**The Book of Politics** Michael Dutton, 2024-07-05 In *The Book of Politics* Michael Dutton offers an affective theorization of the political and a political theorization of affect Drawing on Western and Chinese social theory and practice Dutton rethinks Carl Schmitt's insistence that the political can be thought of only within the antagonistic pairing of friend and enemy Dutton shows how the power of the friend enemy binary must be understood by conceptualizing the political as the channeling harnessing and transforming of affective energy flows in relation to that binary Given this affective nature of politics Dutton contends that to rethink the political means moving away from a political science toward an art of the political Such an art highlights fluidity and pulls away from Eurocentric political theory requiring a conceptualization of the political as global He juxtaposes ancient Chinese cosmology medicine and Maoism against the monuments of early capitalist modernity such as the Crystal Palace and the Eiffel Tower to highlight the differences in political investments and intensities From the Chinese revolution to the global rise of right wing movements Dutton rethinks politics in the contemporary world

**Heritage and Debt** David Joselit,2020-03-10 How global contemporary art reanimates the past as a resource for the present combating modern art s legacy of Eurocentrism If European modernism was premised on the new on surpassing the past often by assigning it to the traditional societies of the Global South global contemporary art reanimates the past as a resource for the present In this account of what globalization means for contemporary art David Joselit argues that the creative use of tradition by artists from around the world serves as a means of combatting modern art s legacy of Eurocentrism Modernism claimed to live in the future and relegated the rest of the world to the past Global contemporary art shatters this myth by reactivating various forms of heritage from literati ink painting in China to Aboriginal painting in Australia in order to propose new and different futures Joselit analyzes not only how heritage becomes contemporary through the practice of individual artists but also how a cultural infrastructure of museums biennials and art fairs worldwide has emerged as a means of generating economic value attracting capital and tourist dollars Joselit traces three distinct forms of modernism that developed outside the West in opposition to Euro American modernism postcolonial socialist realism and the underground He argues that these modern genealogies are synchronized with one another and with Western modernism to produce global contemporary art Joselit discusses curation and what he terms the curatorial episteme which through its acts of framing or curating can become a means of recalibrating hierarchies of knowledge and can contribute to the dual projects of decolonization and deimperialization

Chinese Revolution in Practice Guo Wu, 2023-10-24 This book employs multiple case studies to explore how the Chinese communist revolution began as an ideology oriented intellectual movement aimed at improving society before China's transformation into a state that suppresses dissenting voices by outsourcing its power of coercion and incarceration The author examines the movement's methods of early self organization grass roots level engagement creation of new modes of expression and popular art forms manipulation of collective memory and invention of innovative ways of mass incarceration Covering developments from 1920 to 1970 the book considers a wide range of Chinese individuals and groups from early Marxists to political prisoners in the PRC to illustrate a dynamic interactive process in which the state and individuals contend with each other It argues that revolutionary practices in modern China have created a regime that can be conceptualized as an ideology military propaganda state that prompts further reflection on the relationships between revolution and the state the state and collective articulation and memory and the state and reflective individuals in a global context Illustrating the continuity of the Chinese revolution and past decades socialist practices and mechanisms this study is an ideal resource for scholars of Chinese history politics and twentieth century revolutions

The Art of Return James Meyer, 2019-09-11 More than any other decade the sixties capture our collective cultural imagination And while many Americans can immediately imagine the sound of Martin Luther King Jr declaring I have a dream or envision hippies placing flowers in gun barrels the revolutionary sixties resonates around the world China's communist government inaugurated a new cultural era African nations won independence from colonial rule and students across Europe took to the streets calling for an end to capitalism imperialism and the Vietnam War In this innovative work James Meyer turns to art criticism theory memoir and fiction to examine the fascination with the long sixties and contemporary expressions of these cultural memories across the globe Meyer draws on a diverse range of cultural objects that reimagine this revolutionary era stretching from the

1950s to the 1970s including reenactments of civil rights antiwar and feminist marches paintings sculptures photographs novels and films Many of these works were created by artists and writers born during the long Sixties who were driven to understand a monumental era that they missed These cases show us that the past becomes significant only in relation to our present and our remembered history never perfectly replicates time past This Meyer argues is precisely what makes our contemporary attachment to the past so important it provides us a critical opportunity to examine our own relationship to history memory and nostalgia *Rent Collection Courtyard* ,1970 **A History of Contemporary Chinese Art** Yan Zhou,2020-07-14 Chinese art has experienced its most profound metamorphosis since the early 1950s transforming from humble realism to socialist realism from revolutionary art to critical realism then avant garde movement and globalized Chinese art With a hybrid mix of Chinese philosophy imported but revised Marxist ideology and western humanities Chinese artists have created an alternative approach after a great ideological and aesthetic transition in the 1980s toward its own contemporaneity though interacting and intertwining with the art of rest of the world This book will investigate from the perspective of an activist critic and historian who grew up prior to and participated in the great transition and then researched and taught the subject the evolution of Chinese art in modern and contemporary times The volume will be a comprehensive and insightful history of the one of the most sophisticated and unparalleled artistic and cultural phenomena in the modern world
