State-of-the-Art and Future Directions of Smart Learning Yanyan Li, Maiga Chang, Milos Kravcik, Elvira

Popescu, Ronghuai Huang, Kinshuk, Nian-Shing Chen, 2015-10-26 This book provides an archival forum for researchers, academics, practitioners, and industry professionals interested and/or engaged in reforming teaching and learning methods by transforming today's learning environments into smart learning environments. It will facilitate opportunities for discussions and constructive dialogue between various stakeholders on the limitations of current learning environments, the need for reform, innovative uses of emerging pedagogical approaches and technologies, and sharing and promoting best practices which will lead to the evolution, design, and implementation of smart learning environments. The focus of the contributions is on the interplay and fusion of pedagogy and technology to create these new environments. The components of this interplay include but are not limited to: Pedagogy, learning paradigms, assessment paradigms, social factors, policy. Technology, emerging technologies, innovative uses of mature technologies, adoption, usability standards, and emerging new technological paradigms, open educational resources, cloud computing, etc. Fusion of pedagogy and technology, transformation of curricula, transformation of teaching, behavior transformation, administration, best practices, infusion, piloting of new ideas.

Science, Technology and Innovation Policy for the Future Dirk Meissner, Leonid Gokhberg, Alexander

Sokolov, 2013-05-24 The book gives practical guidance for policy makers, analysts, and researchers on how to make the most of the potential of Foresight studies. Based on the concept of evidence-based policy making, Foresight studies are common practice in many countries and are commonly understood as a supportive tool in designing future-oriented strategies. The book outlines approaches and experiences of integrating such Foresight studies in the making and implementation of science, technology, and innovation (STI) policies at different national levels. It delivers insights into practical approaches of developing STI policy measures oriented towards future societal and technological challenges based on evidence drawn from comparable policy measures worldwide. Authors from leading academic institutions, international organizations, and national governments provide a sound theoretical foundation and framework as well as checklists and guidelines for leveraging the potential impact of STI policies.
