encouraged primarily women teachers to explore nature in and beyond their classrooms Sally Gregory Kohlstedt brings to vivid life the instructors and reformers who advanced nature study through on campus schools summer programs textbooks and public speaking Within a generation this highly successful hands on approach migrated beyond public schools into summer camps afterschool activities and the scouting movement Although the rich diversity of nature study classes eventually lost ground to increasingly standardized curricula Kohlstedt locates its legacy in the living plants and animals in classrooms and environmental field trips that remain central parts of science education today *Bird Lovers, Backyard* Thalia Field, 2019-05-15 Thalia Field's third book with New Directions is a tour de force of blending literary genres poetry prose essay and drama and examining our control of the natural world *Bird Lovers Backyard* continues Thalia Field's interrogation of the act of storytelling and her experimentation with literary genre Field's illuminating essays or stories in poetic form place scientists philosophers animals even the military in real and imagined events Her open questioning brings in subjects as diverse as pigeons chat rooms nuclear testing the building of the Kennedy Space Center the development of seaside beaches Konrad Lorenz the American author and animal trainer Vicki Hearne and the Swiss zoologist Heini Hediger Throughout she intermingles fact and fiction probing the porous boundaries between human and animal calling into question what we are willing to do with words and spinning a world where life is haunted by echoes Story and event survive through daring language and the elegies of history
