Toronto's Ravines and Urban Forests Jason Ramsay-Brown, 2020-07-20 No matter where you are in Toronto you are close to a ravine In these often hidden places you can find an astonishing diversity of birds flowers and trees Jason Ramsay Brown has spent twenty years exploring the more than one hundred ravines parks and urban forests within Toronto's boundaries For this book he has selected the thirty natural areas most rewarding to visitors and provided accounts of what you will encounter there and what you can learn of the city's history as well The variety of flora and fauna is astonishing In one park alone the Leslie Street Spit more than three hundred species of birds have been identified since the turn of the millennium The increasingly scarce butternut tree can be found in Warden Woods and wildlife such as deer beaver foxes and coyotes are often spotted along many ravine trails Jason tells the story of ongoing efforts of ecological restoration and stewardship to protect these habitats and ecosystems such as the wetlands of Taylor Creek Park and the old growth forest within Glendon Forest The ravines also contain many landmarks of local history rumours of buried British gold in Scarborough's Gates Gully large First Nations encampments near L Amoureux Park and early industries like Todmorden Mills With extensive visuals illustrating all thirty ravines and forests from across the city this book offers something for every Torontonian and every visitor

Algonquin Park Jan Rinik, Martin

Rinik,2014-05-05 Most visitors to Algonquin Provincial Park experience its beauty during the summer months This book shows readers the diversity of wildlife and striking landscapes that appear throughout fall winter and spring Images and text together create a compellingly beautiful portrait of Algonquin Park capturing the wildlife forests lakes plants flowers and even mushrooms that illustrate the incredible diversity of the park through all seasons Talented painters illustrators and photographers Jan and Martin Rinik have spent years creating the rich range of visuals contained in this book More than 200 colour illustrations grace these pages along with 125 photographs of the park in all four seasons With training as a biologist Martin Rinik contributes authoritative information on the many species found in the park The result is a stunning and informative portrait one of the most diverse natural habitats in the world *Non-native Species and Their Role in the Environment* Radu Cornel Guiaşu,2016-08-01 The young field of invasion biology initially a branch of ecology and conservation biology has greatly expanded particularly in the last two and a half decades or so As a result the potential negative effects of introduced species have been widely advertised and sometimes perhaps overemphasized This book attempts to restore some balance to the current debate over the role of non native species by offering a broader perspective and taking a longer term evolutionary look at these species and their impact in their new environments The relatively arbitrary nature of terms such as native and non native and the rather inconsistent ways in which such terms are applied to biological species as well as the subjective boundaries of so called native ranges are analyzed The role of non native species in their new environments can be considerably more complex than the anti introduced species information would often suggest Thus the more positive and nuanced perspective on introduced species and their impact offered in this book is much needed and long overdue *Canadian Books in Print.
