Community Change Practices Norman Walzer, Sam Cordes, 2017-10-02 The national recession forced many communities to examine new and innovative ways to promote local economic development, resulting in long-term community changes. New techniques and approaches were used to identify available opportunities and programs which could take advantage of development opportunities. A common theme among the contributions to this book is a focus on building leadership capacity, and several chapters discuss the successful practices which are aimed at bringing new leaders into local development efforts. Especially important are ways to identify youth and young adults and designing programs that bring them into active leadership roles within community development efforts. On a broader scale, several authors present material regarding building local entrepreneurship capacity and recognizing that entrepreneurs at different stages in their development have different training and support needs. The discussions in this book will help local policymakers and development practitioners better understand the various development techniques and find ways to build capacity within their community, stimulating development. This information will be especially useful for groups interested in engaging youth and populations who in the past have not been especially active in discussions about community and economic development. This book was originally published as a special issue of *Community Development*. *Social Work Research Methods* Teresa Morris, 2006-01-13 This is the first book to expand social work research methods to include alternative models and integrate these methodologies into general social work practice. Morris also describes research methods for post-positivism, critical theory, and constructivism in a straightforward and accessible style.
