**Crossroads of Social Science** Heinz Eulau, 2007 The essays in this collection analyze the successes and failures of the social sciences over the last few decades as well as on their future. The focus of the book is on generic problems, difficulties and dilemmas in the social sciences that the contributors are uniquely qualified to articulate. Each of them has been intimately involved in the development of one or another discipline in the last thirty years or so; each has made significant contributions to that development in many ways; each has a personal perspective on accomplishments and failures, promises and needs, continuities to be cultivated and opportunities to be seized. Anyone concerned with the state of social science disciplines should find these essays of interest.
