Economics and Alcohol Marcus Grant,Martin Plant,Alan Williams,2023-12-01 During the 1950s 1960s and 1970s general levels of alcohol consumption had risen considerably in all parts of the world In association with this there was a proliferation of alcohol related problems such as liver disease drunkenness offences marital disharmony and employment difficulties Many factors influence the probability of alcohol addiction and the habits of drinking they include age sex race occupation and income Economic aspects of the use and misuse of alcohol had been attracting increasing attention during the early 1980s Politicians and scholars alike had drawn attention to the benefits of a vigorous alcohol industry on the one hand and on the other the costs of providing medical social and educational services for those suffering from alcohol related problems Originally published in 1983 the real nature of the relationship between economics and alcohol is explored in detail for the first time in this book It argues for increased participation by economists in the processes of social policy decision making and considers the key issues of cost benefit analyses control policies taxation and programme efficiency No easy solutions are provided but a host of unjustified assumptions about this subject are clarified This book paved the way for substantial future collaboration between economists and those involved in alcohol studies Alcoholism Griffith Edwards,Marcus Grant,2023-12-01 Originally published in 1977 alcoholism was acknowledged to be a seriously growing problem in many parts of the world It is a complex disorder with psychiatric physical psychological and social aspects having far reaching harmful effects on the family and society as well as on physical and mental health of the alcoholic themselves At the time of original publication it had been estimated that in England and Wales 11 out of every 1 000 in the adult population had a serious drink problem and alcoholism was a major cause of admission to psychiatric and general hospitals Alcoholism was a medico social problem of such magnitude that this comprehensive volume embodying advances in knowledge of causation treatment and prevention filled an urgent need at the time Still a major concern today this reissue can be read in its historical context Women and Alcohol ,1986
