Security In East Asia:

Rethinking Security in East Asia J. J. Suh, Peter J. Katzenstein, Allen Carlson, 2004 Is East Asia heading towards war This text makes a case for a new theoretical approach called analytical eclecticism by the authors to the study of Asian security

Identities and Security in East Asia Koro Bessho, 2013-09-13 East Asia has been relatively free from large scale conflict in the 1990s but the absence of security organisations or even of a sense of community within the region has raised doubts about its future security China and Japan are likely to bear much of the responsibility for maintaining stability but both countries have been reluctant to adopt a leadership role South east Asian states have been willing to take the initiative outside of their sub region but they possess neither the resources nor the authority to lead the whole of East Asia In the long term the ability to organise the region depends on greater clarity in the identity of leading states in the region and of the region as a whole This paper analyses the way in which issues of identity have affected the actions of the key players and assesses future challenges and possibilities in the search for regional security It concludes that Through the Association of South East Asian Nations ASEAN South east Asian states have developed a sense of confidence and unity However ASEAN s need to safeguard its newly acquired identity means that it has not exported the ASEAN way to the wider region of East Asia or the Asia Pacific The greater diversity that enlargement will bring and the effects of the crisis since 1997 are likely to make the Association s defensive instincts still more resistant to change In the 1990s Japan has sought to redefine its identity both in terms of its past and of its post war values such as pacifism and human rights This process has compelled Japan to face Asia more squarely and has increased the country s self assurance As a result it may become more willing to take the initiative in political and security as well as economic areas For China nationalism has become more important just as communism s position as the country s unifying ideology has eroded Beijing has tried to change the status quo in a forceful way By the close of the 1990s however China has become increasingly willing to act as a responsible world power A key test of this transformation will be Beijing s treatment of the Taiwan question The prospects for regional stability depend on Japan s ability to reform and return to growth The most pressing task is to revitalise East Asia s economies A return to prosperity would encourage China s reform and opening process lessen Japan s introspection make disagreements between the South east Asian states less acute and allow the Asia Pacific region as a whole to move beyond both the triumphalism of the East Pacific and the resentment of the West

Human Security Benny Teh Cheng Guan, 2012-01-02 Human security is becoming increasingly pronounced in recent years due to changes in the security landscape of world politics Yet inter state relations have continued to dominate security concerns in East Asia This has unfortunately eluded the broader understanding of issues and challenges facing the peoples of East Asia Home to nations with rapid economic growth and development East Asia is at the core of what some individuals have termed as the coming Asian Century Years of economic liberalization and exposure to globalization have permitted the region to achieve high levels of interconnectedness from within and without in

unprecedented ways This has certainly reduced state control and opened up spaces for cross border human activities While economic wealth have increased substantially over the years it has also brought about bigger income disparities unsustainable safety nets and a surge in social problems from health issues to migratory concerns that threaten the safety and well being of individuals Human Security Securing East Asia s Future timely examines the fundamental issues causing human insecurities and evaluates the extent of which human security plays a role at the state and regional levels Covering the different areas of threats to humans and applying case study materials this volume provides an intellectual mix of perspectives that captures the relationship between people state and region This book will be of interest to those studying traditional and non traditional security threats Asian human development and critical policy analysis *Non-Traditional Security in East Asia* Ramon Pacheco Pardo, Jeffrey Reeves, 2015-06 In a changing security environment shaken by the United States pivot to Asia China s rise growing economic interdependence new institutional frameworks and long standing tensions regional security dynamics within East Asia have changed profoundly Non Traditional Security in East Asia assesses how and why these and other developments have affected East Asian security regimes in the early 21st Century This volume brings together experts in different areas of traditional and non traditional security ranging from arms and weapons proliferation to climate change and biosecurity to analyze the recent evolution current state and possible future of East Asian security dynamics which have been built on dynamics dating back to the Cold War This volume s holistic exploration of East Asian security makes it a sophisticated introduction for students researchers and policymakers who are interested in East Asian security and international relations **The Protection and Promotion of Human Security in East Asia** B. Howe, 2013-10-01 Although many of the states of East Asia have achieved startling success not all have benefited from the region s development Many of the most vulnerable sections of East Asian populations still face tremendous challenges in their daily lives have yet to enjoy the rewards of the Asian Century and may even be further imperiled as a result of the forces of development Brendan Howe examines the measurements of success in East Asian development and governance from a human centered perspective He assesses obstacles to the protection and promotion of human security and development through detailed case studies of the most challenged states in the region including Burma Timor Leste Japan and North and South Korea He looks at the roles that East Asian actors can play and have been playing in protecting and promoting human security at the theoretical and practical level **The Changing East Asian Security Landscape** Stefan Fröhlich, Howard Loewen, 2017-11-14 The topic of this book deals with a highly relevant empirical issue East Asian security and the dynamics of the respective governance structure or architecture are not only of regional but of global concern Since the pivot of the American pivot to East Asia and other external actor s responses to it the security architecture has changed in form size and function In order to analyze and explain these changes hypotheses derived from IR middle range theories i e soft and hard balancing will be applied to cases of bilateral and multilateral security governance in East Asia **The United**

States Security Strategy for the East Asia-Pacific Region ,1998 **Changing Security Dynamic in Eastern Asia** N. S. Sisodia,G. V. C. Naidu,2005 Proceedings of the 7th Asian Security Conference held at New Delhi in January 2005 A *Rising China and Security in East Asia* Rex Li,2008-11-21 A Rising China and Security in East Asia provides a systematic and in depth analysis of the security discourse of Chinese elites on the major powers in East Asia namely the US Japan and Russia and how China perceives their global security strategy Chinese-Japanese Competition and the East Asian Security Complex Jeffrey Reeves,Jeffrey Hornung,Kerry Lynn Nankivell,2017-07-14 This edited volume examines contemporary diplomatic economic and security competition between China and Japan in the Asia Pacific region focusing on their respective foreign policies under President Xi Jinping and Prime Minister Shinz Abe and regional security dynamics within and between Asian states institutions **United States Security Strategy for the East Asia-Pacific Region** ,1995

Human Security Norms in East Asia Yoichi Mine,Oscar A. Gómez,Ako Muto,2018-12-06 This book reveals how the idea of human security combined with other human centric norms has been embraced criticized modified and diffused in East Asia ASEAN Plus Three Once we zoom in to the regional space of East Asia we can see a kaleidoscopic diversity of human security stakeholders and their values Asian stakeholders are willing to engage in the cultural interpretation and contextualization of human security underlining the importance of human dignity in addition to freedom from fear and from want This dignity element together with national ownership may be the most important values added in the Asian version of human security

Issues of Security in East Asia in Post-cold War Era Seiji Endō,1994 *Korea and East Asia* Rüdiger Frank,John Swenson-Wright,2012-10-04 Will the twenty first century be the Asian century Will the People s Republic of China overtake the United States as the leading global superpower Will an armed conflict break out on the Korean peninsula and can it be contained While opinions differ strongly there seems to be a certain consensus that the East Asian region roughly defined as Northeast Asia China the two Koreas Japan and the Russian Far East plus Southeast Asia ASEAN will be ever more globally significant in the years to come This book critically addresses the potential of the liberal concept of collective security to provide a solution with a focus on the Korean peninsula **Human Security in East Asia** Sorpong Peou,2008-11-19 Since the end of the Cold War the number of interstate wars has remained relatively low although whilst states may be more secure than ever this does not mean that individual human beings are too This has led to a growing recognition of the importance of human security in contrast to the traditional realist focus on state security This book explores human security in East Asia focusing in particular on the challenges to collaboration among actors involved in the process of human security promotion It examines the theoretical complexities of conceptual arguments about human security drawing on the ideas of scholars from Asia and the West to provide a global perspective on what causes human insecurity and how security can best be achieved It considers in detail case studies of military interventions in East Asia in particular East Timor and assesses how successful collaborative efforts have been in providing human security It also explores case studies of non military intervention

including international criminal justice in Cambodia and East Timor It discusses the relationship of regional great powers such as China and Japan to human security promotion arguing that it will be better served if these powers engage less in the traditional game of geopolitics and if human security objectives do not work against actors interests It shows how interventions to uphold human security have not always succeeded to the extent that was hoped despite the best of intentions and considers how improved collaboration can be achieved so that future interventions enjoy more consistent success

Japanese Policy and East Asian Security Taketsugu Tsurutani, 1981 Changing Security Dynamics in East Asia Elena Atanassova-Cornelis, Frans-Paul van der Putten, 2016-04-30 This original and detailed collection explores how regional actors deal with uncertainties that are inherent to the current geopolitical situation in East Asia The contributors collectively demonstrate that strategic uncertainty has become a major factor in the shaping of the security order in East Asia **The Nexus of Economics, Security, and International Relations in East Asia** Avery Goldstein, Edward D.

Mansfield, 2012-08-29 While over the last 30 years the global economy's center of gravity has shifted to East Asia the region has remained surprisingly free of interstate military conflict Yet this era of peace and growth has been punctuated by periodic reminders of enduring security problems in the region from China's military modernization to unresolved territorial disputes to persistent tensions on the Korean peninsula This volume is one of the first to treat these issues of economics and security as interconnected rather than separate Its authors leading scholars from the U S and China shed new light on this important nexus by applying insights from a rich variety of approaches to explore and explain the dynamics of a region whose importance for students of both international political economy and international security has grown dramatically They show that both economic and security fundamentals matter if one is to understand the reasons for and evaluate the durability of East Asia's recent peace and prosperity *East Asia, the West and International Security* Robert O'Neill, 1987-06-18

Human Security and Cross-Border Cooperation in East Asia Carolina G. Hernandez, Eun Mee Kim, Yoichi Mine, Ren Xiao, 2018-09-01 This book takes up a wide variety of human security challenges beyond the dimension of human conflict and looks at both natural and human disasters that the East Asian region faces or is attempting to resolve While discussing various human security issues the case studies offer practical lessons to address serious human security challenges in the framework of the ASEAN Plus Three and beyond Against the backdrop of multifaceted globalization and parochial reactions thereto this book is a powerful contribution to universal human security
