Research In The Schizophrenic Disorders:

Research in the Schizophrenic Disorders R. Cancro, S.R. Dean, 2012-12-06 In the autumn of 1957 Stanley R Dean proposed the creation of a foundation on schizophrenia to a group of friends The purpose was to bring the illness of schizophrenia before the public's attention and out of the shameful anonymity in which it was buried Stanley Dean recognized the major public health importance of this illness and was determined to have an impact on it during his lifetime By December of that year the decision was made to create an organization called Research in Schizophrenia Endowment RISE Within less than two months articles of incorporation for RISE were issued by the State of Connecticut By the latter part of March 1958 Dean was successful in getting Congress to provide 1 300 000 for research into schizophrenia This was the first time that Congress had targeted funds specifically for research on this disorder Within a year by April 1959 Dr Dean was instrumental in getting Congress to increase its appropriation to the NIMH by more than 8 000 000 with the specific instruction that approximately one half of the total research funds of the NIMH be used for projects relating to schizophrenia In the spring of 1960 RISE relinquished its corporate charter and became an integral part of the Research Foundation of the National Association for Mental Health This merger occurred before RISE had implemented its planned annual award program for outstanding research in schizophrenia Several members of the Board of Directors of RISE under the leadership of Dr James G

Whitaker, 1992-07-31 No diagnosis of mental disorder is more important or more disputable than that of schizophrenia The 1982 case of John Hinckley who shot President Reagan brought both aspects of this diagnostic dilemma to the forefront of national attention It became evident to the general public that the experts engaged to study him exhaustively could not agree on whether Hinckley was schizophrenic General public outrage ensued as schizophrenia the sacred symbol of psychiatry in the words of Thomas Szasz 1976 emerged as a king of Alice in Wonderland travesty Schizophrenia seemed not to be a legitimate diagnostic entity but some sort of facade erected to protect the guilty In 1973 David Rosenhan had already shown the readers of Science that schizophrenia was a label that could be given to normal people presenting with a supposed auditory hallucination on even one occasion In Rosenhan's studies mental health professionals were outclassed by the regular psychiatric hospital patients who correctly saw the false schizophrenics as imposters while the professional diagnosticians continued to fool themselves *Biomedical Index to PHS-supported Research*, 1991 *Biomedical Index to PHS-supported Research: pt. Mednick, Thomas H. McGlashan, Jan Libiger, Johan Olav Johannessen, 2012-12-06 Multiple voices throughout the last century have preached the merits of various treatments for schizophrenia ranging from

cold baths to the currently accepted standards such as neuroleptic medication. Along with these ongoing treatments there have been quiet commentaries made mostly from the sidelines suggesting the need to shift and refocus the way we think and talk about schizophrenia. Harry Stack Sullivan noted in 1927 that 'The psychiatrist sees too many end states and deals professionally with too few of the pre psychotic' (Sullivan 1927, 1994, p. 135). Similar thoughts have been echoed by purveyors of modern treatment for psychosis such as Thomas H. McGlashan. 'Like others before me I tried to make a difference but like the others my efforts were largely in vain. I came upon the scene too late most of the damage was already done' (McGlashan 1996). Similar interest in the early phase of schizophrenia has developed across the globe and consolidated into a tentative yet meaningful deliberation about the potential for prevention of psychotic illness through early identification and intervention. In the past decade international support has grown from Ian Falloon's prodromal intervention project in Great Britain (Falloon et al 1996), Patrick McGorry's and Jane Edwards' first episode psychosis program in Melbourne, Australia (McGorry et al
