generation of the Internet affecting business models in e business This book explores the application of BCT in e business focusing on the value creation The research objective is to examine how and why BCT is used in e business value chains This objective is reached through a pragmatic multimethod approach combining four studies Study 1 summarises the state of the art of approaches to assess a BCT fit for a particular scenario and outlines shortcomings resulting from these approaches Study 2 provides empirical insights into the usage of BCT in four e business value chains based on the cases Theta content OpenBazaar commerce Presearch context and Crypviser connection Study 3 deepens the insights in the e commerce value chain By means of a qualitative content analysis of news articles various BCT application domains for each e commerce activity are presented Study 4 narrows the perspective of analysis to e negotiations proposes a BC based negotiation support system and examines its opportunities and challenges Finally an integrative discussion of the findings results in two explanations how BCT is applied in e business *Fostering Multidisciplinary Research for Sustainability* Dr. Santosh Dhar,Dr. Upinder Dhar,Dr. Aditi Veda,2024-03-29 Modern research goes beyond disciplinary horizons for devising solutions to the society s most pressing unsolved issues Within the disciplinary framework the ability to solve problems through the generation of knowledge is no more addressed from discipline specific points of view only However it has become apparent

that the research needed to address today's complex problems requires the expertise of many disciplines. Multidisciplinary approach incorporates a combination of concepts and knowledge from various disciplines. These contributions enable the exchange of knowledge and experiences from diverse groups of people that can promote a holistic vision of a subject as well as new explanatory theories. Being multidisciplinary does not mean giving up skills; it means moving into new scientific directions using one's own special set of skills. Rather than being an end in itself, this kind of research is a way of achieving innovative goals, enriched understanding, and a synergy of new methods. The book highlights the diverse perspectives of the researchers across disciplines from sustainable urban development to renewable energy strategies from biodiversity conservation to equitable machine learning, internet of things, deep learning, and Artificial Intelligence. AI models, eco-friendly methods, individualized education plans, and social policies that can contribute to more comprehensive and effective solutions to some of the world's most pressing issues while acknowledging that sustainability challenges are inherently interconnected, hence the importance of inclusivity in research.
