

Both men and women wear jewelry, including brooches to hold their cloaks in place. Snake bracelets are popular, as are gold necklaces set with precious stones.

Sightseers' tip

For women, a pale face is a status symbol. Poor women have rough, red faces from working outside. Use creams that contain flour, chalk, and lead to whiten your skin.

A fashionable Roman woman takes great care with her clothes. She first puts on an ankle-length woollen undertunic, with a colorful embroidered dress, or *stola*, on top. This can be made of wool, cotton, or silk. She then places a beautiful jeweled girdle around her waist. Wealthy men wear long tunics. Poorer men and slaves have shorter tunics, which give them more freedom as they work.

Dressing Judeans and Christians in Antiquity Kristi Upson-Saia, Carly Daniel-Hughes, Alicia J. Batten, 2016-05-13 The past two decades have witnessed a proliferation of scholarship on dress in the ancient world These recent studies have established the extent to which Greece and Rome were vestimentary cultures and they have demonstrated the critical role dress played in communicating individuals identities status and authority Despite this emerging interest in ancient dress little work has been done to understand religious aspects and uses of dress This volume aims to fill this gap by examining a diverse range of religious sources including literature art performance coinage economic markets and memories Employing theoretical frames from a range of disciplines contributors to the volume demonstrate how dress developed as a topos within Judean and Christian rhetoric symbolism and performance from the first century BCE to the fifth century CE Specifically they demonstrate how religious meanings were entangled with other social

logics revealing the many layers of meaning attached to ancient dress as well as the extent to which dress was implicated in numerous domains of ancient religious life

Style and Function in Roman Decoration Ellen Swift, 2018-04-19 This important book puts forward a new interpretation of Roman decorative art focusing on the function of decoration in the social context. It examines the three principal areas of social display and conspicuous consumption in the Roman world: social space, entertainment, and dress, and discusses the significance of the decoration of objects and interiors within these contexts, drawing examples from both Rome and its environs and the Western provinces from the early Imperial period to Late Antiquity. Focusing on specific examples including mosaics and other interior décor, silver plate, glass, and pottery vessels, and jewellery and other dress accessories, Swift demonstrates the importance of decoration in creating and maintaining social networks and identities and fostering appropriate social behaviour and its role in perpetuating social convention and social norms. It is argued that our understanding of stylistic change and the relationship between this and the wider social context in the art of the Roman period is greatly enhanced by an initial focus on the particular social relationships fostered by decorated objects and spaces. The book demonstrates that an examination of so-called minor art is fundamental in any understanding of the relationship between art and its social context and aims to reinvigorate debate on the value of decoration and ornament in the Roman period and beyond.

Small Finds and Ancient Social Practices in the Northwest Provinces of the Roman Empire Stefanie Hoss, Alissa Whitmore, 2016-07-31 Small finds, the stuff of everyday life, offer archaeologists a fascinating glimpse into the material lives of the ancient Romans. These objects hold great promise for unravelling the ins and outs of daily life, especially for the social groups, activities, and regions for which few written sources exist. Focusing on amulets, brooches, socks, hobnails, figurines, needles, and other mundane artefacts, these 12 papers use small finds to reconstruct social lives and practices in the Roman Northwest provinces. Taking social life broadly, the various contributions offer insights into the everyday use of objects to express social identities, Roman religious practices in the provinces, and life in military communities. By integrating small finds from the Northwest provinces with material, iconographic, and textual evidence from the whole Roman empire, contributors seek to demystify Roman magic and Mithraic religion, discover the latest trends in ancient fashion, socks with sandals, explore Roman interactions with Neolithic monuments, and explain unusual finds in unexpected places. Throughout, the authors strive to maintain a critical awareness of archaeological contexts and site formation processes to offer interpretations of past peoples and behaviors that most likely reflect the lived reality of the Romans. While the range of topics in this volume gives it wide appeal, scholars working with small finds, religion, dress, and life in the Northwest provinces will find it especially of interest.

Small Finds and Ancient Social Practices grew out of a session at the 2014 Theoretical Roman Archaeology Conference.

UnRoman Britain Miles Russell, Stuart Laycock, 2011-09-30 When we think of Roman Britain, we tend to think of a land of togas and richly decorated palaces, with Britons happily going about their much-improved daily business under the benign gaze of Rome. This image is to

a great extent a fiction In fact Britons were some of the least enthusiastic members of the Roman Empire A few adopted roman ways to curry favour with the invaders A lot never adopted a Roman lifestyle at all and remained unimpressed and riven by deep seated tribal division It wasn't until the late third early fourth century that a small minority of landowners grew fat on the benefits of trade and enjoyed the kind of lifestyle we have been taught to associate with period Britannia was a far away province which whilst useful for some major economic reserves fast became a costly and troublesome concern for Rome much like Iraq for the British government today Huge efforts by the state to control the hearts and minds of the Britons were met with at worst hostile resistance and rebellion and at best by steadfast indifference The end of the Roman Empire largely came as business as usual for the vast majority of Britons as they simply hadn't adopted the Roman way of life in the first place

Parisi Peter Halkon, 2013-10-01 The Parisi were a tribe located somewhere within the present day East Riding of Yorkshire UK known from a brief reference by Ptolemy They were originally immigrants from Gaul and share their name with the tribe that occupied modern day France Fairly obvious from their name they gave the French capital its name The investigation of the Parisi began in the sixteenth and seventeenth centuries following the trend for antiquarian exploration elsewhere in Britain Before that the remains of Roman buildings encountered in medieval East Yorkshire were treated with little respect and used as a resource The Parisi tells this captivating story of the history of the archaeology of The Parisi from the initial investigations in the sixteenth century right through to modern day investigations

The Inner Lives of Ancient Houses Jennifer A. Baird, 2014 Dura Europos on the Syrian Euphrates is one of the best preserved and most extensively excavated sites of the Roman world A Hellenistic foundation later held by the Parthians and then the Romans Dura had a Roman military garrison installed within its city walls before it was taken by the Sasanians in the mid third century The Inner Lives of Ancient Houses is the first study to consider the houses of the site as a whole The houses were excavated by a team from Yale and the French Academy of Inscriptions and Letters in the 1920s and 30s and though a wealth of archaeological and textual material was recovered most of that relating to housing was never published Through a combination of archival information held at the Yale University Art Gallery and new fieldwork with the Mission Franco Syrienne d'Europos Doura this study re-evaluates the houses of the site integrating architecture artefacts and textual evidence and examining ancient daily life and cultural interaction as well as considering houses which were modified for use by the Roman military

Technology in Transition A.D. 300-650 Luke Lavan, Enrico Zanini, Alexander Sarantis, 2008-03-31 This book is the first general work to be published on technology in Late Antiquity It seeks to survey aspects of the technology of the period and to respond to questions about technological continuity stagnation and decline The book opens with a comprehensive bibliographic essay that provides an overview of relevant literature The main section then explores technologies in agriculture production metal ceramics and glass engineering and building Papers draw on both archaeological and textual sources and on analogies with medieval and early modern technologies Reference is made not only to the periods which preceded it but to the transition to

the Early Middle Ages and to the technological heritage of Late Antiquity to the Islamic world Several papers focus on Italy whilst others consider North Africa Asia Minor and the Near East

The Oxford Handbook of the Archaeology of Roman Germany Simon James, Stefan Krmnicek, 2020 This Handbook makes the work of modern German and overwhelmingly German language scholarship on the archaeology of Roman Germany available in English presenting the latest developments in current research and providing a truly international perspective on the topic

Reading a Dynamic Canvas Cynthia S. Colburn, Maura K. Heyn, 2021-02-03 Personal adornment as an extension of the body is a crucial component in social interaction The active process of adorning the body can shape embodied identities such as social status ethnicity gender and age As a result of its dynamic and performative nature the body can often convey meaning more powerfully and convincingly than verbal communication Yet adornment is not easily read and does not necessarily reflect actual lived experience Rather bodily adornment and the performances that accompany it can be manipulated to conceal or exaggerate reality thus speaking more to identity discourse The interpretation of such discourse must be grounded in an understanding of the context specific and negotiable nature of adornment The essays in this volume which are united by their focus on material and visual evidence cover a broad chronological and geographical span from the ancient Near East to Roman Britain and bring together innovative scholarly work on adornment by an international group of art historians and archaeologists This attention to the archaeological evidence makes the volume a valuable resource as those working with material or visual culture face unique methodological and theoretical challenges to the study of adornment

The Ruin of Roman Britain James Gerrard, 2013-10-10 This book employs new archaeological and historical evidence to explain how and why Roman Britain became Anglo Saxon England

Dress and Personal Appearance in Late Antiquity Faith Pennick Morgan, 2018-01-22 This book examines the dress and personal appearance of members of the middle and lower classes in the eastern Mediterranean region during the 4th to 8th centuries Written art historical and archaeological evidence is assessed with a view to understanding the way that cloth and clothing was made embellished cared for and recycled during this period Beginning with an overview of current research on Roman dress the book looks in detail at the use of apotropaic and amuletic symbols and devices on clothing before examining sewing and making methods the textile industry and the second hand clothing trade The final chapter includes detailed information on the making and modelling of exact replicas based on extant garments
