A Feminist Ethnography of Secure Wards for Women with Learning Disabilities Rebecca Fish, 2017-11-13 What is life like for women with learning disabilities detained in a secure unit This book presents a unique ethnographic study conducted in a

contemporary institution in England Rebecca Fish takes an interdisciplinary approach drawing on both the social model of disability and intersectional feminist methodology to explore the reasons why the women were placed in the unit as well their experiences of day to day life as played out through relationships with staff and other residents She raises important questions about the purpose of such units and the services they offer Through making the women s voices heard this book presents their experiences and unique perspectives on topics such as seclusion restraint and resistance Exploring how the ever present power disparity works to regulate women s behaviour the book shows how institutional responses replicate women s bad experiences from the past and how women s responses are seen as pathological It demonstrates that women are not passive recipients of care but shape their own identity and futures sometimes by resisting the norms expected of them within allowed limits and sometimes by transgressing the rules These insights thus challenge traditional institutional accounts of gender learning disability and deviance and highlight areas for reform in policy practice methodology and social theory This ground breaking book will be of interest to scholars students policymakers and advocates working in the fields of learning disability and disability studies more widely gender studies and sociology
