Selected Essays Of Gottfried Haberler:

Selected Essays of Gottfried Haberler Gottfried Haberler, 1985 Gottfried Haberler's contributions to the field of international trade and finance began in the 1920s with a seminal paper on comparative costs. His continuing contributions to open economy analysis, development, business cycles, and inflation, the theory of money, and rational expectations are highlighted in this selection of 27 essays spanning the years 1925 to 1980. The essays are divided into five major sections representing the subdisciplines of Haberler's most significant work. The first section on international trade contains his work on comparative costs, comparative advantage, and the location of production and international trade. A section on international finance deals with the state of the international monetary system under conditions of world recession, control over international reserves, U.S. balance of payments policy, currency depreciation, and the terms of trade and transfer and price movements. The topic of inflation and business cycles is covered in the third section with essays on income policies, stagflation, and the Great Depression, and the international transmission of inflation. Section four deals with economic development, and the concluding section contains essays on the theory of money and general macroeconomic theory. Several articles are translated here for the first time, and there is a complete bibliography of Haberler's work up to 1980. Gottfried Haberler is Professor Emeritus of Economics, Harvard University, and Resident Scholar at the American Enterprise Institute. Anthony Koo is Professor of Economics at Michigan State University. [The Palgrave Companion to Harvard Economics](#) Robert A. Cord, 2024-07-05 Harvard University has been and continues to be one of the most important global centres for economics. With three chapters on themes in Harvard economics and 41 chapters on the lives and work of Harvard economists, these two volumes show how economics became established at the University, how it produced some of the world's best-known economists including Joseph Schumpeter, Wassily Leontief, and John Kenneth Galbraith, and how it remains a global force for the very best in teaching and research in economics. With original contributions from a stellar cast, the volumes provide economists, especially those interested in macroeconomics and the history of economic thought, with an in-depth analysis of Harvard economics. *The Canon in the History of Economics* Michalis Psalidopoulos, 2000-03-09 The construction and the role of the economic canon, the accepted list of great works and great authors, has been the subject of much recent literary and historical debate. By contrast, the concept of the canon has been largely dormant in the study of the history of economics, with the canonical sequence of Smith, Ricardo, Marx, etc. constituting the *Revised and Enlarged Edition* Charles P. Kindleberger, 1986-04-22 The World in Depression is the best book on the subject, and the subject in turn is the economically decisive decade of the century so far. John Kenneth Galbraith [The Palgrave Companion to Chicago Economics](#) Robert A. Cord, 2023-01-01 The University of Chicago has been and continues to be one of the most important global centres for economics. With six chapters on themes in Chicago economics and 33 chapters on the lives and work of Chicago economists, this volume shows how economics became established at the University, how it produced some of the

world's best known economists including Frank Knight, Milton Friedman and Robert Lucas and how it remains a global force for the very best in teaching and research in economics. With original contributions from a stellar cast, this volume provides economists, especially those interested in macroeconomics and the history of economic thought, with an in-depth analysis of Chicago economics. *Economic Thinkers* David A. Dieterle, 2013-08-08 Who are the individuals whose novel ideas, writings and philosophies have influenced economics throughout history and in doing so have helped change the world? This encyclopedia provides a readable study of economics by examining the great economists themselves. This book presents biographies of 200 economic thinkers throughout history, supplying a one-stop reference about the men and women whose ideas, writings and philosophies created the foundation of our current understanding of economics. Depicting their subjects within the contexts of history, development, economics and econometrics, these biographies provide an insightful overview of the world of economics through the economists of significance and the many subdisciplines, topics, eras and philosophies they represent. *Economic Thinkers: A Biographical Encyclopedia* begins by describing economic thinkers in ancient Greece and Rome, moves through history to cover economists in the 15th through 19th centuries and addresses economic theory in the 20th century and the modern era. Written to be easily accessible and highly readable, the work will appeal to students, scholars, general readers and anyone interested in learning about the historical and philosophical foundation of economics.

The Open Economy Macromodel: Past, Present and Future Arie Arnon, Warren Young, 2012-12-06 The impetus for the conference that was the basis for this volume emanated from the influence of two brilliant minds: Egon Sohmen and Adam Klug, who both died at an early age, leaving their families and the professions of economics and economic history with major voids. In the course of research on the origins of Open Economy Macroeconomics, the significant contributions of Egon Sohmen came to the fore. After correspondence with some of those involved in the early development of the Open Economy Macromodel, we turned to Adam Klug for his views on the matter as he had dealt with the history of intertemporal trade models in his Ph.D. thesis. And it was Adam who suggested the idea of a conference bringing together economists and economic historians. At this point, we want to acknowledge the very generous grant from the Egon Sohmen Foundation and the active participation of Dr. Helmut Sohmen and Mrs. Renee Sohmen at the conference. We also want to thank Prof. Sir Aaron Klug, Nobel Laureate, and the Klug family for their support and the financial contribution of the Adam Klug Memorial Lecture Fund at Ben-Gurion University. Other institutions that contributed to the conference were the Gianni Foundation, Bank of Israel, University of North Carolina, Department of Economics, Faculty of Social Science, and Aharon Meir Center for Banking, Bar Ilan University, Department of Economics and Faculty of Social Science, Ben-Gurion University of the Negev. Hagemann, T. Nishizawa, Y. Ikeda, 2010-05-28 This book analyzes both the consistent and changing elements in the Austrian School of Economics since its foundation in the late 19th Century up to the recent offspring of this School It investigates the dynamic metamorphosis of the school mainly with reference to its contact with representatives of history of economic thought **The Routledge Handbook of Heterodox Economics** Tae-Hee Jo, Lynne Chester, Carlo D'Ippoliti, 2017-07-28

The Routledge Handbook of Heterodox Economics presents a comprehensive overview of the latest work on economic theory and policy from a pluralistic heterodox perspective Contributions throughout the Handbook explore different theoretical perspectives including Marxian radical political economics Post Keynesian Sraffian economics institutionalist evolutionary economics feminist economics social economics Regulation theory the Social Structure of Accumulation approach and ecological economics They explain the structural properties and dynamics of capitalism as well as propose economic and social policies for the benefit of the majority of the population This book aims firstly to provide realistic and coherent theoretical frameworks to understand the capitalist economy in a constructive and forward looking manner Secondly it delineates the future directions as well as the current state of heterodox economics and then provides both heat and light on controversial issues drawing out the commonalities and differences among different heterodox economic approaches The volume also envisions transformative economic and social policies for the majority of the population and explains why

economics is and should be treated as a social science This Handbook will be of compelling interest to those including students who wish to learn about alternative economic theories and policies that are rarely found in conventional economics textbooks or discussed in the mainstream media and to critical economists and other social scientists who are concerned with analyzing pressing socio economic issues *Balance of Payments Adjustment* Augustine C. Arize, Theologos H. Bonitsis, Ioannis Kallianiotis, Krishna Kasibhatla, John Malindretos, 2000-01-30

The five parts of this collection of essays systematically and thoroughly examine the two competing theories of balance of payments and adjustment namely the Keynesian and the Monetary approaches Each part deals with specific aspects of the two approaches Part I surveys the theories behind these two approaches looking at the presuppositions main theory and policy recommendations which they include Part II examines the empirical literature and describes the numerous models which have been proposed Part III critiques the two theories on their assumptions policy advice and empirical modeling Part IV compares and contrasts the two views both theoretically and empirically Empirical studies on different countries are performed to emphasize the differing set of accounts and variables of the two approaches Part V considers the approaches in a regime of flexible exchange rates Scholars students and researchers will find this collection of great help in understanding the two approaches to balance of payments and adjustment

A New Construction of Ricardian Theory of International Values Yoshinori Shiozawa, Toshihiro Oka, Taichi Tabuchi, 2017-03-30 This is the first book published in English on the new international value theory presented by Yoshinori Shiozawa in 2007 Shiozawa submitted a solution to the question on international values since Ricardo by constructing a Ricardo Sraffa model on trading economies with M countries and N commodities including intermediate inputs normally M N The new theory is based on the assumption that prices are determined by production costs which is the property derived from the classical value theory The papers collected here deal with the following introducing readers to the new theory presenting diagrammatic illustrations of the new theory analysing efficient patterns of specialization allowing intermediate inputs examining how the new theory gives a new horizon to the Neo Ricardian trade theory investigating competitiveness the long period method and potentiality from the perspectives of the new theory discussing Mill's conversion toward neoclassical revolution scrutinizing how the concept of comparative advantage has developed and diverged from Ricardo's trade theory discussing the purification of Marshall's value theory through Mill's influence reviewing the controversies on international values among Japanese economists considering the value added trade based on the Ricardian value theory and lastly giving a mathematical explanation of the definitions and theorems of the new theory pp

The International Adjustment Mechanism L. Gomes, 1993-07-20 This book is about the history of thought and policy on the international adjustment mechanism Economics emerged as a discipline in its own right largely out of the accumulated reflections analyses and judgements of a group of writers from the sixteenth to the early nineteenth century who shared a common perspective on matters relating to the adjustment of the balance of payments The present survey

starts with the development of the doctrine at that time and continues the story up to the present debate on economic and monetary union in Europe

New Perspectives on Economic Development Fu-Lai Tony Yu, 2011-04-27 This book is the first of its kind to use Austrian subjectivism to analyze issues in economic development Unlike scholars in mainstream neoclassical economics who explain economic development by quantitative growth models this book attempts to understand economic progress in human agency perspective In this approach human agency is placed at the centre of economic analysis This book begins with a review of the theories of economic development in the history of Austrian economics with the intention of extending the contributions of major Austrian economists to development economics After pointing out the weaknesses in the orthodox neoclassical approach to economic growth the book then puts forward a subjectivist methodology which integrates the contributions of Max Weber Alfred Schutz and Austrian Economists to interpret economic phenomena and policies This chapter also serves as a methodological foundation for arguments elaborated in subsequent chapters The rest of the book discusses important issues in economic development namely entrepreneurial process national capabilities innovation trade government transition and catching up strategies for firms in latecomer economies The book ends with concluding remarks and a proposal for a new research agenda in economic development This book is well written free from mathematics and is highly readable It adds new insights not only in economics but also in management politics and social sciences It will be useful to scholars policy makers and students in economic development entrepreneurship theory of the firm management of innovation government policy economic sociology Austrian and evolutionary economics
