Sacred and Secular Pippa Norris, Ronald Inglehart, 2011-10-17 This book develops a theory of existential security It demonstrates that the publics of virtually all advanced industrial societies have been moving toward more secular orientations during the past half century but also that the world as a whole now has more people with traditional religious views than ever before This second edition expands the theory and provides new and updated evidence from a broad perspective and in a wide range of countries This confirms that religiosity persists most strongly among vulnerable populations especially in poorer nations and in failed states Conversely a systematic erosion of religious practices values and beliefs has occurred among the more prosperous strata in rich nations

Secularization Steve Bruce, 2013-01-10 The decline in power popularity and prestige of religion across the modern world is not a short term or localized trend nor is it an accident It is a consequence of subtle but powerful features of modernization Renowned sociologist Steve Bruce elaborates the secularization paradigm and defends it against a wide variety of recent attempts at rebuttal and refutation Using the best available statistical and qualitative evidence Bruce considers the implications for the

Luther Martin, 2014-05-21 Over the course of his career Luther H Martin has primarily produced articles rather than monographs This approach to publication has given him the opportunity to experiment with different methodological approaches to an academic study of religion with updates to and different interpretations of his field of historical specialization namely Hellenistic religions the subject of his only monograph 1987 The contents of this collected volume represent Martin s shift from comparative studies to socio political studies to scientific studies of religion and especially to the cognitive science of religion He currently considers the latter to be the most viable approach for a scientific study of religion within the academic context of a modern research university The twenty five contributions collected in this volume are selected from over one hundred essays articles and book chapters published over a long and industrious career and are representative of Martin s work over the past two decades *Edward Said's Rhetoric of the Secular* Mathieu E.

Courville, 2011-10-20 Edward Said s *Rhetoric of the Secular* provides an important new reading of Edward W Said s work emphasizing not only the distinction but also the fuzzy borders between representations of the religious and the secular found within and throughout his oeuvre and at the core of some of his most customary rhetorical strategies Mathieu Courville begins by examining Said s own reflections on his life before moving on to key debates about Said s work within Religious Studies and Middle Eastern Studies and his relationship to French critical theorists Through close attention to Said s use of the literal and the figurative when dealing with religious national and cultural matters Courville discerns a pattern that illuminates what Said means by secular Said s work shows that the secular is not the utter opposite of religion in the modern globalized world but may exist in a productive tension with it **Secularization** Karel Dobbelaere, 2002 In an epoch in

which religion has explicitly and sometimes violently returned to the forefront of the global public scene the process of secularization that has fundamentally marked Western and particularly European societies demands attention and analysis This book written from a sociological perspective takes up that challenge The author distinguishes three levels of secularization Societal secularization which is a typical consequence of the processes of modernity and of programmes of laicisation promoted by political parties Individual secularization that is manifested in the decline of church commitment occurring as individuals re compose their personal beliefs and practices in a religion la carte and as the individual s meaning system becomes compartmentalized and religion is separated from other areas of life A third level organizational secularization covers the incidence of the adaptation of religious bodies to secularized society The entire work is marked by meticulous description and analysis of numerous theoretical and empirical studies and by due recognition of the intricate relationship between levels of secularization and the impact of various actors in the many conflicts over religion s roles

Radical Secularization? Stijn Latré,Walter Van Herck,Guido Vanheeswijck,2014-12-18 What does it mean for a society to be secular Answering this question from a philosophical angle Radical Secularization delves into the philosophical presuppositions of secularization Which cultural evolutions made secularization possible International scholars from different disciplines assess the answers given by many leading philosophers such as among others L with Blumenberg and Habermas Germany Gauchet and Nancy France Taylor and Bellah North America They examine the theory that secularization cannot only be regarded as a cultural change that was forced upon religion from an external source e g science but should also be considered as a phenomenon triggered by motives internal to religion If religions are indeed capable of inner transformations the question arises whether religions can persist in the secular societies they inadvertently helped to bring about and how secular societies may accommodate religion

Religion in International Relations Theory Nukhet Sandal,Jonathan Fox,2013-06-19 There is a growing realization among international relations scholars and practitioners that religion is a critical factor in global politics The Iranian Revolution the September 11 attacks the ethno religious conflicts such as the ones in the former Yugoslavia and Sri Lanka are among the many reasons for this increased focus on religion in international affairs The rise of religious political parties across the world ranging from the Christian Democrats in Europe to Bharatiya Janata Party in India similarly illustrated religion s heightened international profile Despite all this attention it is challenging to situate religion within a discipline

which has been dominantly secular from its inception Only a few existent works have ventured to integrate religion into core international relations theories such as Classical Realism Neorealism Neoliberalism Constructivism and the English school This work is the first systematic attempt to comparatively assess the place of religion in the aforementioned theoretical strands of international relations with contemporary examples from around the world Written in an accessible and systematic fashion this book will be an important addition to the fields of both religion and international relations Nukhet A Sandal is Assistant Professor in the Political Science Department at Ohio University Jonathan Fox is Professor in the Department of Political Studies at Bar Ilan University Israel
