...DIFFERENT TO RESEARCH DESIGN!

## LAB EXPERIMENT

- Where a researcher manipulates the independent variable (IV) to see its effect on the dependent variable (DV).
- Happens in a CONTROLLED environment e.g. lab.
  - IV/DV used to find cause/effect

## FIELD EXPERIMENT

- Where a researcher manipulates the independent variable (IV) to see its effect on the dependent variable (DV).
- Happens in a NATURAL environment e.g. lab.
  - IV/DV used to find cause/effect

## NATURAL EXPERIMENT

- The independent variable (IV) occurs naturally and is not manipulated e.g. male v female.
- Dependent variables are still measured to determine differences between groups e.g. IV = male/female DV = Maths test score

## CORRELATION

- Measures the strength of a *relationship* between two variables e.g. stress and illness
- Does NOT determine cause/effect because it has no IV/DV.

## OBSERVATION

- The measurement and systematic recording of behaviour—either in the field or in the lab.
- They usually involve the use of *behavioural categories* - specific behaviours are chosen to be counted or timed during the observation.

## SELF REPORT

- Where the participant gives information about themselves to the researcher.
- This can be through a questionnaire (written) or an interview (face to face).

## CASE STUDY

- An in-depth, detailed study of one individual or small group.
- Data is gathered in lots of different ways: interviews, biographies, observations, tests etc.
- Often used in rare and unique cases e.g. Genie

## **Research Methods And Designs For Education:**

Research Methods and Designs for Education J. H. McGrath, 1970      **Designing Research in Education** Jon Swain, 2016-11-08 This is a clear introduction to the methodological and philosophical debates in the field of education research. It sets out the key ideas, questions and dilemmas which inform all research and then, through the careful use of case studies and practical advice from experienced researchers, grounds them in the specific concerns of education and educational studies. Written by experienced academics and teachers, the book links broad philosophical principles with practical strategies for designing and conducting ethical and effective research. Perfect for postgraduate students planning their own research in education, this book will help you to understand the philosophical foundations of your work, conceptualise and refine your research question, pick the right methodology for your research, embed ethical considerations throughout your research. This book is an ideal companion for any postgraduate student or early career academic conducting research across education and educational studies.

**Research Methods and Methodologies in Education** James Arthur, 2012-04-04 Using a variety of methodological approaches and research techniques in education, this book provides students with the theoretical understandings, practical knowledge and skills which they need to carry out independent research. The editors bring together an array of international contributors, all of whom identify key research methodologies, data collection tools and analysis methods and focus on the direct comparisons between them. The chapters cover the full range of methods and methodologies, including internet research, mixed methods research and the various modes of ethnographic research. Online support materials include tips on how to use the book and links to useful websites, societies and research organizations.

**Research Methods in Education** Louis Cohen, Lawrence Manion, Keith Morrison, 2002-09-11 This is a new edition of one of our best-selling textbooks. The authors have thoroughly updated the fourth edition and included more text on current developments in research practice, action research, developments in ICT, questionnaire design, ethnographic research, conducting needs analysis, constructing and using tests, observational methods, reliability and validity, ethical issues and curriculum research. The entire text has been redesigned to cater for the increasingly sophisticated needs of the educational researcher. The new edition is more comprehensive, up to date and user-friendly, with increased accessibility. The authors, who are experienced teachers in the field, have produced a better-written book, if that's possible, containing readable and realistic views of research and methodology and showing how to interpret the data.

**Research methods and designs for education** J. H. MacGrath, D. Gene Watson, 1970      How to Design and Evaluate Research in Education Jack R. Fraenkel, Norman E. Wallen, 2003-01-01 This text provides a comprehensive introduction to educational research. Each step in the research process is described and discussed in detail, and thorough coverage of the most widely used research methodologies in education is provided. New to this edition is an expanded focus on qualitative methods. New Parts V and VI provide an expanded introduction to qualitative methods and take a close look at different qualitative

methodologies Also new is an enhanced chapter on Action Research Examples of key concepts and ideas in all chapters highlight the texts practicability and step by step analyses of real research studies and End of chapter Problem Sheets comprehensive coverage of data analysis and how to prepare research proposals and reports make the text appropriate both for courses that focus on doing research and for those that stress how to read and understand research To keep students engaged the authors writing is simple and direct Clarifying examples summarizing charts tables and diagrams numerous illustrations of key concepts and ideas and a friendly two color design enhance the content This is the only copiously illustrated educational research text available Packaged with the text are an Interactive Student CD Rom and Student Workbook that provide practice opportunity and resources
