematical family and have had a permanent positive effect on a whole generation of mathematicians Their mathematical heritage continues to lead succeeding generations In the fall of 1994 one year after Bers death some members of this family decided to inaugurate a series of conferences The Bers Colloquium to be held every three years The theme was to be a topic in the Ahlfors Bers mathematical tradition broadly interpreted Ahlfors died a year after the first colloquium future colloquia in this series will be called The Ahlfors Bers Colloquium The first colloquium was held in October 1995 at the Graduate Center CUNY in New York It coincided roughly with the second anniversary of Ber s death There were six lectures and much informal mathematical discussion This volume contains papers by the speakers and many of the participants The broad range of papers indicate how strong and far reaching Ber s influence has been The topics represented in the book include Teichmuller theory Kleinian groups higher dimensional hyperbolic geometry geometry of numbers circle packings theory of discrete groups classical complex function theory one dimensional dynamics fluid dynamics quasiconformal mappings in higher dimensions partial differential equations and classical algebraic geometry partial *Conformal Geometry of Discrete Groups and Manifolds* Boris N.
