**Italy's Sorrow** James Holland, 2008-04-01 In a chilling history renowned historian James Holland deftly relates Italy's dark forgotten years During the Second World War the campaign in Italy was the most destructive fought in Europe a long bitter and highly attritional conflict that raged up the country's mountainous leg For frontline troops casualty rates at Cassino and along the notorious Gothic Line were as high as they had been on the Western Front in the First World War There were further similarities too blasted landscapes rain and mud and months on end with the front line barely moving And while the Allies and Germans were fighting it out through the mountains the Italians were engaging in bitter battles too Partisans were carrying out a crippling resistance campaign against the German troops but also battling the Fascists forces as well in what soon became a bloody civil war Around them innocent civilians tried to live through the carnage terror and anarchy while in the wake of the Allied advance horrific numbers of impoverished and starving people were left to pick their way through the ruins of their homes and country In the German occupied north there were more than 700 civilian massacres by German and Fascist troops in retaliation for Partisan activities while in the south many found themselves forced into making terrible and heart rending decisions in order to survive Although known as a land of beauty and for the richness of its culture Italy's suffering in 1944 1945 is now largely forgotten Italy's Sorrow by James Holland is the first account of the conflict there to tell the story from all sides and to include the experiences of soldiers and civilians alike Offering extensive original research it weaves together the drama and tragedy of that terrible year including new perspectives and material on some of the most debated episodes to have emerged from World War II

**Mussolini's Propaganda Abroad** Manuela Williams, 2006-11-22 This is the first major study in English of Fascist Italy's overseas propaganda Using rare Italian and French captured documents this is also the first investigation into the relationship between Mussolini's regime and Arab nationalist movements This new account covers propaganda and subversive activities

engineered by the Italian government in the Mediterranean and the Middle East from 1935 until 1940 when Italy entered the war. It assesses the nature of the challenge brought by the Fascist regime to British security and colonial interests in the region. Fascist propaganda in particular in the Arab Middle East must be regarded as an expression of Mussolini's foreign policy and his attempts to build an Italian empire that would stretch beyond the Mediterranean, gaining control over the exits Gibraltar and Suez, which were in the hands of the British and the French. The activities of individual agents and organizations are carefully reconstructed and analyzed to highlight the seemingly contradictory objectives of the Italian government on the one hand. Rome was courting the Arab nationalist movements in Egypt and Palestine, which were seeking the support of external forces capable of providing political, financial, and military backing needed to overthrow foreign rulers. On the other hand, the regime was promoting further territorial expansion in Africa. These aspects build into an excellent picture of this fascinating period of modern history. This book will be of great interest to all students and scholars of politics, media, Italian history, and propaganda.

*Secrecy and Publicity in Votes and Debates* Jon Elster, 2015-06-26. In the spirit of Jeremy Bentham's *Political Tactics*, this volume offers the first comprehensive discussion of the effects of secrecy and publicity on debates and votes in committees and assemblies. The contributors, sociologists, political scientists, historians, and legal scholars, consider the micro technology of voting: the devil is in the detail, the historical relations between the secret ballot and universal suffrage, the use and abolition of secret voting in parliamentary decisions, and the sometimes perverse effects of the drive for greater openness and transparency in public affairs. The authors also discuss the normative questions of secret versus public voting in national elections and of optimal mixes of secrecy and publicity, as well as the opportunities for strategic behavior created by different voting systems. Together with two previous volumes on *Collective Wisdom* (Cambridge 2012) and *Majority Decisions* (Cambridge 2014), the book sets a new standard for interdisciplinary work on collective decision making.
