## **Research In Law And Economics Vol 17 Research In Law And Economics:**

Research in Law and Economics Richard O. Zerbe, Richard O. Zerbe, Jr., 1995 Part of a series focusing on research into law and economics this volume discusses a variety of topics in the field      The Triumph of Ethernet Urs von Burg, 2001 One of the most important elements in the computer revolution has been agreement on technological standards This book tells the complete story of the battle between several competing technologies in the late 1970s and early 1980s to become the compatibility standard in one high tech arena the LAN local area network industry      **Cliometrics as Economics Imperialism: Across the Watershed** Benjamin Fine, 2023-11-27 In Cliometrics as Economics Imperialism Ben Fine traces the cliometric revolution from before its emergence through three phases of the new the newer and the newest economic history These phases are shown to correspond to those of economics imperialism the colonisation of topics and fields by mainstream economics moving successively through as if there were perfectly working markets as if imperfectly working markets and these combined plus arbitrary inclusion of other variables The text draws upon case studies for example of the putative eighteenth century consumer revolution Douglass North path dependence and the British coal industry and through exposing the reduction of economic theory and economic history deployed within them and giving rise to a corresponding reduction in the presence of the social the historical and political economy      *40 Years of Research on Rent Seeking 2* Roger D. Congleton, Arye L. Hillman, Kai A. Konrad, 2008-08-01 The last survey of the rent seeking literature took place more than a decade ago Since that time a great deal of new research has been published in a wide variety of journals covering a wide variety of topics The scope of that research is such that very few researchers will be familiar with more than a small part of contemporary research and very few libraries will be able to provide access to the full breadth of that research This two volume collection provides an extensive overview of 40 years of rent seeking research The volumes include the foundational papers many of which have not been in print for two decades They include recent game theoretic analyses of rent seeking contests and also applications of the rent seeking concepts and methodology to economic regulation international trade policy economic history political competition and other social phenomena The new collection is more than twice as large as any previous collection and both updates and extends the earlier surveys Volume I contains previously published research on the theory of rent seeking contests which is an important strand of contemporary game theory Volume II contains previously published research that uses the theory of rent seeking to analyze a broad range of public policy and social science topics The editors spent more than a year assembling possible papers and although the selections fill two large volumes many more papers could have been included      Invisible Hands, Russian Experience, and Social Science Stefan Hedlund, 2011-06-20 This book investigates cases in which national and international activities have gone massively wrong entailing seriously negative consequences and in which the sophisticated analytical models of social science have ceased to be helpful Illustrations range from the global financial crisis to the failure to achieve speedy systemic change in the former Soviet Union

and the failure to achieve development in the Third World The analysis uses as a backdrop long term Russian history and short term Russian encounters with unrestrained capitalism to develop a framework that is based in the so called new institutionalism Understanding the causes of systemic failure is shown to require an approach that spans across the increasingly specialized subdisciplines of modern social science Demonstrating that increasing theoretical sophistication has been bought at the price of a loss of perspective and the need for sensitivity to the role of cultural and historical specificity the book pleads the case for a new departure in seeking to model the motives for human action *Private Equity Firms*

Kirsten Burkhardt,2018-10-08 This work analyzes the role of private equity firms SCIs in forming strategic alliances in the French private equity market The subject is important because the formation of alliances and more generally the networking of SMEs could be an alternative to the lack of medium sized companies in France For French SCIs which are increasingly in a competitive situation assistance in forming alliances for their holdings may represent a new activity and be a source of competitive advantage The work is positioned transversally touching the areas of corporate governance entrepreneurial finance and strategy **7th International Conference on Gender Research** Professor Carmen-Pilar Martí Ballester

,2024-04-25 These proceedings represent the work of contributors to the 7th International Conference on Gender Research ICGR 2024 hosted by The Universitat Autònoma de Barcelona Spain on 25 26 April 2024 The Conference Chair was Professor Carmen Pilar Martí Ballester from the Universitat Autònoma de Barcelona Spain ICGR is a well established event on the academic research calendar and now in its 7th year the key aim of this diverse conference is to provide an opportunity for participants from different backgrounds and cultures to share ideas and meet the people who hold them The scope of papers ensured an interesting two days The subjects covered in these proceedings illustrate the wide range of topics that fall into this important and ever growing area of research *The Economics of Science* James R Wible,2003-09-02 Science is difficult and costly to do well This study systematically creates an economics of science Many aspects of science are explored from an economic point of view The scientist is treated as an economically rational individual This book begins with economic models of misconduct in science and the legitimate normal practices of science moving on to market failure the market place of ideas self correctiveness and the organizational and institutional structures of science An exploration of broader methodological themes raised by an economics of science ends the work **ECRM 2023 22nd European Conference on Research**

**Methods in Business and Management** Academic Conferences and Publishing Limited,2023-09-06 **Educational Research and Innovation Higher Education to 2030, Volume 1, Demography** OECD,2008-11-18 Drawing on trend data and projections this book takes an in depth look at how demographic changes will affect higher education to 2030 **ITF Research Reports Liberalisation of Air Transport** International Transport Forum,2019-05-03 Aviation is one of the most regulated industries in the world Much of this regulation is safety related to mitigate the inherent risks tied with air transport But aviation is also subject to economic regulation that influences which airline flies which route at which

frequency capacity and price It even stipulates the nationality of its owners and decision makers Aviation has freed itself from some restrictions over the past three decades with many benefits to society Yet liberalisation has also raised issues with regard to maintaining fair competition high labour standards and mitigating aviation s growing environmental impact

**Economic Incentives for Marine and Coastal Conservation** Essam Yassin Mohammed,2013-11-26 Marine and coastal resources provide millions of people with their livelihoods such as fishing and tourism and a range of critical additional ecosystem services from biodiversity and culture to carbon storage and flood protection Yet across the world these resources are fast diminishing under the weight of pollution land clearance coastal development overfishing natural disasters and climate change This book shows how economic instruments can be used to incentivize the conservation of marine and coastal resources It is shown that traditional approaches to halt the decline focus on regulating against destructive practices but to little effect A more successful strategy could be to establish schemes such as payments for ecosystem services PES or incorporate an element of financial incentives into existing regulatory mechanisms Examples both terrestrial and marine from across the world suggest that PES can work to protect both livelihoods and environments But to succeed it is shown that these schemes must be underpinned by robust research clear property rights sound governance structures equitable benefit sharing and sustainable finance Case studies are included from south and east Asia Latin America Africa and Australia The book explores the prospects and challenges and draws lessons from PES and PES like programmes from across the globe
