Lyon,Mariko A. Francombe,Terry A. Hasdell,2012-12-06 Sensory analysis is not new to the food industry but its application as a basic tool in food product development and quality control has not been given the recognition and acceptance it deserves This we believe is largely due to the lack of understanding about what sensory analysis can offer in product research development and marketing and a fear that the discipline is too scientific to be practical To some extent sensory scientists have perpetuated this fear with a failure to recognize the constraints of industry in implementing sensory testing procedures These guidelines are an attempt to redress the balance Of course product tasting is carried out in every food company it may be the morning tasting session by the managing director competitor comparisons by the marketers tasting by a product expert giving a quality opinion comparison of new recipes from the product development kitchen or on line checking during production Most relevant though is that the people responsible for the tasting session should know why the work is being done and fully realize that if it is not done well then the results and conclusions drawn and their implications are likely to be misleading If through the production of these guidelines we have influenced some people sufficiently for them to re evaluate what they are doing and why we believe our efforts have been worthwhile **A Guide to Evidence-Based Group Work** Mark J. Macgowan,2008-02-12 This is the first textbook that illustrates step by step how to practice evidence based group work As group workers are increasingly being held accountable to evaluate monitor and improve their practice there are scant resources available that apply specifically to their practice General books on evidence based practice lack the rich material on group work organized for the first time in this one volume Designed specifically as a supplement for undergraduate and graduate group work courses the text is organized around the process and philosophy of evidence based practice formulating appropriate practice questions searching for evidence critically reviewing available evidence applying the evidence with judgment skill and concern for the group members and evaluating the outcomes achieved The evidence based group work framework teaches students how to skillfully apply best practices through practical learning activities case examples research designs step by step guidelines and checklists assessment tips and detailed instructions for formulating questions and evaluating answers It will be equally valuable as a handy reference for professionals eager to hone their practice skills **Understanding and Deploying LDAP Directory Services** Tim Howes,Mark Smith,Gordon S. Good,2003 Lightweight Directory Access Protocol LDAP is the standard for directory information access and is the underlying protocol for a variety of email systems Web systems and enterprise

applications LDAP enables central management of users groups devices and other data thereby simplifying directory management and reducing the total cost of ownership Understanding and Deploying LDAP Directory Services written by the creators of the protocol is known as the LDAP bible and is the classic text for learning about LDAP and how to utilize it effectively The Second Edition builds on this success by acting as an exhaustive resource for designing deploying and maintaining LDAP directory services Topics such as implementation pitfalls establishing and maintaining user access to information troubleshooting and real world scenarios will be thoroughly explored

Dental Ceramics Ulrich Lohbauer, Renan Belli, 2022-07-01 This book is an evidence based update on recent most significant advances in dental ceramics specifically related to the relationships between composition microstructure and mechanical behavior Readers will find an introduction to the chemistry of dental ceramics as well as information about the technological progress and practical requirements restorative materials need to satisfy for long lasting structural integrity The book uses mechanistic approaches to address failure mechanisms from controlled experiments thus providing the tools for the application of sound research methodologies in the field It is targeted for researcher and dentists interested in the field of dental ceramic materials and fracture mechanics

Product/Process Fingerprint in Micro Manufacturing Guido Tosello, 2019-05-31 The continuous miniaturization of products and the growing complexity of their embedded multifunctionalities necessitates continuous research and development efforts regarding micro components and related micro manufacturing technologies Highly miniaturized systems manufactured using a wide variety of materials have found application in key technological fields such as healthcare devices micro implants mobility communications optics and micro electromechanical systems Innovations

required for the high precision manufacturing of micro components can specifically be achieved through optimizations using post process i.e. offline and in process i.e. online metrology of both process input and output parameters as well as geometrical features of the produced micro parts. However, it is of critical importance to reduce the metrology and optimization efforts since process and product quality control can represent a significant portion of the total production time in micro manufacturing. To solve this fundamental challenge, research efforts have been undertaken in order to define, investigate, implement, and validate the so-called product process manufacturing fingerprint concept. The product manufacturing fingerprint concept refers to those unique dimensional outcomes, e.g., surface topography, form error, critical dimensions, etc., on the produced component that, if kept under control and within specifications, ensure that the entire micro component complies to its specifications. The process manufacturing fingerprint is a specific process parameter or feature to be monitored and controlled in order to maintain the manufacture of products within the specified tolerances. By integrating both product and process manufacturing fingerprint concepts, the metrology and optimization efforts are highly reduced. Therefore, the quality of the micro products increases with an obvious improvement in production yield. Accordingly, this Special Issue seeks to showcase research papers, short communications, and review articles that focus on novel methodological developments and applications in micro and sub-micro scale manufacturing process monitoring and control as well as micro and sub-micro product quality assurance. Focus will be on micro manufacturing process chains and their micro product process fingerprint towards full process optimization and zero defect micro manufacturing.

Behavioral Finance: Beyond The Basics Itzhak Venezia, Rachel Calipha, 2024-10-08. This is the fourth volume of edited books constituting an eclectic collection of papers in behavioral finance based on contributions by participants of Israel Behavior Finance conferences. Like its predecessors, this book continues to be edited by Professor Itzhak Venezia; this book with Dr. Rachel Calipha, who carefully selected the papers to be included in this volume. Behavioral finance has evolved significantly since its inception, and chapters in this collection reflect the diverse and dynamic nature of this field. They not only build upon the foundational concepts established in the earlier volumes but also explore novel financial products, themes, and ideas that have gained rapid prominence in recent years. From the integration of artificial intelligence into investment decision-making processes to the analysis of the alternative meats industry and various other alternative investment instruments such as NFTs (Non-Fungible Tokens), this collection therefore pushes the boundaries of what is conventionally associated with behavioral finance.
