## **Seeking God The Recovery Of Religious Identity In Orthodox Russia Ukraine And Georgia:**

**Seeking God** Stephen K. Batalden, 1993 From the reopening of the churches to the expressions of religious charity to the revival of monasticism signs of recovery of Eastern Orthodox religious culture are evident throughout the former Soviet lands While occasioned in part by the death of communism the new religious consciousness is rooted in living traditions that antedate by centuries the relatively brief period of Soviet rule Addressing these living traditions this volume's essays highlight both historical and contemporary sources of religious identity Seeking God examines the roots and recovery of Orthodox religious culture in Russia Ukraine and Georgia The authors of the essays are leading international authorities on Orthodoxy and their contributions reflect the growing scholarly interest in Orthodox popular culture as well as the linkage of confessional identity with nationalism in the Eastern Orthodox world Following an introduction by Stephen K Batalden and an opening essay on the life and work of Father Aleksandr Men the essays deal with such topics as Old Believers women's religious communities schism and cultural conflict architecture contemporary politics of the Russian Bible and sources for studying Eastern Christianity

*Russian America* Ilya Vinkovetsky, 2011-04-06 From 1741 until Alaska was sold to the United States in 1867 the Russian empire claimed territory and peoples in North America In this book Ilya Vinkovetsky examines how Russia governed its only overseas colony illustrating how the colony fit into and diverged from the structures developed in the otherwise contiguous Russian empire Russian America was effectively transformed from a remote extension of Russia's Siberian frontier penetrated mainly by Siberianized Russians into an ostensibly modern overseas colony operated by Europeanized Russians Under the rule of the Russian American Company the colony was governed on different terms than the rest of the empire a hybrid of elements carried over from Siberia and imported from rival colonial systems Its economic labor and social organization reflected Russian hopes for Alaska as well as the numerous limitations such as its vast territory and pressures from its multiethnic residents it imposed This approach was particularly evident in Russian strategies to convert the indigenous peoples of Russian America into loyal subjects of the Russian Empire Vinkovetsky looks closely at Russian efforts to acculturate the native peoples including attempts to predispose them to be more open to the Russian political and cultural influence through trade and Russian Orthodox Christianity Bringing together the history of Russia the history of colonialism and the history of contact between native peoples and Europeans on the American frontier this work highlights how the overseas colony revealed the Russian Empire's adaptability to models of colonialism

**Eastern Christians in Anthropological Perspective** Chris Hann, Hermann Goltz, 2010-05-27 This collection of essays is a welcome and refreshing gift in a virtual desert There has been very little comparative anthropological research on the Eastern churches and this volume will fill that gap Michael Herzfeld author of *Evicted from Eternity The Restructuring of Modern Rome* At long last there is a book on the anthropology of Christianity that devotes direct and sustained attention to the diverse Eastern Christian Churches both Orthodox and Catholic This book should be read by anyone who thinks

anthropologically about Christianity Scales will fall from their eyes and they will behold an entire wing of Christianity that has until now gone mostly unnoticed and practically untheorized Douglas Rogers author of *The Old Faith and the Russian Land A Historical Ethnography of Ethics in the Urals*

**The Oxford Handbook of Witchcraft in Early Modern Europe and Colonial America** Brian P. Levack, 2013-03-28 The essays in this Handbook written by leading scholars working in the rapidly developing field of witchcraft studies explore the historical literature regarding witch beliefs and witch trials in Europe and colonial America between the early fifteenth and early eighteenth centuries During these years witches were thought to be evil people who used magical power to inflict physical harm or misfortune on their neighbours Witches were also believed to have made pacts with the devil and sometimes to have worshipped him at nocturnal assemblies known as sabbaths These beliefs provided the basis for defining witchcraft as a secular and ecclesiastical crime and prosecuting tens of thousands of women and men for this offence The trials resulted in as many as fifty thousand executions These essays study the rise and fall of witchcraft prosecutions in the various kingdoms and territories of Europe and in English Spanish and Portuguese colonies in the Americas They also relate these prosecutions to the Catholic and Protestant reformations the introduction of new forms of criminal procedure medical and scientific thought the process of state building profound social and economic change early modern patterns of gender relations and the wave of demonic possessions that occurred in Europe at the same time The essays survey the current state of knowledge in the field explore the academic controversies that have arisen regarding witch beliefs and witch trials propose new ways of studying the subject and identify areas for future research

**Religion and Democratizations** Jeffrey Haynes, 2013-09-13 This book examines key debates on religion and democratization from three main perspectives Religious traditions have core elements which are more or less conducive to democratization and democracy Religious traditions may be multi vocal but at any moment there may be dominant voices more or less receptive to and encouraging of democratization Religious actors rarely if ever determine democratization outcomes However they may in various ways and with a range of outcomes be of significance for democratization The contributions are divided into two sections 1 Religion democratization and democracy and 2 Secularization democratization and democracy Overall they examine the three assertions in the bullet points above The book's starting point is that in general around the world religions have left their assigned place in the private sphere This means they have in many cases become recognisably politically active in various ways and with assorted outcomes This re emergence from political marginality dates back until at least the 1980s At that time the US sociologist Jose Casanova noted that what was new and became news was the widespread and simultaneous refusal of religions to be restricted to the private sphere This involved a remodelling and re assumption of public roles by religion which theories of secularisation had long condemned to social and political marginalisation This book was published as a special issue of *Democratization*
