Pirates Of Silicon Valley:

Pirates of Silicon Valley Martyn Burke, 2000 **The Pirates of Silicon Valley** Richard Aragon, 2024-02-28 In a world choked by corporate greed and environmental collapse the oceans have become a battleground Mega corporations strip mine the seabed their fleets guided by ruthless algorithms that calculate profit not sustainability Emilia Sato a brilliant AI researcher watches her creation an elegant code designed to understand the ocean's complex rhythms twisted into a tool for boundless exploitation Refusing to become an architect of her own obsolescence Emilia sparks a rebellion unlike any other She flees the sterile boardrooms assembling a crew of rogue geniuses and idealistic outcasts They set sail not in a sleek vessel but a monstrosity repurposed research ship its hull adorned with salvaged tech They are the Pirates of Silicon Valley hackers of the high seas fueled by desperation and a radical belief in redemption Their journey plunges them into a hidden world They decipher the bioluminescent language of ancient leviathans forge alliances in the echoing depths and battle terrifying creatures spawned by the unchecked experiments of humankind Armed with scavenged tech and forbidden knowledge they become rebels and reluctant warriors Yet the lines blur are they fighting to save the dying world or have they become harbingers of a new monstrous order where the ocean belongs not to humanity but to the code they wield and the leviathans they awaken *The Achiever's Code* Jack B. Ott, 2023-10-19 The Achiever's Code is a fast paced structured approach to life planning and an ideal curriculum for a mentoring relationship It's about ownership of purpose service to others and building legacy A blueprint for your life of achievement In a world that defines success as a mad scramble for money fame and power where bumper stickers declare Whoever dies with the most toys wins The Achiever's Code invites you to calm down take time to reflect and focus on what really matters to you Author Jack B Ott presents a 12 step process to help you break free from the cycle of frantic striving and start living on your own terms The book is full of real world examples stories and powerful action steps It shows you how to seize control of your future and live your own life of achievement An ideal curriculum for a mentoring relationship *Docudrama Performs the Past* Steven N. Lipkin, 2011-01-18 Docudramas films and movies of the week based on true stories offer their audiences performance as persuasion As docudramas recreate actual people and events these works perform their material The premises of docudramas persuasive arguments operate within the basic settings that stage performances of noteworthy events the events of war and the lives of noteworthy individuals In performing the past docudramas offer us a performance of memory Through docudramatic performance the memories of others become ours The performance of memory roots docudramatic representation in actuality and indicates the responsibility to serve the past that helps make docudrama a distinctive mode of representation The spirit of obligation to the past also frames the ethical considerations docudrama raises as performance in docudrama shapes public memory Docudrama Performs the Past examines the spectrum of arguments docudramas offer as their recreations reason from the arenas of events such as the hijacking of United Airlines Flight 93 wars ranging from World War II

to Iraq and the lives of actors athletes and politicians The case studies developed in each chapter show how docudrama s re creation of true stories its performance of memory warrants the claims it forwards about how to remember the past The aggregate of examining works made since the late 1990s allows us to see how as recurring contexts the arenas of docudramatic argument ground action and identity in the settings that frame performance structure the moral value of the contestation that ensues and shape the public memory of the past that docudramas perform

[The Oxford Handbook of the Archaeology of the Contemporary World](#) Paul Graves-Brown,Rodney Harrison,Angela Piccini,2013-10-17 It has been clear for many years that the ways in which archaeology is practised have

been a direct product of a particular set of social cultural and historical circumstances archaeology is always carried out in the present More recently however many have begun to consider how archaeological techniques might be used to reflect more directly on the contemporary world itself how we might undertake archaeologies of as well as in the present This Handbook is the first comprehensive survey of an exciting and rapidly expanding sub field and provides an authoritative overview of the newly emerging focus on the archaeology of the present and recent past In addition to detailed archaeological case studies it includes essays by scholars working on the relationships of different disciplines to the archaeology of the contemporary world including anthropology psychology philosophy historical geography science and technology studies communications and media ethnoarchaeology forensic archaeology sociology film performance and contemporary art This volume seeks to explore the boundaries of an emerging sub discipline to develop a tool kit of concepts and methods which are applicable to this new field and to suggest important future trajectories for research It makes a significant intervention by drawing together scholars working on a broad range of themes approaches methods and case studies from diverse contexts in different parts of the world which have not previously been considered collectively
