humans and nature **The Geographies of Garbage Governance** Anna R. Davies, 2016-03-03 Previously perceived as a local technical issue for governments waste management is now also a global socio political process involving complex patterns of multi level governance Yet these geographical complexities have not previously been considered in any detail This book examines the neglected geographies of waste management in particular the integral processes of trans localization and politicization that are emerging in waste networks Illustrated by in depth case studies from New Zealand and Ireland it critically analyzes the interaction between political scales of governing waste from the local to the supra national level It also looks at the impact of wider systems of governance civil society and the private sector on waste management policy and practices In doing so the book provides a better understanding of waste governance and recommendations for better management of the waste sector in the future **Political Leadership and the European Commission Presidency**

Henriette Müller, 2020 The EU s pluralistic nonhierarchical system of multilevel governance lacks clear structures of both government and opposition According to the EU treaties the presidency of the European Commission is thus not explicitly expected to exercise political leadership However the position cannot effectively be exercised without any demonstration of such leadership due to its many leadership functions Examining this curious mix of strong political demands weak institutional powers and need for political leadership this book systematically analyses the political leadership performance of the presidents of the European Commission throughout the process of European integration The basic argument is that Commission presidents matter not only in the process of European integration but that their impact varies according to how the different incumbents deal with the institutional structure and the situational circumstances and thus their available strategic choices The primary research question is thus What makes political leadership in European governance successful and to what extent and why do Commission presidents differ in their leadership performance In addressing this question this book departs from existing research on EU leadership which has to date often analysed either the EU s institutional structure and its potential for leadership or mainly focused on only the most recent incumbents in case study analyses Focusing on the multiterm European Commission presidents Walter Hallstein Jacques Delors and Jos Manuel Barroso this book conceptualizes their political leadership as a performance and thus systematically analyzes their agenda setting mediative institutional and public outreach performance over the entire course of their presidential terms
