City of Secrets Victoria Thompson, 2018-11-13 An exciting new book in the series featuring woman on the run Elizabeth Miles from the beloved national bestselling author of the Gaslight Mysteries. Elizabeth Miles knows that honesty is not always the best policy when it comes to finding justice. Elizabeth has discovered that navigating the rules of high society is the biggest con of all. She knows she can play the game, but so far her only success is Priscilla Knight, a dedicated young suffragist recently widowed for the second time. Her beloved first husband died in a tragic accident and left her with two young daughters and a sizable fortune. While she was lost in grief, Priscilla's pastor convinced her she needed a man to look after her and engineered a whirlwind courtship and hasty marriage to fellow parishioner Endicott Knight. Now, about nine months later, Endicott is dead in what appears to be another terrible accident. Everyone is whispering, but that is the least of Priscilla's troubles. She had believed Endicott was wealthy too, but her banker tells her she has no money left and her house has been mortgaged. He also hints at a terrible scandal and refuses to help. Priscilla stands to lose everything, and Elizabeth is determined not to let that happen. But as always, Elizabeth walks a fine line between using her unusual talents and revealing her own scandalous past. Elizabeth soon discovers that Endicott's death was anything but accidental, and revealing the truth could threaten much more than Priscilla's finances. To save her new friend's

information explosion shapes the novel form In a world teeming with data the novel is a storage medium cluttered with detail and accumulating more than it can use The fictional things that have been read as insignificant should be seen instead as vessels of information embedding the text with potential This study weaves together a formal account of the novel with media and information studies as well as new materialist approaches to objects Information took material form in the nineteenth century in Victorian literature data can be located in bric a brac folded up papers semi precious stones and rubbish heaps Yet this information may never be transmitted as knowledge Instead the novel offers indefinite storage gesturing toward the future while holding action and accountability in abeyance Fallen by the wayside of plot are documents left on file containers left unopened stock left on the shelf and secrets left untold enacting this study argues the Victorian novel s aesthetics of deferral In readings of works by Charles Dickens George Eliot Mary Elizabeth Braddon Wilkie Collins and Rudyard Kipling this study illustrates the formal effects of cultural questions about value and meaning longevity and history abundance and overwhelm and keeping and discarding It closes by showing how these same questions animate the twenty first century s information culture as well
