Christianity and the State in Asia Julius Bautista, Francis Khek Gee Lim, 2009-09-11 Christianity is one of the most rapidly growing religions in Asia Despite the challenges of political marginalisation church

organisations throughout much of Asia are engaged in activities such as charity education and commentary on public morality that may either converge or conflict with the state's interests. Considering Christianity's growing prominence and the various ways Asian nation states respond to this growth, this book brings into sharper analytical focus the ways in which the faith is articulated at the local, regional and global level. Contributors from diverse disciplinary and institutional backgrounds offer in-depth analyses of the complex interactions between Asian nation states and Christianity in the context of modernisation and nation building. Exploring the social and political ramifications of Christian conversions in Asia and their impact on state policies, the book analyses how Christian followers, missionaries, theologians and activists negotiate their public roles and identities vis-à-vis various forms of Asian states, particularly in the context of post-colonial nation building and socio-economic development. This volume represents a critical contribution to the existing scholarship on Christianity's global reach and its local manifestations and demonstrates the significance of the Asian experience in our understanding of Christianity as a global religion.

Living with Separation in China Charles Stafford, 2003-09-02 First Published in 2004

Separation, for example, the process of leaving behind temporarily or permanently individuals to whom we are attached, is something experienced by humans in all societies. In the case of China, the rituals and practices associated with separation and with its corollary reunion are especially elaborate. They are crucial elements within the Chinese cultural tradition. In addressing, through the use of case studies, the central theme of separation, this book also provides a good general introduction to many of the classic debates within anthropological and historical analyses of China. It will therefore prove an interesting and useful resource to students of Asian studies and anthropology as well as the general reader with an interest in the Chinese cultural tradition.

The Linguistics of Literacy Pamela Downing, Susan D. Lima, Michael Noonan, 1992

This volume grew out of the Seventeenth Annual University of Wisconsin-Milwaukee Linguistics Symposium which was held in Milwaukee on April 8-10, 1988. The theme of the conference was the relationship between linguistics and literacy. In this volume, a selection of papers are presented which cluster around three of the major themes that developed during the conference: the linguistic differences between written and spoken genres; the relationship between orthographic systems and phonology; and the psychology of orthography. The volume concludes with a solicited paper by Walter J. Ong which draws together the various strands considered in the other sections of the book and addresses the broader question of the social and psychological consequences of literacy.

The Cambridge Handbook of Historical Orthography Marco Condorelli, Hanna Rutkowska, 2023-10-12

The study of orthography, spelling and writing systems and its development over the history of language is central to many areas of linguistic enquiry, offering insight into syntactic and morphological structures, phonology, typology, historical linguistics, literacy and reading, and the social and cultural context of language use. With contributions from a global team of scholars, this Handbook provides the first comprehensive overview of this rapidly developing field, tracing the development of historical orthography with special emphasis on the last and present centuries. Chapters are split

into five key thematic areas with a focus throughout on the interplay between theory and practice It also explores the methods used in studying historical orthography and the principles involved in the development of a spelling system Providing a critical assessment of the state of the art in the field it is essential reading for anyone with an interest in writing systems and historical linguistics Translation as Mission William Allen Smalley, 1991 For Christians from New Testament times on the Bible has almost everywhere been a translated Bible For eighteen centuries it was normally translated into new languages by native speakers but with the beginning of the nineteenth century and the modern missionary movement came a burst of missionary translation around the world As missionary churches were established and as societies worldwide were affected by the gospel people studied the translations preached from them and recounted stories to their children In many societies these translations were the foundation for Christian communities for theology including indigenous theologies and a powerful stimulus to modernization and even secularization reaching beyond the Christian community Smalley contends that the theological presuppositions of these missionary translators varied widely He argues that some missionary translators were insightful scholars who probed deeply into the languages and cultures in which they were working others were unable to transcend the perspective their own culture prescribed for them Earlier missionaries did not always have a clearly formulated theory of translation or an understanding of what they were doing and why Eventually however a theoretical model was developed a model that the majority of translators both missionary and nonmissionary now use Smalley maintains that the task of Bible translation is now passing out of the hands of missionaries and back into the hands of native speakers casting the missionary translator into significantly changed roles in the translation process
