The Human Embryo Research Debates Ronald M. Green, 2001-06-28 Research on the early human embryo has long been recognized as essential to progress in a host of biomedical areas from reproductive medicine to the treatment of pediatric cancers Now with the possibility of stem cell research and cell replacement therapies embryo research holds out the promise of cures for many serious disease conditions such as diabetes and Alzheimer's disease Despite its importance however human embryo research has met powerful opposition Drawing on his experience as a member of the NIH's Human Embryo Research Panel Green offers a first hand account of the embryo research debates In telling this story he periodically pauses to reflect on some of the leading philosophical challenges posed by embryo research and new interventions at the start of life Among the questions he examines are What is the impact of new biological information on our thinking about life's beginning May parents risk injuring a child in order to have it What role should religion play in shaping biomedical policy in a controversial area like this This is a fascinating insider's account of one of the most important if unsuccessful recent efforts to come to terms with a controversial area of scientific research **The Oxford Textbook of Clinical Research Ethics**

Ezekiel J. Emanuel, Christine C. Grady, Robert A. Crouch, Reidar K. Lie, Franklin G. Miller, David D. Wendler, 2011-02 The Oxford Textbook of Clinical Research Ethics is the first comprehensive and systematic reference on clinical research ethics Under the editorship of experts from the U.S. National Institutes of Health of the United States the book's 73 chapters offer a wide ranging and systematic examination of all aspects of research with human beings Considering the historical triumphs of

research as well as its tragedies the textbook provides a framework for analyzing the ethical aspects of research studies with human beings Through both conceptual analysis and systematic reviews of empirical data the contributors examine issues ranging from scientific validity fair subject selection risk benefit ratio independent review and informed consent to focused consideration of international research ethics conflicts of interests and other aspects of responsible conduct of research The editors of The Oxford Textbook of Clinical Research Ethics offer a work that critically assesses and advances scholarship in the field of human subjects research Comprehensive in scope and depth this book will be a crucial resource for researchers in the medical sciences as well as teachers and students

Bibliography of Bioethics LeRoy Walters,1975

In Vitro Fertilisation in the 1990s Elisabeth Hildt,Dietmar Mieth,2018-12-21 Published in 1998 this book is a collected volume of papers from the first conference of the European Network for Biomedical ethics The main subject of this conference is the ethical assessment of IVF in view of its concrete application as an infertility treatment and the consideration of possible alternatives for use Twenty years after the introduction and the establishment of this therapy a more concrete evaluation of its medical indications social conditions and consequences the psychological consequences for the women involved and the parent child relationship becomes possible The legal and ethical evaluation of the reproduction technology as regards for example the legal and moral status of supernumerary embryos in cryo conservation has also to be considered in a European perspective The ethical evaluation concentrates today on the new evolution that IVF technology takes in relation to the extension of diagnostics possibilities due to genetic research Little work has been done on the connection between IVF and genetic diagnostics and therapy so the medical and ethical evaluation of the connecting lines are also included in the book

Aging And Ethics Nancy S. Jecker,2012-12-06 The Aging Self and the Aging Society Ethical issues involving the elderly have recently come to the fore This should come as no surprise Since the turn of the century there has been an eightfold increase in the number of Americans over the age of sixty five and almost a tripling of their proportion to the general population Those over the age of eighty five the fastest growing group in the country are twenty one more times as numerous as in 1900 Demographers expect this trend to accelerate into the twenty first century The aging of society casts into vivid relief a number of deep and troubling questions On the one hand as individuals we grapple with the immediate experience of aging and mortality and seek to find in it philosophical or ethical significance We also wonder what responsibilities we bear toward aging family members and what expectations of others our plans for old age can reasonably include On the other hand as a community we must decide What special role if any do older persons occupy in our society What constitutes a just distribution of medical resources between generations And How can institutions that serve the old foster imperiled values such as autonomy self respect and dignity Only recently have we begun to explore these themes yet already a rich and fruitful literature has grown up around them
