## **Reproductive Technologies A Reader:**

**Reproductive Technologies** Thomas A. Shannon, 2003-12-17 Over a decade ago the field of bioethics was established in response to the increased control over the design of living organisms afforded by both medical genetics and biotechnology. Since its introduction, bioethics has become established as an academic discipline with journals and professional societies, is covered regularly in the media, and affects people everyday around the globe. In response to the increasing need for information about medical genetics and biotechnology as well as the ethical issues these fields raise, Sheed Ward proudly presents the Readings in Bioethics Series. Edited by Thomas A. Shannon, the series provides anthologies of critical essays and reflections by leading ethicists in four pivotal areas: reproductive technologies, genetic technologies, death and dying, and health care policy. The goal of this series is twofold: first, to provide a set of readers on thematic topics for introductory or survey courses in bioethics or for courses with a particular theme or time limitation; second, each of the readers in this series is designed to help students focus more thoroughly and effectively on specific topics that flesh out the ethical issues at the core of bioethics. The series is also highly accessible to general readers interested in bioethics. This volume collects critical essays by leading scholars on reproductive technologies, abortion, in vitro fertilization, prenatal diagnosis, and cloning. Included in this volume are David Adamson, James P. Toner, Thomas A. Shannon, Bonnie Steinbock, Laura A. Schieve, Richard J. Paulson, G. Pennings, Thomas H. Murray, Lori B. Andrews, J. M. Phillips. **Reproductive Technologies**, 1991 **Reader's Guide to Lesbian and Gay Studies** Timothy Murphy, 2013-10-18 The Reader's Guide to Lesbian and Gay Studies surveys the field in some 470 entries on individuals, Adrienne Rich, arts and cultural studies, Dance, ethics, religion, and philosophical issues, Monastic Traditions, historical figures, periods, and ideas, Germany between the World Wars, language, literature, and communication, British Drama, law and politics, Child Custody, medicine and biological sciences, Health and Illness, and psychology, social sciences, and education, Kinsey Report. *The Disability Studies Reader* Lennard J. Davis, 2006 The second edition of *The Disability Studies Reader* builds and improves upon the classic first edition, which has sold well over 6000 copies since 1999. As a field, disability studies burst onto the scene across the social sciences and humanities in the 1990s, and the first edition of the reader gathered the best work that had been written on the subject, including essays by famous authors such as Susan Sontag and Erving Goffman. The new edition is more global in its coverage and adds material on genetic testing, the human genome, queer studies, and issues in developing countries. The size of the audience has grown since the first edition's publication, and the second edition's new material will make it even more useful for courses on the subject. Courses on the subject have mushroomed in the past ten years and can now be found across the social sciences, humanities, and behavioral sciences. *An Atlas of Human Gametes and Conceptuses* Lucinda L. Veeck, 1999-04-15 Replacing and superseding all other works in this area, Dr. Lucinda L. Veeck's *An Atlas of Human Gametes and Conceptuses* is the only book now in print that shows the typical and atypical morphology of human oocytes, sperm, and preembryos collected and cultured.

during the course of in vitro fertilization treatment Brilliantly illustrated with hundreds of original photographs in color as well as black and white the book also details and fully illustrates specific new reproductive technologies and provides the reader with both a glossary and a concise history of in vitro fertilization Includes bibliographic references and index
