Secure Passage At Sea:

Secure Passage at Sea Ray S. Cline, William M. Carpenter, 1993-06 This is the report of the Seventh International Conference on the Security of Sea Lines of Communication in the Western Pacific and Indian Oceans co sponsored by the United States Global Strategy Council and SRI International This conference stressed the erosion of the communist system and the need for cooperation among sea going nations in the changing unpredictable and perhaps even more dangerous world The papers presented cover many areas from the strategic trends in the world situation to piracy to command and control and represent the views of individuals from nations as diverse as Japan Indonesia the Philippines New Zealand and the Republic of China on Taiwan All emphasized the diplomatic problems of maintaining freedom of the seas especially as trading relationships become more and more essential for worldwide economic stability and national security Originally published in 1991

Maritime Security and the Law of the Sea Natalie Klein, 2012-10-04 Maritime Security and the Law of the Sea examines the rights and duties of states across a broad spectrum of maritime security threats It provides comprehensive coverage of the different dimensions of maritime security in order to assess how responses to maritime security concerns are and should be shaping the law of the sea The discussion sets out the rules regulating passage of military vessels and military activities at sea law enforcement activities across the different maritime zones information sharing and intelligence gathering as well as armed conflict and naval warfare In doing so this book not only addresses traditional security concerns for naval power but also examines responses to contemporary maritime security threats such as terrorism weapons of mass destruction piracy drug trafficking environmental damage and illegal fishing While the protection of sovereignty and national interests remain fundamental to maritime security and the law of the sea there is increasing acceptance of a common interest that exists among states when seeking to respond to a variety of modern maritime security threats This book argues that security interests should be given greater scope in our understanding of the law of the sea in light of the changing dynamics of exclusive and inclusive claims to ocean use More flexibility may be required in the interpretation and application of the UN Convention on the Law of the Sea if appropriate responses to ensure maritime security are to be allowed

Environmental Security in Watersheds: The Sea of Azov Viktor Lagutov, 2011-10-25 Watersheds supplying crucial ecosystem services to humans seem to be a logical territorial unit to integrate societal benefits and environmental needs in order to evaluate the sustainability of natural resource use patterns Based on this belief the book is an attempt to initiate a comprehensive environmental security assessment in the basin of the Azov Sea shared by Russia and Ukraine Though the region provides a variety of essential services and plays a strategic role in national and international development plans it has been excluded from most regional environmental discussions At the same time there is an alarming degradation rate of basin freshwater ecosystems that has occurred due to overutilization of certain prioritized services e g transportation The collapse of neglected services e g fishery and freshwater supply poses serious threats to the national

economies as well as the local population and to mitigate these threats priority in water management should be given to securing sustainability of the regional freshwater ecosystems In addition to the review of the current status of Azov ecosystem services the authors analyze likely future availability and challenges The relevant experience derived from basin management of the Black Sea and other similar basins is also discussed *Geopolitics and Maritime Security* Frank Bekkers, Patrick Bolder, Esther Chavannes, Willem Oosterveld, Rob de Wijk, Jan Frederik Braun, 2019-06-28 This report contains the results from a research project aimed at identifying new capabilities for the future Royal Netherlands Navy RNLN With the type of naval operations and tasks for the period up to 2030 35 largely enduring the current regional power projection profile of the Royal Netherlands Navy RNLN must be strengthened and renewed We envisage the core of the future naval force to remain a versatile mix of surface and sub surface combatants shipborne helicopters and unmanned systems for intelligence purposes and extended force projection modern amphibious forces and long range land attack capability to counter Anti Access and Area Denial A2AD threats All main vessels should be ocean going able to navigate the main operating theaters in the European seas and the Carib under all conditions But even while we expect that naval operations and tasks as well as the overall force profile of the RNLN will evolve rather than drastically change the RNLN must substantially innovate but not beyond recognition its personnel materiel doctrines and processes organization and structures *Japan's Sea Lane Security* Euan Graham, 2005-11-16 This is the first major English language study to explore the broad and longstanding connections between Japan s national security and the safety of its sea lanes Tracing issues from pre and post 1945 eras the book explores how Japan s concerns with sea lane protection have developed across such diverse fields as military strategy diplomacy trade policy energy security and law enforcement Drawing upon case study material and primary research including interviews with officials and security analysts the book presents a chronological analysis of Japan s sea lane security While Japan s security policies have recently undergone relatively rapid change a historical treatment of sea lane security issues reveals long term continuity in security policymakers perceptions and responses regarding Japan s defence and foreign policy Revealing a neglected but important aspect of Japan s military and economic security the book investigates why officials and analysts continue to portray the defence of Japan s sea lanes as a matter of life and death
