Privacy in the Information Society Philip Leith, 2016-12-05 Information society projects promise wealth and better services to those countries which digitise and encourage the consumer and citizen to participate As paper recedes into the background and digital data becomes the primary resource in the information society what does this mean for privacy Can there be privacy when every communication made through ever developing ubiquitous devices is recorded Data protection legislation developed as a reply to large scale centralised databases which contained incorrect data and where data controllers denied access and refused to remedy information flaws Some decades later the technical world is very different one and whilst data protection remains important the cries for more privacy oriented regulation in commerce and eGov continue to rise What factors should underpin the creation of new means of regulation The papers in this collection have been drawn together to develop the positive and negative effects upon the information society which privacy regulation implies

Wang, 2012-12-06 Since its inception by Professor Lotfi Zadeh about 18 years ago the theory of fuzzy sets has evolved in many directions and is finding applications in a wide variety of fields in which the phenomena under study are too complex or too ill defined to be analyzed by conventional techniques Thus by providing a basis for a systematic approach to approximate reasoning and inexact inference the theory of fuzzy sets may well have a substantial impact on scientific methodology in the years ahead particularly in the realms of psychology economics engineering law medicine decision analysis information retrieval and artificial intelligence This volume consists of 24 selected papers invited by the editor Professor Paul P Wang These papers cover the theory and applications of fuzzy sets almost equal in number We are very fortunate to have Professor A Kaufmann to contribute an overview paper of the advances in fuzzy sets One special feature of this volume is the strong participation of Chinese researchers in this area The fact is that Chinese mathematicians scientists and engineers have made important contributions to the theory and applications of fuzzy sets through the past decade However not until the visit of

Professor A Kaufmann to China in 1974 and again in 1980 did the Western World become fully aware of the important work of Chinese researchers Now Professor Paul Wang has initiated the effort to document these important contributions in this volume to expose them to the western researchers
