Politicians And Poachers The Political Economy Of Wildlife Policy In Africa:

Politicians and Poachers Clark C. Gibson, 1999-08-13 Although wildlife fascinates citizens of industrialized countries little is known about the politics of wildlife policy in Africa In this innovative book Clark Gibson challenges the rhetoric of television documentaries and conservation organizations to explore the politics behind the creation and change of wildlife policy in Africa This book examines what Clark views as a central puzzle in the debate Why do African governments create policies that apparently fail to protect wildlife Moving beyond explanations of bureaucratic inefficiency and corrupt dictatorships Gibson argues that biologically disastrous policies are retained because they meet the distributive goals of politicians and bureaucrats Using evidence from Zambia Kenya and Zimbabwe Gibson shows how institutions encourage politicians and bureaucrats to construct wildlife policies that further their own interests Different configurations of electoral laws legislatures party structures interest groups and traditional authorities in each country shape the choices of policymakers many of which are not consonant with conservation This book will appeal to students of institutions comparative politics natural resource policymaking African politics and wildlife conservationists

The Politics of Deforestation in Africa Nadia Rabesahala Horning, 2018-04-24 This book explores how environmental policies are made and enforced in Africa Specifically this project explains the gap between intent and impact of forest policies focusing on three African societies facing persistent deforestation today Madagascar Tanzania and Uganda The central claim of the study is that deforestation persists because conservation policies and projects which are largely underwritten by foreign donors consistently ignore the fact that conservation is possible only under limited and specific conditions To make the case the author examines how decision making power is negotiated and exercised where communities make environmental decisions daily local level and where environmental policies are negotiated and enacted national level across three distinct African political systems

The Political Economy of the American Frontier Ilia Murtazashvili, 2013-09-16 This book offers an analytical explanation for the origins of and change in property institutions on the American frontier during the nineteenth century Its scope is interdisciplinary integrating insights from political science economics law and history This book shows how claim clubs informal governments established by squatters in each of the major frontier sectors of agriculture mining logging and ranching substituted for the state as a source of private property institutions and how they changed the course of who received a legal title and for what price throughout the nineteenth century Unlike existing analytical studies of the frontier that emphasize one or two sectors this book considers all major sectors as well as the relationship between informal and formal property institutions while also proposing a novel theory of emergence and change in property institutions that provides a framework to interpret the complicated history of land laws in the United States

African Economies and the Politics of Permanent Crisis, 1979-1999 Nicolas Van de Walle, 2001-09-24 This Book explains why African countries have remained mired in a disastrous economic crisis since the late 1970s It shows that dynamics internal to African state

structures largely explain this failure to overcome economic difficulties rather than external pressures on these same structures as is often argued Far from being prevented from undertaking reforms by societal interest and pressure groups clientelism within the state elite ideological factors and low state capacity have resulted in some limited reform but much prevarication and manipulation of the reform process by governments which do not really believe that reform will be effective

The Supreme Court Tom S. Clark, 2019-03-14 Provides a quantitative history of the development of constitutional law in the United States during the past 150 years

Shocking Contrasts Ronald Rogowski, 2023-08-17 How do plagues blockades and world changing innovations change social and political institutions in some but not all societies

Partisan Bonds Jeffrey D. Grynawski, 2010-02-22 Political scientists have long painted American voters dependence on partisan cues at the ballot box as a discouraging consequence of their overall ignorance about politics Taking on this conventional wisdom Jeffrey D Grynawski advances the provocative theory that voters instead rely on these cues because party brand names provide credible information about how politicians are likely to act in office despite the weakness of formal party organization in the United States Among the important empirical implications of his theory which he carefully supports with rigorous data analysis are that voter uncertainty about a party s issue positions varies with the level of party unity it exhibits in government that party preferences in the electorate are strongest among the most certain voters and that party brand names have meaningful consequences for the electoral strategies of party leaders and individual candidates for office

Trading Spaces Sonal S. Pandya, 2013-12-16 This book is the first comprehensive study of foreign direct investment FDI liberalization Political economy FDI research has long focused on how host country politics influence the supply of FDI or how firms choose to invest By contrast this book focuses on the politics of FDI demand the sources of citizens preferences for FDI inflows and countries foreign ownership restrictions Professor Sonal S Pandya s theory of FDI regulation identifies how FDI redistributes income within host countries raises local wages and creates competition for local firms Empirical tests also emphasize the central role of multinational cooperations productive assets in shaping the politics of FDI These tests feature an original dataset of annual country industry foreign ownership regulations that spans more than one hundred countries

during the period 1970 2000 This book highlights the economic and political foundations of global economic integration and supplies the tools to understand the growing economic conflicts between advanced economics and large emerging markets such as China and India

Community Rights, Conservation and Contested Land Fred Nelson, 2010-08-12 Natural resource governance is central to the outcomes of biodiversity conservation efforts and to patterns of economic development particularly in resource dependent rural communities The institutional arrangements that define natural resource governance are outcomes of political processes whereby numerous groups with often divergent interests negotiate for access to and control over resources These political processes determine the outcomes of resource governance reform efforts such as widespread attempts to decentralize or devolve greater tenure over land and resources to local communities This volume examines the political dynamics of natural resource governance processes through a range of comparative case studies across east and southern Africa These cases include both local and national settings and examine issues such as land rights tourism development wildlife conservation participatory forest management and the impacts of climate change and are drawn from both academics and field practitioners working across the region Published with IUCN The Bradley Fund for the Environment SASUSG and Norwegian Ministry of Foreign Affairs

Parks in Transition Brian Child, 2013-06-17 Parks face intense pressure from both environmental and developmental perspectives to conserve biodiversity and provide economic opportunities for rural communities These imperatives are often in conflict while potential solutions may be subject to theoretical and practical disagreement and complicated by pressing economic political and cultural considerations Parks in Transition collects the work of the most distinguished scholars and practitioners in this field drawing on insight from over 50 case studies and synthesizing them into lessons to guide park management in transitional economies where the challenges of poverty and governance can be severe The central message of the book is that parks are common property regimes that are supposed to serve society It analyses and sheds light on the crucial questions arising from this perspective If parks are set aside to serve poor people should conservation demands over rule demands for jobs and economic growth Or will deliberately using parks as bridgeheads for better land use and engines for rural development produce more and better conservation The issue that arises at all levels is that of accountability including the problematic linkages between park authorities and political systems and the question of how to measure park performance This book provides vital new insights for park management regarding the relationship between conservation and commercialization performance management new systems of governance and management and linkages between parks landscape and the land use economy

Social Choice and Legitimacy John W. Patty, Elizabeth Maggie Penn, 2014-07-31 Governing requires choices and hence trade offs between conflicting goals or criteria This book asserts that legitimate governance requires explanations for such trade offs and then demonstrates that such explanations can always be found though not for every possible choice In so doing John W. Patty and Elizabeth Maggie Penn use the tools of social choice theory to provide a new and discriminating theory of

legitimacy In contrast with both earlier critics and defenders of social choice theory Patty and Penn argue that the classic impossibility theorems of Arrow Gibbard and Satterthwaite are inescapably relevant to and indeed justify democratic institutions Specifically these institutions exist to do more than simply make policy through their procedures and proceedings these institutions make sense of the trade offs required when controversial policy decisions must be made **Voter Turnout** Meredith Rolfe,2012-02-13 This book develops and empirically tests a social theory of political participation It overturns prior understandings of why some people such as college degree holders churchgoers and citizens in national rather than local elections vote more often than others The book shows that the standard demographic variables are not proxies for variation in the individual costs and benefits of participation but for systematic variation in the patterns of social ties between potential voters Potential voters who move in larger social circles particularly those including politicians and other mobilizing actors have more access to the flurry of electoral activity prodding citizens to vote and increasing political discussion Treating voting as a socially defined practice instead of as an individual choice over personal payoffs a social theory of participation is derived from a mathematical model with behavioral foundations that is empirically calibrated and tested using multiple methods and data sources From Conflict to Coalition Adam Dean,2016-09-08 This book studies the conditions under which labor and capital collaborate in support of the same trade policies Constraining Dictatorship Anne Meng,2020-08-20 Examining constitutional rules and power sharing in Africa reveals how some dictatorships become institutionalized rule based systems **The Limits of Judicial Independence** Tom S. Clark,2010-11-22 This book investigates the causes and consequences of congressional attacks on the US Supreme Court arguing that the extent of public support for judicial independence constitutes the practical limit of judicial independence First the book presents a historical overview of Court curbing proposals in Congress Then building on interviews with Supreme Court justices members of Congress and judicial and legislative staffers the book theorizes that congressional attacks are driven by public discontent with the Court From this theoretical model predictions are derived about the decision to engage in Court curbing and judicial responsiveness to Court curbing activity in Congress The Limits of Judicial Independence draws on illustrative archival evidence systematic analysis of an original dataset of Court curbing proposals introduced in Congress from 1877 onward and judicial decisions *Neoliberalism, Civil Society and Security in Africa* P. Carmody,2007-10-17 Free market policies have been in operation across Africa for the past 25 years yet they have failed to reverse deepening poverty This book explores with case studies why such policies continue to be implemented and the ways in which they have been reinvented by socialization depoliticization regionalization and securitization Environmental Social Sciences Ismael Vaccaro,Eric Alden Smith,Shankar Aswani,2010-11-11 The relationship between human communities and the environment is extremely complex In order to resolve the issues involved with this relationship interdisciplinary research combining natural sciences social sciences and humanities is necessary In this 2010 book specialists summarise methods and research

strategies for various aspects of social research devoted to environmental issues Each chapter is illustrated with ethnographic and environmental examples ranging from Australia to Amazonia from Madagascar to the United States and from prehistoric and historic cases to contemporary rural and urban ones It deals with climate change deforestation environmental knowledge natural reserves politics and ownership of natural resources and the effect of differing spatial and temporal scales Contributing to the intellectual project of interdisciplinary environmental social science this book shows the possibilities social science can provide to environmental studies and to larger global problems and thus will be of equal interest to social and natural scientists and policy makers
