Patrick J. Hearden

Roosevelt Confronts Hitler Americas Entry Into World War II:

Roosevelt Confronts Hitler Patrick J. Hearden, 1987 *Hitler Attacks Pearl Harbor* Richard F. Hill, 2003 Hill theorizes that the diplomatic community opened the European theater to a full scale war on Germany because Hitler's pressure on his Japanese allies caused the Pearl Harbor attack Safeguarding Democratic Capitalism Melvyn P. Leffler, 2019-10-22

Safeguarding Democratic Capitalism gathers together decades of writing by Melvyn Leffler one of the most respected historians of American foreign policy to address important questions about U S national security policy from the end of World War I to the global war on terror Why did the United States withdraw strategically from Europe after World War I and not after World War II How did World War II reshape Americans understanding of their vital interests What caused the United States to achieve victory in the long Cold War To what extent did 9 11 transform U S national security policy Is budgetary austerity a fundamental threat to U S national interests Leffler's wide ranging essays explain how foreign policy evolved into national security policy He stresses the competing priorities that forced policymakers to make agonizing trade offs and illuminates the travails of the policymaking process itself While assessing the course of U S national security policy he also interrogates the evolution of his own scholarship Over time slowly and almost unconsciously Leffler's work has married elements of revisionism with realism to form a unique synthesis that uses threat perception as a lens to understand how and why policymakers reconcile the pressures emanating from external dangers and internal priorities An account of the development of U S national security policy by one of its most influential thinkers Safeguarding Democratic Capitalism includes a substantial new introduction from the author *The Juggler* Warren F. Kimball, 1994-08-08 Here Warren Kimball explores Roosevelt's vision of the postwar world by laying out the nature and development of FDR's war aims his long range political goals As the face of eastern Europe and the world changes before our eyes Roosevelt's goals dismissed during the Cold War as impractical seem less unrealistic today Global Great Depression and the Coming of World War II John E. Moser, 2015-11-17 The Global Great Depression and the Coming of World War II demonstrates the ways in which the economic crisis of the late 1920s and early 1930s helped to cause and shape the course of the Second World War Historian John E Moser points to the essential uniformity in the way in which the world's industrialized and industrializing nations responded to the challenge of the Depression Among these nations there was a move away from legislative deliberation and toward executive authority away from free trade and toward the creation of regional trading blocs away from the international gold standard and toward managed national currencies away from chaotic individual liberty and toward rational regimentation in other words away from classical liberalism and toward some combination of corporatism nationalism and militarism For all the similarities however there was still a great divide between two different general approaches to the economic crisis Those countries that enjoyed easy unchallenged access to resources and markets the United States Great Britain the Soviet Union and France tended to turn inward erecting tariff walls and promoting domestic recovery at the

expense of the international order On the other hand those nations that lacked such access Germany and Japan sought to take the necessary resources and markets by force The interplay of these powers then constituted the dynamic of international relations of the 1930s have not attempting to achieve self sufficiency through aggressive means challenging have that were too distrustful of one another and too preoccupied with their own domestic affairs to work cooperatively in an effort to stop them

The Myth of the Good War Jacques R. Pauwels, 2015-03-06 In the spirit of historians Howard Zinn Gwynne Dyer and Noam Chomsky Jacques Pauwels focuses on the big picture Like them he seeks to find the real reasons for the actions of great powers and great leaders Familiar Second World War figures from Adolf Hitler to Franklin D Roosevelt and Joseph Stalin are portrayed in a new light in this book The decisions of Hitler and his Nazi government to go to war were not those of madmen Britain and the US were not allies fighting shoulder to shoulder with no motive except ridding the world of the evils of Nazism In Pauwels account the actions of the United States during the war years were heavily influenced by American corporations IBM GM Ford ITT and Standard Oil of New Jersey now called Exxon who were having a very profitable war selling oil armaments and equipment to both sides with money gushing everywhere Rather than analyzing Pearl Harbor as an unprovoked attack Pauwels notes that US generals boasted of their success in goading Japan into a war the Americans badly wanted One chilling account describes why President Truman insisted on using nuclear bombs against Japan when there was no military need to do so Another reveals that Churchill instructed his bombers to flatten Dresden and kill thousands when the war was already won to demonstrate British American strength to Stalin Leaders usually cast in a heroic mould in other books about this war look quite different here Nations that claimed a higher purpose in going to war are shown to have had far less idealistic motives The Second World War as Jacques Pauwels tells it was a good war only in myth The reality is far messier and far more revealing of the evils that come from conflicts between great powers and great leaders seeking to enrich their countries and dominate the world

Preemption Henry Shue, David Rodin, 2007-11 Is a nation ever justified in attacking before it has been attacked If so under precisely what conditions This volume of new specially commissioned chapters provides the most definitive assessment to date of the justifiability of preemptive or preventive military action

From Munich to Pearl Harbor David Reynolds, 2002-08-05 A master historian's provocative new interpretation of FDR's role in the coming of World War II Brilliant Arthur M Schlesinger Jr American Ways Series

Explaining the History of American Foreign Relations Michael J. Hogan, Thomas G. Paterson, 2004-01-19 Originally published in 1991 Explaining the History of American Foreign Relations has become an indispensable volume not only for teachers and students in international history and political science but also for general readers seeking an introduction to American diplomatic history This collection of essays highlights a variety of newer innovative and stimulating conceptual approaches and analytical methods used to study the history of American foreign relations including bureaucratic dependency and world systems theories corporatist and national security models psychology culture and ideology Along with

substantially revised essays from the first edition this volume presents entirely new material on postcolonial theory borderlands history modernization theory gender race memory cultural transfer and critical theory The book seeks to define the study of American international history stimulate research in fresh directions and encourage cross disciplinary thinking especially between diplomatic history and other fields of American history in an increasingly transnational globalizing world

Something to Fear Ira Chernus, Randall Fowler, 2023-11-17 A presidency unlike any other Franklin D Roosevelt's legacy in foreign affairs has been contested since the day of his passing Few presidential statements have echoed through history like FDR's charge to conquer fear itself Yet immediately after the end of World War II the United States was gripped by a pervasive sense of national insecurity In *Something to Fear* Ira Chernus and Randall Fowler demonstrate that Roosevelt's rhetoric vision and policies promoted a broadly defined sense of American security over a period of thirty three years ultimately helping elevate security to its primacy in US political discourse by the end of his presidency In doing so however he also heightened the prominence of insecurity in American public life mediating the United States transition to superpower status in a way that also elevated fear in debates over foreign affairs FDR's presidency precipitated a complex shift in US foreign policy that defies any straightforward account organized along a linear isolationist to interventionist trajectory Chernus and Fowler investigate the uncertainties and contradictions embedded in FDR's presidential rhetoric which drew from realist racial progressive nostalgic apocalyptic liberal internationalist and American exceptionalist discourses In this way Roosevelt's rhetoric anticipated the ambivalences contained in American adventures abroad ever since *Something to Fear* shows how FDR's response to the Great Depression the debates over intervention and World War II left an immense rhetorical legacy that often stressed insecurity This study of FDR's entire political career also carefully links him to the Progressive Era before his presidency and to the Cold War era after it
