Brebbia, 2000 In 1945 towards the end of the Second World War the ancient City of Dresden was destroyed by massive bombardments and much of its rich architectural heritage appeared to have been obliterated forever Over the last half century however Dresden has been lovingly reconstructed with the active collaboration of its citizens This process now culminating in the rebuilding of the Frauenkirche the Church of Our Lady is documented in this unique book

Placing Nature on the Borders of Religion, Philosophy and Ethics Dr Forrest Clingerman, Mr Mark H Dixon, 2013-06-28 The natural world has been humanized even areas thought to be wilderness bear the marks of human impact But this human impact is not simply physical At the emergence of the environmental movement the focus was on human effects on nature More recently however the complexity of the term nature has led to fruitful debates and the recognition of how human individuals and cultures interpret their environments This book furthers the dialogue on religion ethics and the environment by exploring three interrelated concepts to recreate to replace and to restore Through interdisciplinary dialogue the authors illuminate certain unique dimensions at the crossroads between finding value creating value and reflecting on one's place in the world Each of these terms has diverse religious ethical and scientific connotations Each converges on the ways in which humans both think about and act upon their surroundings And each radically questions the damaging conceptual divisions between nature and culture human and environment and scientific explanation and religious ethical understanding This book self consciously reflects on the intersections of environmental philosophy environmental theology and religion and ecology stressing the importance of how

place interprets us and how we interpret place In addition to its contribution to environmental philosophy this work is a unique volume in its serious engagement with theology and religious studies on the issues of ecological restoration and the meaning of place

Learning from Failure Luigia Binda, 2008 On March 17 1989 the Civic Tower of Pavia collapsed without apparently any warning sign killing four people After an experimental and analytical investigation lasted nine months the collapse cause was found in a progressive damage dating back many years and due mainly to the heavy dead load put on top of the existing medieval tower when realising a massive bell tower in granite Other case histories have been collected as the collapse of the St Marco bell tower in Venice in 1902 of the Sancta Maria Magdalena bell tower in 1992 in Dusseldorf the damages of the bell tower of the Monza Cathedral and of the Torrazzo in Cremona Later on in 1996 the collapse of the Noto Cathedral showed that similar progressive damages can take place in pillars of churches and cathedrals The experimental research aimed to show the reliability of this interpretation went on and it is still continuing since 1989 and it is described in the book After a careful interpretation of the experimental results also based on experiences from rock mechanics and concrete the modelling of the phenomenon for massive structures as creep behaviour of masonry was implemented The book has the scope of helping architects and engineers to deal with the continuous damage of heavy structures and to understand the signs of the phenomenon while proposing some modelling but also to give guidelines for the on site investigation monitoring and repairing of the damaged structures

Bodies and Ruins David F. Crew, 2017-05-19 Bodies and Ruins explores changing German memories of World War II as it analyzes the construction of narratives in the postwar period including the depiction of the bombing of individual German cities The book offers a corrective notion rising in the late 1990s notion that discussions of the Allied bombing were long overdue because Germans who had endured the bombings had largely been condemned to silence after 1945 David Crew shows that far from being marginalized in postwar historical consciousness the bombing war was in fact a central strand of German memory and identity Local narratives of the bombing war including photographic books had already established themselves as important vectors of memory in the late 1940s and early 1950s The bombing war had allowed Germans to see themselves as victims at a time when the Allied liberation of the concentration camps and the Nuremberg trials presented Germans to the world as perpetrators or at least as accomplices The bombing war continued to serve this function even as Germans became more and

more willing directly to confront the genocide of European Jews which by the 1960s was beginning to be referred to as the Holocaust Bodies and Ruins examines a range of local publications that carried photographic images of German cities destroyed in the air war images that soon entered the visual memory of World War II Despite its obvious importance historians have paid very little attention to the visual representation of the bombing war This book follows the search for what were considered to be the right stories and the right pictures of the bombing war in local publications and picture books from 1945 to the present and is intended for historians as well as general readers interested in World War II the Allied bombing of German cities the Holocaust the history of memory and photographic visual history **Exploring Bach's**

Frederick the Great and his Musicians: The Viola da Gamba Music of the Berlin School Michael O'Loghlin, 2017-07-05 After decades of stagnation during the reign of his father the Barracks King the performing arts began to flourish in Berlin under Frederick the Great Even before his coronation in 1740 the crown prince commenced recruitment of a group of musician composers who were to form the basis of a brilliant court ensemble Several composers including C P E Bach and the Graun brothers wrote music for the viola da gamba an instrument which was already becoming obsolete elsewhere They were encouraged in this endeavour by the presence in the orchestra from 1741 of Ludwig Christian Hesse one of the last gamba virtuosi who was described in 1766 as unquestionably the finest gambist in Europe This study shows how the unique situation in Berlin produced the last major corpus of music written for the viola da gamba and how the more virtuosic works were probably the result of close collaboration between Hesse and the Berlin School composers The reader is also introduced to the more approachable pieces which were written and arranged for amateur viol players including the king's nephew and ultimate successor Frederick William II O'Loghlin argues that the aesthetic circumstances which prevailed in Berlin brought forth a specific style that is reflected not only in the music for viola da gamba Characteristics of this Berlin style are identified with reference to a broad selection of original written sources many of which are hardly accessible to English speaking readers There is also a discussion of the rather contradictory reception history of the Berlin School and some of its composers The book concludes with a complete thematic catalogue of the Berlin gamba music with a listing of original manuscript sources and modern publications The book will appeal to professional and amateur viola da gamba players as well as to scholars of eighteenth century German music *Great Wagner Conductors* Jonathan Brown, 2014-01-30 This is the Ebook version of the award winning *Great Wagner Conductors* published in 2012 now scarce in print It contains corrections to the hardback edition and remedies some omissions to the discographies It also contains all 723 illustrations in the book brilliantly illuminated many showing the conductors at work Some of these are rare some are in colour These are not displayed in the free sample *Great Wagner Conductors* is the first in depth study to bring the great historical Wagner conductors to life through anecdote their own views on Wagner's music reports of their performances throughout the world and their recordings There is a substantial introductory chapter on Wagner what he was like as a conductor of his own works

and what he wanted of his conductors then follow chapters on Hans von Bülow Hans Richter Anton Seidl Hermann Levi Felix Mottl Karl Muck Artur Nikisch Albert Coates Gustav Mahler Felix Weingartner Bruno Walter Arturo Toscanini Artur Bodanzky Wilhelm Furtwängler Fritz Busch Erich Kleiber Hans Knappertsbusch Clemens Krauss Karl Böhm Richard Strauss Otto Klemperer and Fritz Reiner Thousands of reviews of performances from many countries have been distilled to bring us as close as we can to knowing what the conductors were really like There are comprehensive discographies setting out what the conductors recorded Rare recordings are documented There is comment on or excerpts from reviews of all the major recordings and on many of the more obscure A section on timings of actual and recorded performances from Wagner onwards reveals how widely practice has varied There is a Select Bibliography and an Index The level of detail achieved is quite breathtaking wrote David Patmore in *Classical Recordings Quarterly* reviewing the hardback It extends to a vast arsenal of footnotes as a resource they will be amazingly useful in a vast range of different contexts For anyone interested in conducting from the mid nineteenth century onwards and in particular the performance of Wagner this book will be an essential acquisition Its strength lies in the collection of so many different and varied contemporary reports of Wagner in performance from approximately 1850 to 1960 If this is where your interest lies it will provide much fascinating reading
