Reporting And Referring Child And Adolescent Research Participants A Special Issue Of Ethics Behavior:

Ethical Issues in Mental Health Research With Children and Adolescents Kimberly Hoagwood, Peter S.

Jensen, Celia B. Fisher, 2014-06-03 Studies involving children with mental emotional or behavioral problems or their families have to meet certain standards of research ethics This book contains chapters on the kinds of ethical dilemmas that typically occur in different types of studies of children and then presents 65 real world cases from experts who study children's mental health These experts offer practical suggestions for how to handle these dilemmas Chapters on the perspectives of parents regulators and bioethicists provide additional points of view on these issues Written in down to earth language this book will be useful for professionals who study children for those who train students in research methods and for parents who are thinking about participating in research studies In attempting to bridge the apparent gap between ethics and science the editors close this volume on a note commonly sounded by researchers more research is needed Yet in this area a new kind of research is required The science of scientific ethics must be developed and expanded and better understanding of the determinants and circumstances under which children can comprehend and evaluate risks and benefits is needed Likewise fuller knowledge of the contextual factors affecting children's and families consent to participate in research is essential In particular development of scales to assess children's ability to comprehend risk benefit issues studies of families reactions to research procedures and empirical data on the impact of various forms of participant reimbursement will advance both science and ethics This volume should spur further research serving as a guide for current investigators participating families institutional review boards and policymakers who shape the research enterprise

project *The SAGE Handbook of Child Research* Gary B Melton, Asher Ben-Arieh, Judith Cashmore, Gail S. Goodman, Natalie K. Worley, 2013-12-18 It is refreshing to see a book such as this which is both broad in its conceptualization of the field of child research and deep in its focus The volume's editors are paragons of awareness when it comes to the need for interdisciplinary research and theory to illuminate the lives and experience of children James Garbarino Loyola University Chicago Covers a satisfying and unprecedentedly wide range of research relating to childhood The contributors include many eminent international scholars of childhood making the book a valuable resource for child researchers Child advocates will also find the book to be invaluable in their efforts to improve children's well being and to change policies and practices for the better Anne Smith University of Otago A really scintillating collection that will provide a lasting perspective on child studies stimulating and comprehensive Jonathan Bradshaw University of York In keeping with global changes in children's social and legal status this Handbook includes examination of children as family members friends learners consumers people of faith and participants in law and politics The contributors also discuss the methodological and ethical requirements for research that occurs in natural settings and that enables children themselves to describe their perspective The book is divided into three parts Part I Setting Specific Issues in Child Research Part II Population Specific Issues in Child Research Part III Methods in Research on Children and Childhood *Annual Progress in Child Psychiatry and Child Development* 1997 Margaret E. Hertzog, Ellen A. Farber, 1998 This volume traces the modern critical and performance history of this play one of Shakespeare's most loved and most performed comedies The essay focus on such modern concerns as feminism deconstruction textual theory and queer theory **Risk and Resilience in Human Development** Corey L.M. Keyes, 2018-12-07 This special issue is devoted to the topic of risk and resilience in human development a topic that epitomizes the complexity of human development as a process of constancy and change throughout life The three empirical papers in this issue represent strong contributions to the growing corpus of research on risk and resilience in human development The first one focuses on the uniquely vulnerable population of urban ethnic minority adolescent males The second paper focuses on the risk and resilience from trauma in a sample of mostly Caucasian individuals from rural Iowa who were at the last assessment in the midst of transition into young adulthood It measures an array of mental disorders outcomes and reveals the theoretical importance of timing of the risk factor The last paper is a study begun in 1978 of a cohort of individuals with serious adolescent onset mental disorder It compares these individuals against the risk and resilience profiles of a matched sample without serious adolescent onset psychiatric disorder In sum this issue adds to the corpus of the frontiers of resilience research Environmental Psychology Tony Cassidy, 2013-10-31 This text contains an up to date survey of theory research and practice in environmental psychology drawing on international literature It adopts the perspective that physical and social factors are inextricably linked in their influence on human behaviour and experience and that the world in which we live is changed and often damaged by human action Throughout the text the issues which are

important in contemporary psychology such as levels of explanation methodological diversity and the relationship between psychology and other disciplines are brought to the fore The text covers established areas of environmental concern and also brings together research on rarely covered topics such as the effects of smell colour and light and the way in which physical environments influence social identity Handbook of Applied Developmental Science Richard M. Lerner, Francine Jacobs, Donald Wertlieb, 2003 The Handbook of Applied Developmental Science is the only work to comprehensively present the latest theory research and application from applied developmental science ADS and the positive psychology movement It summarizes and synthesizes the best scientific knowledge from ADS to help readers understand the efforts being made around the world to ensure that all children and adolescents develop into healthy adults who contribute positively to society The Handbook is also the first resource to organize and integrate both the prevention and promotion approaches to programs and policies for children adolescents and families In addition the Handbook provides a detailed road map for future research and for actions that will promote positive child youth and family development Published in four volumes the Handbook features 95 chapters by more than 150 contributors many of who are renowned leaders in the field Volume 1 describes the foundation of applied developmental science its historical development and current scientific and professional efforts to develop policies and programs that promote positive child adolescent and family development Volume 2 examines public policy and government service systems Volume 3 discusses community systems for enhancing citizenship and promoting a civil society Finally Volume 4 outlines methods for university engagement and academic outreach Feature and Benefits Four comprehensive topical volumes Approximately 2 200 pages 95 chapters More than 150 contributors many of whom are world renowned leaders in applied development science from the academic professional and policy and political arenas Forewords for each volume written by well known authorities including Edward Zigler co founder of the Head Start program US Congressman Elijah E Cummings David Bell International Youth Foundation and Graham Spanier President The Pennsylvania State University Designed for a wide audience the Handbook will be an important addition to your library collection It offers a single source for information about fostering generations of healthy children and families It is designed specifically to meet the needs of Faculty and students in the fields of psychology human development family studies policy studies nursing allied health and education Staff and volunteers working in non governmental organizations Members of local state national and international government organizations and personnel involved in policy and program development and funding Directors and staff at foundations that administer programs aimed at promoting positive your and family development Genetics, Ethics and Education Susan Bouregy, Elena L. Grigorenko, Stephen R. Latham, Mei Tan, 2017-10-05 Advances in human genetics and genomics are beginning to move outside the traditional realm of medicine and into the classroom How will educational officials react when asked to incorporate personalized genomic information into the educational program This volume bridges the divide between science education and ethics around the emergent integration of genomics and education

By pairing comprehensive analysis of the issues with primers on the underlying science the authors put all relevant parties on a level field to facilitate thorough consideration and educated discussion regarding how to move forward in this new era as well as how best to support the future of education and the future of all students The volume is unique in bringing together not only scholarly experts but also parents and laypersons In doing so it gives voice and understanding to a broad spectrum of disciplines that have a stake in the future of education

Ethical Conduct of Clinical Research Involving Children Institute of Medicine, Board

on Health Sciences Policy, Committee on Clinical Research Involving Children, 2004-08-09 In recent decades advances in biomedical research have helped save or lengthen the lives of children around the world With improved therapies child and adolescent mortality rates have decreased significantly in the last half century Despite these advances pediatricians and others argue that children have not shared equally with adults in biomedical advances Even though we want children to benefit from the dramatic and accelerating rate of progress in medical care that has been fueled by scientific research we do not want to place children at risk of being harmed by participating in clinical studies Ethical Conduct of Clinical Research Involving Children considers the necessities and challenges of this type of research and reviews the ethical and legal standards for conducting it It also considers problems with the interpretation and application of these standards and conduct concluding that while children should not be excluded from potentially beneficial clinical studies some research that is ethically permissible for adults is not acceptable for children who usually do not have the legal capacity or maturity to make informed decisions about research participation The book looks at the need for appropriate pediatric expertise at all stages of the design review and conduct of a research project to effectively implement policies to protect children It argues persuasively that a robust system for protecting human research participants in general is a necessary foundation for protecting child research participants in particular
