visual representation of the relevant facts or law of the case Building an EU Securities Market Eilís Ferran, 2004-11-25

This book considers some of the fundamental issues concerning the legal framework that has been established to support a single EU securities market. It focuses particularly on how the emerging legal framework will affect issuers' access to the primary and secondary market. The Financial Services Action Plan (FSAP) 1999 was an attempt to equip the community better to meet the challenges of monetary union and to capitalise on the potential benefits of a single market in financial services. It led to extensive change in securities market regulation, new laws, new law-making processes and more attention to the mechanisms for the supervision of securities market activity and legal enforcement. With the FSAP nearing completion, it is a good time to take stock of what has been achieved and to identify the challenges that lie ahead.
