**Sexuality, Family Planning, and Reproduction** Fritz Dross, Birgit Nemec, Igor Kąkolewski, 2025-08-12 The history of sexuality family planning and reproduction in Central and Eastern Europe sounds out the historical dimensions across a broad field where human biology medicine policy and government social programmes intersect with fundamental conceptions of desired or feared social developments From contraception to representations of motherhood and controversies over reproductive rights using the example of the historically changing political social cultural and scientific interconnections in Central and Eastern Europe the contributors to this volume invite reflections on historical developments that open new perspectives for the 21st century

**Queering Family Trees** Sandra Patton-Imani, 2020-06-09 Argues that significant barriers to family making exist for lesbian mothers of color in the United States One might be tempted in the afterglow of *Obergefell v Hodges* to believe that the battle has been won that gays and lesbians fought a tough fight and finally achieved equality in the United States through access to legal marriage But that narrative tells only one version of a very complex story about family and citizenship *Queering Family Trees* explores the lived experience of queer mothers in the United States drawing on over one hundred interviews with African American Latina Native American white and Asian American lesbian mothers living in a range of socioeconomic circumstances to show how they have navigated family making While the legalization of same sex marriage and adoption in 2015 has provided avenues toward equality for some couples structural and economic barriers have meant that others especially queer women of color who often have fewer financial resources have not been able to access seemingly available choices such as second parent adoptions powers of attorney and wills Sandra Patton Imani here argues that the virtual exclusion of lesbians of color from public narratives about LGBTQ families is crucial to maintaining the narrative that legal marriage for same sex couples provides access to full equality as citizens Through the lens of reproductive justice Patton Imani argues that the federal legalization of same sex marriage reinforces existing structures of inequality grounded in race gender sexuality and class *Queering Family Trees* explores the lives of a critically erased segment of the queer population demonstrating that the seemingly color blind solutions offered by

marriage equality do not rectify such inequalities      **Handbook of Women's Sexual and Reproductive Health** Gina M. Wingood, Ralph J. *Sexy Families for Sexy Citizens?* Dagmar Mehrtens, 2011-07-04  
Master's Thesis from the year 2004 in the subject Politics Topic Public International Law and Human Rights grade 9 0  
University of Lisbon Faculty of Law Ius Gentium University of Coimbra course European Master's Programme in Human Rights and Democratisation language English abstract

Over recent years sexual minorities have growingly gained attention in the human rights discourse This attention focuses on the de criminalisation and anti discrimination of lesbians gays and others However states and human rights instruments remain unwilling to view those belonging to these newly established minorities in their complexity as social individuals and citizens This makes it very difficult for sexual minorities to do things considered quite normal and essential for others such as living a family life and raising children Raising the topic of same sex families within a human rights discourse remains highly controversial Family however is more than a benevolent luxurious minority topic in modern welfare states The human family constitutes the foundation of the human rights regime and as such is a fundamental cross sectional institution and mechanism within liberal democratic societies Denying lesbians and gays the moral capacity of taking responsibility for partners and children assigns them an inferior second class status in society Framing this distinction with categorical justifications by according them a special minority status only supports hierarchical distinctions It needs to be questioned whether a specific heteronormative life long man wife conception of partnership can serve as the universal standard for marriage family and the conception of a good citizen and fully recognised member of society or whether it is not this concept of normality that needs to be questioned rather than the assumed specificities of excluded others

**Reproductive Health Behaviour of Young Europeans** Nathalie Bajos, Agnès Guillaume, Osmo

Kontula, Council of Europe, 2003-01-01 This publication is the second volume of a report which examines the reproductive health behaviour of young people in Europe focusing on the role of health education and promotion strategies in influencing reproductive behaviour It includes case studies from the UK Bulgaria Finland and the Russian Federation Sexual and Reproductive Health Paul Van Look, Kristian Heggenhougen, Stella R. Quah, 2011-01-10 This volume presents the highlights of current global thinking about sexual and reproductive health Major changes have taken place in the last 15 years in the way decision makers think about the subject and the manner in which programmes deliver comprehensive sexual and reproductive health services The turning point was the International Conference on Population and Development ICPD held in Cairo Egypt in 1994 ICPD was a watershed for several reasons First more than in any of the preceding United Nations population conferences the issue of population was clearly placed as being central to sustainable development Second the narrow focus on population growth the population bomb which had been a neo Malthusian concern and preoccupation ever since the Club of Rome published its 1972 report Limits to Growth was replaced by the comprehensive concept of sexual and reproductive health Third and linked to the definition and introduction of the reproductive health concept was the strong call for a paradigm shift away from a policy environment driven by demographic considerations sometimes to the point of using coercion in family planning services in order to reach demographic targets to an environment that recognized the right of individuals to make their own choices And last but not least ICPD as well as the Fourth World Conference on Women FWCW held the following year in Beijing People s Republic of China strongly emphasized that the rights of women and men to good sexual and reproductive health are firmly grounded in universal human rights Provided by publisher
