Representations of Finite Chevalley Groups B. Srinivasan, 2006-11-14 **Representations of Finite Chevalley Groups**
B. Srinivasan, 2014-09-01 *Representations of Finite Chevalley Groups* George Lusztig, 1978 The notes came from a series of lectures given by the author at a CBMS Regional Conference held at Madison Wisconsin in August 1977 The main purpose of the notes was to show how l adic cohomology of algebraic varieties over fields of positive characteristic can be used to obtain information on the representations of finite Chevalley groups **Representations of Finite Chevalley Groups**
James E. Humphreys, 1976 *Representations of finite Chevalley groups* Bhama Srinivasan, 1979 Vertices of irreducible representations of finite Chevalley groups in the describing characteristic Richard Dipper, 1980 On Some Problems in Representation Theory of Finite Chevalley Groups Corneliu Hoffman, 1998 **The Arcata Conference on Representations of Finite Groups, Part 1** Paul Fong, 1987 The papers in these proceedings of the 1986 Arcata Summer Institute bear witness to the extraordinarily vital and intense research in the representation theory of finite groups The confluence of diverse mathematical disciplines has brought forth work of great scope and depth Particularly striking is the influence of algebraic geometry and cohomology theory in the modular representation theory and the character theory of reductive groups over finite fields and in the general modular representation theory of finite groups The continuing developments in block theory and the general character theory of finite groups is noteworthy The expository and research aspects of the Summer Institute are well represented by these papers **Modular Representations of Finite Groups of Lie Type** James E. Humphreys, 2006 A comprehensive treatment of the representation theory of finite groups of Lie type over a field of the defining prime characteristic **Ordinary and Modular Representations of Chevalley Groups** J. E. Humphreys, 2006-11-14 *Representations of Groups* Bruce Normansell Allison, Gerald Howard Cliff, Canadian Mathematical Society, 1995 Survey and research articles from the June 1994 seminar address representations of Lie algebraic finite and quantum groups and the relationships among these areas Topics include complex reflection groups and their associated braid groups automata to perform basic calculations in Coxeter groups Heck algebras and representations of finite reductive groups and Koszul algebras and duality Of interest to graduate students and research mathematicians No index Annotation copyright by Book News Inc Portland OR *Groups, Combinatorics & Geometry* A. A. Ivanov, Martin W. Liebeck, Jan Saxl, 2003 This book contains the proceedings of the L M S Durham Symposium on Groups Geometry and Combinatorics July 16 26 2001 P v **Representations of Algebraic Groups** Jens Carsten Jantzen, 2003 Gives an introduction to the general theory of representations of algebraic group schemes This title deals with representation theory of reductive algebraic groups and includes topics such as the description of simple modules vanishing theorems Borel Bott Weil theorem and Weyl's character formula and Schubert schemes and line bundles on them *Galois Theory, Rings, Algebraic Groups and Their Applications* Simeon Ivanov, 1992 This collection consists of original work on Galois theory rings and algebras algebraic

geometry group representations algebraic K theory and some of their applications **Irreducible Geometric Subgroups of Classical Algebraic Groups** Timothy C. Burness,,Soumaïa Ghandour,Donna M. Testerman,2016-01-25 Let G be a simple classical algebraic group over an algebraically closed field of characteristic p with natural module V . Let H be a closed subgroup of G and let W be a non trivial irreducible tensor indecomposable restricted rational module such that the restriction of W to H is irreducible. In this paper the authors classify the triples (G, H, W) where H is a disconnected maximal positive dimensional closed subgroup of G preserving a natural geometric structure on V .

Unitary Reflection Groups Gustav I. Lehrer,Donald E. Taylor,2009-08-13 A complex reflection is a linear transformation which fixes each point in a hyperplane. Intuitively it resembles the transformation an image undergoes when it is viewed through a kaleidoscope or arrangement of mirrors. This book gives a complete classification of all groups of transformations of n dimensional complex space which are generated by complex reflections using the method of line systems. In particular irreducible groups are studied in detail and are identified with finite linear groups. Reflection subgroups of reflection groups are completely classified. The theory of eigenspaces of elements of reflection groups is discussed fully. An appendix outlines links to representation theory topology and mathematical physics. Containing over 100 exercises ranging in difficulty from elementary to research level this book is ideal for honours and graduate students or for researchers in algebra topology and mathematical physics.

Amitsur Centennial Symposium Avinoam Mann,Louis H. Rowen,David J. Saltman,Aner Shalev,Lance W. Small,Uzi Vishne,2024-05-14 This volume contains the proceedings of the Amitsur Centennial Symposium held from November 1-4 2021 virtually and at the Israel Institute for Advanced Studies IAS The Hebrew University of Jerusalem Jerusalem Israel. Shimshon Amitsur was a pioneer in several branches of algebra the leading algebraist in Israel for several decades who contributed major theorems inspiring results useful observations and enlightening tricks to many areas of the field. The fifteen papers included in the volume represent the broad impact of Amitsur's work on such areas as the theory of finite simple groups algebraic groups PI algebras and growth of rings quadratic forms and division algebras torsors and Severi Brauer surfaces Hopf algebras and braces invariants automorphisms and derivations.

Categorical, Combinatorial and Geometric Representation Theory and Related Topics Pramod N. Achar,Kailash C. Misra,Daniel K. Nakano,2024-07-11 This book is the third Proceedings of the Southeastern Lie Theory Workshop Series covering years 2015-21. During this time five workshops on different aspects of Lie theory were held at North Carolina State University in October 2015 University of Virginia in May 2016 University of Georgia in June 2018 Louisiana State University in May 2019 and College of Charleston in October 2021. Some of the articles by experts in the field describe recent developments while others include new results in categorical combinatorial and geometric representation theory of algebraic groups Lie super algebras and quantum groups as well as on some related topics. The survey articles will be beneficial to junior researchers. This book will be useful to any researcher working in Lie theory and related areas.

Inside Versus Outside Harald Atmianspacher,Gerhard J. Dalenoort,2012-12-06 In our daily lives

we conceive of our surroundings as an objectively given reality The world is perceived through our senses and these provide us so we believe with a faithful image of the world But occasionally we are forced to realize that our senses deceive us e.g. by illusions For a while it was believed that the sensation of color is directly related to the frequency of light waves until E. Land, the inventor of the polaroid camera, showed in detailed experiments that our perception of say a colored spot depends on the colors of its surrounding On the other hand we may experience hallucinations or dreams as real Quite evidently the relationship between the world and our brain is intricate Another strange problem is the way in which we perceive time or the Now Psychophysical experiments tell us that the psychological Now is an extended period of time in the sense of physics The situation was made still more puzzling when in the nineteen twenties Heisenberg and others realized that by observing processes in the microscopic world of electrons and other elementary particles we strongly interfere with that world The outcome of experiments at least in general can only be predicted statistically What is the nature of this strange relationship between object and observer This is another crucial problem of the inside outside or endo exo dichotomy
