Representing popular sovereignty, **Representing Popular Sovereignty** Daniel Lessard Levin, 1999-03-18 Using the events of the Constitution's Bicentennial from 1987 to 1991 as a case study *Representing Popular Sovereignty* explores the contradiction between the Constitution's importance as a political document and its weakness as a symbol in American popular culture

Psychic Empire Cate I. Reilly, 2024-06-11 In nineteenth century imperial Germany and the Austro-Hungarian Empire new scientific fields like psychophysics empirical psychology clinical psychiatry and neuroanatomy transformed the understanding of mental life in ways long seen as influencing modernism Turning to the history of psychiatric classification for mental illnesses Cate I Reilly argues that modernist texts can be understood as critically responding to objective scientific models of the psyche not simply illustrating their findings Modernist works written in industrializing Central and Eastern Europe historicize the representation of consciousness as a quantifiable phenomenon within techno-scientific modernity Looking beyond modernism's well studied relationship to psychoanalysis this book tells the story of the non-Freudian vocabulary for mental illnesses that forms the precursor to today's Diagnostic and Statistical Manual of Mental Disorders Developed by the German psychiatrist Emil Kraepelin in the 1890s this psychiatric taxonomy grew from the claim that invisible mental illnesses were analogous to physical phenomena in the natural world Reilly explores how figures such as Georg Bchner Ernst Toller Daniel Paul Schreber Nikolai Evreinov Vsevolod Ivanov and Santiago Ramn y Cajal understood the legal and political consequences of representing mental life in physical terms Working across literary studies the history of science psychoanalytic criticism critical theory and political philosophy *Psychic Empire* is an original account of modernism that shows the link between nineteenth century scientific research on the mental health of national populations and twenty first century globalized neuroscientific accounts of psychopathology and sanity

The Primacy of the Political Dick Howard, 2010 The conflict between politics and antipolitics has replayed itself throughout Western history and philosophical thought Plato's quest for absolute certainty led him to denounce political democracy an anti-political position later challenged by Aristotle This back and forth exchange came to a head at the time of the American and French revolutions Through this wide-ranging narrative Dick Howard throws new light on a recurring philosophical dilemma proving our political problems are not as unique as we think Howard begins with democracy in ancient Greece and the rise and fall of republican politics in Rome In the wake of Rome's collapse political thought searched for a new medium and the conflict between politics and antipolitics reemerged through the contrasting theories of Saint Augustine and Saint Thomas During the Renaissance and the Reformation the emergence of the modern individual again shifted the terrain Even so politics vs antipolitics dominated the period frustrating even Machiavelli who sought to

reconceptualize the nature of political thought Hobbes and Locke theorists of the social contract then reenacted the conflict which Rousseau sought in vain to overcome Adam Smith and the growth of modern economic liberalism the radicalism of the French revolution and the conservative reaction of Edmund Burke subsequently marked the triumph of antipolitics and the American Revolution may have offered the potential groundwork for a renewal of politics Taken together these historical examples viewed through the prism of philosophy reveal the roots of today's political climate and suggest the trajectory of the battles yet to come

Compound Democracies Sergio Fabbrini, 2010-08-19 This is a major new comparison of the American and European political systems By deploying a powerful new model to analyse the two systems it draws some challenging conclusions about their increasing similarity Professor Fabbrini argues that the process of regional integration in Europe over the last 60 years has significantly reduced the historical differences between the democracies on either side of

the Atlantic The EU and the US are now similar because they represent two different species of the same political genus the compound democracy The defining feature of compound democracy is the union of states and their citizens Through such union the states agree to pool their sovereignty within a larger integrated supra state or supranational framework They do so because these unions are primarily pacts for avoiding war Because the states which made those unions were and continue to be asymmetrically correlated any attempt to create a unified polity that is a political system where the decision making power is monopolized by only one institution is likely to fail He goes on to argue that the US and the EU are based on a multiple diffusion of powers which guarantees that any interest can have a voice in the decision making process and no majority will be able to control all the institutional levels of the polity This type of system allows an inter states organization to operate as a supra state polity but it does so at the expense of decision making capacity and accountability

Democracy Revisited Sujit Kumar

Chattopadhyay,2022-09-30 Democracy Revisited is a critical as well as uncritical approach to the study and review of democracy today The objective of the first chapter is to deal with some theoretical reasons of the decline of democracy such as lack of holistic approach omission of civil society and varied forms of democracy Out of many theoretical defects the book especially highlights the problem of precision regarding the meaning and nature of democracy and omission of civil society in democracy Omission of civil society in democratic discourses has been a direct cause of the decline of democracy That the people are ignored in practical democracy is due to the fact that civil society is absolutely omitted from the democratic narratives The book also highlights some of major practical problems that are downgrading the importance implication and relevance of democracy today in reality Such practical problems are corruption rule of the elites in lieu of rule of the people inequality of race gender and religion and lack of leadership Under this perspective it is necessary to have an open look towards the positive points of democracy Since there is no much better alternative than democracy we must have to highlight its strong points such as scope of debate discussion participation and formation of opinion by which democracy can be a people friendly political system as well as an ideology and a cultural practice Thus this book is not only a criticism of democracy but also a call for revisiting its strength by which democracy can still claim to be a suitable alternative of all types of statecraft political systems and social and cultural pattern of life

The Faith of the Faithless Simon Critchley, 2014-02-04 The return to religion has perhaps become the dominant cliché of contemporary theory which rarely offers anything more than an exaggerated echo of a political reality dominated by religious war. Somehow the secular age seems to have been replaced by a new era where political action flows directly from metaphysical conflict. *The Faith of the Faithless* asks how we might respond. Following Critchley's *Infinitely Demanding*, this new book builds on its philosophical and political framework, also venturing into the questions of faith, love, religion, and violence. Should we defend a version of secularism and quietly accept the slide into a form of theism, or is there another way? From Rousseau's politics and religion to the return to St Paul in Taubes, Agamben and Badiou, via explorations of politics and original sin in the work of Schmitt and John Gray, Critchley examines whether there can be a faith of the faithless, a belief for unbelievers. Expanding on his debate with Slavoj Žižek, Critchley concludes with a meditation on the question of violence and the limits of non-violence.
