

HISTORICAL PERSPECTIVE OF SECURITIES LAWS

M S SAHOO*

The two exclusive legislations that governed the securities market till early 1992 were the Capital Issues (Control) Act, 1947 (CICA) and the Securities Contracts (Regulation) Act, 1956 (SCRA). The CICA had its origin during the war in 1943 when the objective was to channel resources to support the war effort. Control of capital issues was introduced through the Defence of India Rules in May 1943 under the Defence of India Act, 1939. The control was retained after the war with some modifications as means of controlling the raising of capital by companies and to ensure that national resources were channelled into proper lines, i.e., for desirable purposes to serve goals and priorities of the government, and to protect the interests of investors. The relevant provisions in the Defence of India Rules were replaced by the Capital Issues (Continuance of Control) Act in April 1947. This Act was made permanent in 1956 and enacted as the Capital Issues (Control) Act, 1947. Under the Act, the Controller of Capital Issues was set up which granted approval for issue of securities and also determined the amount, type and price of the issue. This Act was, however, repealed in 1992 as a part of liberalization process to allow the companies to approach the market directly provided they issue securities in compliance with prescribed guidelines relating to disclosure and investor protection.

Though the stock exchanges were in operation, there was no legislation for their regulation till the Bombay Securities Contracts Control Act was enacted in 1925. This was, however, deficient in many respects. Under the constitution which came into force on January 26, 1950, stock exchanges and forward markets came under the exclusive authority of the Central Government. The Government appointed the A. D. Gorwala Committee in 1951 to formulate a legislation for the regulation of the stock exchanges and of contracts in securities. Following the recommendations of the Committee, the SCRA was enacted in 1956 to provide for direct and indirect control of virtually all aspects of securities trading and the running of stock exchanges and to prevent undesirable transactions in securities. It has undergone several modifications since its enactment and even today an amendment is awaiting approval of the Parliament. It gives Central Government regulatory jurisdiction over (a) stock exchanges through a process of recognition and continued supervision, (b) contracts in securities, and (c) listing of securities on stock exchanges. As a condition of recognition, a stock exchange complies with conditions prescribed by Central Government. Organised trading activity in securities is permitted on recognised stock exchanges.

The authorities have been quite sensitive to requirements of the development of securities market, so much so that the last decade (1992-2003) witnessed nine special legislative interventions, including two new enactments, namely the Securities and Exchange Board of India (SEBI) Act, 1992 and the Depositories Act, 1996. The SCRA, the SEBI Act and the Depositories Act were amended six, five and three times respectively during the same period. The developmental need was so urgent at times, that the last decade witnessed five ordinances relating to securities laws. Besides, a number of other legislations (the Income Tax Act, the Companies Act, the Indian Stamps Act, the Bankers' Book Evidence Act, the Benami Transactions (Prohibition) Act etc.) having bearing on securities markets have been amended in the recent past to complement amendments in securities laws.

The legal reforms began with the enactment of the SEBI Act, 1992, which established SEBI with statutory responsibilities to (i) protect the interest of investors in securities, (ii) promote the development of the securities market, and (iii) regulate the securities market. This was followed by repeal of the Capital Issues (Control) Act, 1947 in 1992 which paved way for market determined allocation of resources. Then followed the Securities Laws (Amendment) Act in 1995, which extended SEBI's jurisdiction over corporates in the issuance of capital and transfer of securities, in addition to all intermediaries and persons associated with securities market. It empowered SEBI to appoint adjudicating officers to adjudicate wide range of violations and impose monetary penalties

Perspectives on Private Law Europeanisation Annina H Persson, Eleonor Kristoffersson, 2017-01-12 As part of the European integration an ambitious programme of harmonisation of European private law is taking place This new edition in the Swedish Studies in European Law series the work of both legal scholars and politicians aims to create a modern codification in the tradition of the great continental codifications such as the BGB and the Code Civil A significant step towards this development was taken in 2009 with the creation of the Draft Common Frame of Reference which contains model rules for a large part of central private law The process raises a number of questions What are the advantages and disadvantages of such an intensive process of harmonisation Are there lessons to be learnt from the Europeanisation of private law through history Are there any further steps which have been taken in order to create a European private law What is the future of European private law These crucial questions were discussed at a conference in Stockholm sponsored by the Swedish Network of European Legal Studies This important volume includes the answers offered by leading scholars in the field **Regulatory Perspectives on the Obama Administration's Financial Regulatory Reform Proposals**

United States. Congress. House. Committee on Financial Services, 2010 **Research Handbook on Insider Trading**

Stephen M. Bainbridge, 2025-01-09 This thoroughly revised second edition skilfully provides an updated and extensive overview of cutting edge research on insider trading the most common violation of securities law It presents legal economic and empirical studies from Australasia the Middle East Europe and North America *Regulatory Perspectives on the Obama Administration's Financial Regulatory Reform Proposals, Part I, Serial No. 111-66, July 22, 2009, 111-1 Hearing, **, 2010 The Evolution of Legal Business Forms in Europe and the United States Erik M. Vermeulen, 2003-01-01 The evolution of partnership forms is stimulated by powerful economic forces that can lead to widespread prosperity and wealth creation for a society Given the importance of closely held firms in the United States and Europe The Evolution of Legal Business Forms in Europe and the United States argues that partnership law should trouble itself less with historical and descriptive arguments about the legal rules and structure of the partnership form and focus much more on the new analytical apparatus of the economics of organizational form as well the fundamental economic learning that informs the debates on limited liability partnership rules regarding management and control conflict resolution and fiduciary duties Introducing and extending the best available theories from law and economics particularly those from the theory of the firm This book's analysis demonstrates that the patterns of European partnership law and its recent history are best understood from an economic and comparative law perspective By examining the economic theories of the firm and the economics of organization choice The Evolution of Legal Business Forms in Europe and the United States conceives partnership type business forms as contractual entities The key feature of the modern partnership form is that partners have significant flexibility and power to limit their liability transfer all of their rights and to freely exit the firm Another key feature of partnership law is the insight that lawmakers should provide the rules and enforcement mechanisms to regulate the important relationships within the partnership This book applies an efficiency test to determine which sets of default rules are likely to resolve the main problems in partnerships Having identified partnership law with the economic theory of organization The Evolution of Legal Business Forms in Europe and the United States then goes to argue that most of partnership law is directed at offering bundles of legal rules for different types of firms Lawmakers should promote partnership rules that attract investors and can be expected to be efficient if they allow entrepreneurs to freely select the bundle of rules that best match their priorities In a modern vision of partnership law lawmakers promote economic welfare through creating non mandatory rules that allow multiple businesses to switch to a favourable business form without significant costs Jurisdictions plagued by falling incorporations and low levels of small and medium business activity should abandon the mandatory and standardized framework and the lock in effect that it promotes and focus on the mechanisms of legal evolution and rules that tend to mimic the market This innovation work will have ramifications felt across European jurisdictions and will be debated by a large audience of policymakers and academic lawyers involved in law reform Moreover the book will receive serious attention from students of law and economics as well as practising lawyers involved in resolving

complex issues of organizational law Review s Vermeulen s work makes a significant contribution to the dialogue between legal scholars and policy makers from Europe and the United States on the matter of business entity law reform The volume is ambitious in scope thoughtful in approach and accurate in result It shows a well read and nuanced view of the recent American partnership law reform debates He moves with assurance between different systems of law and analysis and has a confident sense of what his diverse readers need to know to come to the ultimate discussion with a common sense of the issues and alternatives at hand Vermeulen s work should serve as a starting point for a robust discussion among scholars and policy makers
