Heirloom Seeds and Their Keepers Virginia D.

Nazarea, 2005-05-01 Farmers and gardeners have long appreciated a wide variety of plants and have nurtured them for meals healing and exchange But diversity too often has been surrendered to monocultures of fields and spirits predisposing much of modern agriculture to uniformity and consequently vulnerability Today it is primarily at the individual level such as growing and saving a strange old bean variety or a curious looking gourd that any lasting conservation actually takes place As scientists grapple with the erosion of genetic diversity of crops and their wild relatives old timey farmers and gardeners continue to save propagate and pass on folk varieties and heirloom seeds Virginia Nazarea focuses on the role of these seedsavers in the perpetuation of diversity She thoughtfully examines the framework of scientific conservation and argues for the merits of everyday conservation one that is beyond programmatic design Whether considering small scale rice and sweet potato farmers in the Philippines or participants in the Southern Seed Legacy and Introduced Germplasm from Vietnam in

the American South she explores roads not necessarily less traveled but certainly less recognized in the conservation of biodiversity Through characters and stories that offer a wealth of insights about human nature and society Heirloom Seeds and Their Keepers helps readers more fully understand why biodiversity persists when there are so many pressures for it not to The key Nazarea explains is in the sovereign spaces seedsavers inhabit and create where memories counter a culture of forgetting and abandonment engendered by modernity A book about theory as much as practice it profiles these individuals who march to their own beat in a world where diversity is increasingly devalued as the predictability of mass production becomes the norm Heirloom Seeds and Their Keepers offers a much needed scientifically researched perspective on the contribution of seedsaving that illustrates its critical significance to the preservation of both cultural knowledge and crop diversity around the world It opens new conversations between anthropology and biology and between researchers and practitioners as it honors conservation as a way of life *Official Gazette of the United States Patent and Trademark Office*

Garden of the Soul Mark Mah, 2014-03-13 The

stories of Jesus placed in the context of the familiar and factual are filled with metaphors that audiences can understand and appreciate. Metaphors not only inform and persuade but also fire up readers' imaginations and get them involved as participants. Humans are primed to think and feel metaphorically and so *Garden of the Soul* aims to metaphorically explore five landscapes that feature prominently in the Bible. Each metaphorical landscape throws light on an aspect of spiritual life. The bountiful garden speaks of growth, the flowing river calls for unceasing prayer, the raging sea mirrors the turbulence of a journey of faith, the barren desert transforms by emptying life's clutter, and the high mountain challenges readers to scale its peak to glimpse a transcendent vision of God. This book will inform, enrich, and challenge readers' spiritual lives throughout their journey from garden to mountain.

Saving More Than Seeds Catherine Phillips, 2016-04-01 *Saving More Than Seeds* advances understandings of seed people relations with particular focus on seed saving. The practice of reusing and exchanging seeds provides foundation for food production and allows humans and seed to adapt together in dynamic socio-natural conditions. But the practice and its practitioners are easily taken for granted even as they are threatened by neoliberalisation. Combining original ethnographic research with investigation of an evolving corporate seed order, this book reveals seed saving not only as it occurs in fields and gardens but also as it associates with genebanking, genetic engineering, intellectual property rights, and agrifood regulations. Drawing on diverse social sciences literatures, Phillips illustrates ongoing practices of thinking, feeling, and acting with seeds, raising questions about what seed people relations should accomplish and how different ways of relating might be pursued to change collective futures.

Dwellings of Enchantment Bénédicte Meillon, 2020-10-27 *Dwellings of Enchantment: Writing and Reenchanting the Earth* offers ecocritical and ecopoetic readings that focus on multispecies dwellings of enchantment and reenchant our rapport with the more-than-human world. It sheds light on the marvelous entanglements between humans and other life forms coexisting with us, entanglements that when fully perceived call onto humans to shift perspectives on both the causes and solutions to current ecological crises. Working against the disenchantment of humans' relationships with and perceptions of the world entailed by a modern ontology, this book illustrates the power of ecopoetics to attune humans to the vibrant matter both within and outside of us. Braiding indigenous with non-indigenous worldviews, this book tackles ecopoetics emerging from varying locations in the world. It underscores the postmodernist re-mythologizing processes going on in many ecopoetic texts via magical realist modes and mythopoeia.
