Seeds Of Faith Personal Enrichment Ser:

Development and Faith Katherine Marshall, Marisa Bronwyn Van Saanen, 2007 Publisher's description The faith and development nexus is both a promising new focus for secular development agencies and a historic reality for centuries world faiths and individuals inspired by their faith have played many roles in social change and social welfare Secular development agencies have largely operated in parallel to the world of faith motivated development The World Bank began in the late 1990s to explore ways in which faith and development are connected The issue was not and is not about religion but about the recognition that some of the best experts on development are faith leaders living and working in poor communities where strong ties and moral authority give them unique experience and insight The World Bank's goal is to act as a catalyst and convenor bringing together development practitioners to find common ground understand one another's efforts and explore differences Development and Faith explores and highlights promising partnerships in the world between secular and faith development entities It recounts the evolving history of relationships between faith and secular development institutions It focuses on the Millennium Development Goals as a common framework for action and an opportunity for new forms of collaboration and partnership
