This is an important book heavy in size and tone It belongs in every serious library Choice *Reading Capital* Louis Althusser, Etienne Balibar, 2009-06-09 Establishing a rigorous program of symptomatic reading that cuts through the silences and lacunae of Capital to reveal its philosophical core Louis Althusser interprets Marx's structural analysis of production as a revolutionary break the basis of a completely new science Building on a series of Althusser's conceptual innovations that includes overdetermination and social formation Etienne Balibar explores the historical and structural facets of production as Marx understood them scrutinizing many of the most fundamental points in Capital as though for the first time Peasant Poverty and Persistence in the Twenty-First Century Julio Boltvinik, Susan Archer Mann, 2016-08-15 Peasants are a majority of the world's poor Despite this there has been little effort to bridge the fields of peasant and poverty studies Peasant Poverty and Persistence in the Twenty first Century provides a much needed critical perspective linking three central questions Why has peasantry unlike other areas of non capitalist production persisted Why are the vast majority of peasants poor And how are these two questions related Interweaving contributions from various disciplines the book provides a range of responses offering new theoretical historical and policy perspectives on this peasant world drama Scholars from both South and North argue that in order to find the policy paths required to overcome peasants misery we need a seismic transformation in social thought to which they make important contributions They are convinced that we must build upon the peasant economy's advantages over agricultural capitalism in meeting the challenges of feeding the growing world population while sustaining the environment Structured to encourage debate among authors and mutual learning Peasant Poverty and Persistence takes the reader on an intellectual journey toward understanding the peasantry **New Directions in Economic Anthropology** Susana Narotzky, 1997-04-20 Using an historical perspective Narotzky highlights the interdependent nature of the contemporary world economy and includes case studies of Western societies She gives special emphasis to current issues such as the anthropology of work the informal economy and the cultures of industrialisation *Wildlife Abstracts* U.S. Fish and Wildlife Service, 1954 **The Theory of Accumulation** Nobuo Okishio, 2022-01-18 This book treats the mechanisms of growth and cycles in capitalist economies in a unified manner incorporating a highly original macro dynamic theory based on Marxian micro foundations and historical perspectives That theory was developed about 50 years ago by Nobuo Okishio 1927 2003 and included the ideas of Keynes and Harrod In mainstream economics it used to be standard to analyse long term economic growth and business cycles in different frameworks That approach has been changing recently but it still tends to be common to discuss them separately At the outbreak of the global financial crisis of 2007 2008 and the prolonged stagnation that followed there was strong criticism among policymakers and businesspeople that mainstream macroeconomics failed to provide convincing explanations and effective policy recommendations This book offers an alternative perspective that responds to those criticisms All these macroeconomic difficulties call for new wisdom beyond the limited neoclassical framework The sharp wise thoughts of Okishio will add new tools for young researchers worldwide to

meet the challenges of the current resource misallocation the Great Recession and the Lost Decades problems Okishio proposes a historical perspective for the capitalist system first He argues that production relations are conditioned by productive force The former should evolve as the latter improves and the latter should evolve in order for human society to survive While reproduction is indispensable for the economy to continue in any production relations it takes a specific form in capitalist economy He next shows that the existence of profit requires the exploitation of the labourer This is called the Fundamental Marxian Theorem He also shows a trade off relationship between the real wage rate and the profit rate In his theory the real wage rate is determined to clear commodity markets in the short run as in the Keynesian theory while Marx believed that the real wage rate is given at subsistence level or is influenced by the labour market Okishio attributes the origin of the business cycle to labourers under consumption and private capitalists dispersive decision of accumulation The former is caused by exploitation and the latter is based on the capitalist class s private ownership of the means of production Both are derived from the nature of the capitalist economy He argues lastly that in the long term the development of productive force through the business cycle will transform the production relation into a new economic system Patriarchy

Bondarenko V., Barylovykh O., Helevey O., Skakun O., Heraimovych V., Kornichuk T., Lutsii O., Lutsii I., Nahorna O., Ostapchuk A., Riabchyk A., Vyshnivska B., Zbarskyi V., 2023-07-31 The formation and development of market relations in the Ukrainian economy necessitate the improvement of the management mechanism of agricultural enterprises the orientation of the management system to market conditions and the ability to respond quickly and flexibly to changes in the environment and within the enterprise Currently only a small proportion of enterprises use marketing management methods in their business operations and only a few of them use a systematic approach to organizing management based on marketing Military actions on the territory of our country have had a great impact on this course of events and the development of enterprises at the present time Marketing management of an enterprise is an opportunity to organize its activities on the principles of optimal use of the available potential and obtaining the greatest profit taking into account the satisfaction of

consumer needs An analysis of the company's capabilities allows to obtain reliable information on the state of assets and liabilities of production to analyze the external marketing environment A systematic approach to organizing management and developing a marketing strategy is a scientifically sound way to increase profitability save costs and improve the company's market position An integral part of the company's marketing management system is to ensure proportionality of development support and preservation of social guarantees for employees However after the Russian Federation started military operations on the territory of Ukraine agricultural enterprises experienced major problems in production sales and procurement of inputs The big problems caused by the war are clearly visible in logistics processes losses in trade relations by sea suspended river traffic heavy load on border crossing points on railways and highways lack of air traffic Due to the constant bombardment by the Russian aggressor a large number of critical infrastructure facilities have been damaged forcing our companies to significantly increase the cost of processing agricultural products and thus stay afloat without stopping their operations A large number of companies from the east and south were forced to move to the western and central parts of the country to resume their operations However given that in Ukraine marketing management of agricultural enterprises is a separate very large and problematic aspect the theoretical and methodological framework is not sufficiently covered there are problematic issues and the strategy for the transition of enterprises from outdated forms and methods of management and business to new scientifically based market methods such as marketing management has not been developed This will allow our enterprises to develop and meet the needs of consumers and at the same time ensure the country's food security in this difficult military period for Ukraine The results of the research presented in this monograph are determined within the framework of the initiative topic of the Department of Marketing and International Trade of the National University of Life and Environmental Sciences of Ukraine Development of Marketing at Agricultural and Processing Enterprises state registration number 0120U100630
