**Expert Time Management** Silviu Vasile, You have to have your own vision of time This book challenges you to think about time and its importance to you which is why it s time that you can put your ideas into words in a very simple way I think the best thing to do is to start writing down everything you think because it is not for nothing that they say writing develops genius and genius develops writing When you talk about time management you are not talking about ideas concepts or states You re talking about tasks Tasks have deadlines you have to meet Tasks are what get you from close to close to your goals Anyone or almost anyone given enough time can accomplish a specific task except that most of the time we only have a limited amount of time which we will call a window The window is the period of time in which you have all the conditions to perform the specific task within the parameters you have set yourself We are talking about parameters and we are referring here primarily to resources of time money and energy After this window closes the costs progressively increase What this means is this either you do a particular task in its own time when the window is open or you do it later at extremely high costs that at some point make it no longer worth all the effort That s why keeping efficient timing saves us from wasting important resources and makes us move faster If you don t know how to use your time efficiently you won t be able to perform at any level Over time you will build up frustration This frustration will take away from the beauty you have now you will hate yourself and you will lose the strength you have Choose to invest 3% of your time each day 43 minutes invested in your future is all you need to set you on a journey where genuine success awaits you at the end Time management is life management along with leadership and goal setting it s another skill you need to master Today s time can simply fly by There are so many people who are only thinking about how to do well now The world is full of our own people who don t give a damn about education culture or high values They think they are infallible they think they are powerful and above others Life proves them wrong If you don t know the laws of life the principles by which this world works sooner or later you will have the unpleasant surprise of discovering your true worth
